

## **APAC120S - 12,000 BTU Portable Air Conditioner** **With Exclusive InvisiMist Drain Technology**

The Avallon 12,000 BTU Portable Air Conditioner and Heater (**APAC120HS**) will bring you compact comfort all year round. It is ideal for cooling or heating individual rooms that are not served by central air conditioning. With the APAC120HS you can keep any area of your choice at the perfect temperature no matter the season. This unit features dual hose technology that facilitates more efficient cooling and stable air pressure. Your order will also include an easy to install window kit that takes up much less window space than traditional in-window units while performing a self-evaporating function that virtually eliminates the need to manually drain the unit. Controlling the settings of your portable air conditioner will be a breeze with the included remote control that features an LCD display. With a temperature range of 64° F to 90° F and four fan speed options, you can precisely control the unit's output from the comfort of your sofa. The energy saver mode will be kind to your wallet as well as the environment, allowing you to run the unit exactly when you need it and not a moment more. Thanks to the 24 hour timer, you can even set the unit to turn on before you arrive home and turn off once you leave. This model also includes a carbon filtration system that eliminates bad smells and contaminants from the air. The unit functions as a powerful dehumidifier as well as a cooler and heater. If you set this appliance to automatic mode, it will choose whether to cool, dehumidify, or heat based on the ambient temperature. With the APAC120HS, keeping your home comfortable couldn't be easier or more convenient.
