Gen-Eye POD®

Video Pipe Inspection System

Now Wi-Fi Capable!

Always easy on your back *and* your budget, General's versatile Gen-Eye POD® and Mini-POD® now feature optional Wi-Fi inside. Wi-Fi lets you use your own tablet or smartphone to record the inspection and send it to your customers on the spot or back at the shop.

The lightweight, compact Gen-Eye POD combines camera, reel and monitor in an all-in-one package. You get a large 7" LCD color monitor in a padded case mounted on a flexible gooseneck that swivels to give you the best viewing angle, wherever you're working.

Just grab it and go! The full size Gen-Eye POD features a color self-leveling camera and 200 ft. of Gel-Rod® for trouble-shooting 3" to 10" drain lines. The compact MINI-POD carries 125 ft. or 175 ft. of push-rod and color self-leveling mini-camera for inspecting 2" to 4" drain lines. The tough steel frame can be operated vertically or horizontally, so you can handle nearly any application.

There's lots more, like an LED Dimmer Control, both AC and DC power cords, 2" and 3" Trap Skids, and a 512 Hz transmitter. A video out connection lets you record on an external device.

Patented Gel-Rod push rod withstands tough abuse in the line. The Gel in the rod keeps moisture away from the wires inside if it's ever cut or abraded. Dual layer/dual color construction let's you see rod wear so it can be repaired before it becomes a problem. Kevlar braid, fiberglass core and durable sheath provide maximum pushing and pulling power.
