PRESSURE RELIEF PNEUMATIC TEST * PLUG

FEATURES EXCLUSIVE TO PR PLUGS

1

Patent-pending pressure-relief valve is integrated into a glass-filled nylon core for protection and extra rigidity in the field.

2

PR valve prevents over-inflation and releases excess pressure into the atmosphere rather than into the test area which can cause the pipe to slip out of place.

3

One piece molded rubber body with no glued seams eliminates common reason for failure.

4

Ring tag is attached to nylon core rather than valve stem for extra rigidity.

5

PR test plugs with 48" chain and 5' hose included are available for testing sewer cleanouts

8

FEATURES ON ALL TEST-TITE PLUGS

6

Compact design allows easy access, even in a cleanout tee

7

Molded plastic tag will not bend or deform which prevents it from falling into the pipe

8

Industry-leading 3 year limited warranty
