## Multi-Splits

### Ameristar is introducing a Multi-Split outdoor.

As the ductless market continues to develop and grow, there is a large demand for entry level ductless products. As a result of input and feedback from our dealers, distributors, and Trane Supply, we are excited to introduce a portfolio of products to fill this great opportunity.

In Q1 we launched a 15 SEER lineup of Mini-Splits and a 115V Mini-Split, that continue to outperform our forecasts. Because of this success, we have more Multi-Splits coming than we can imagine selling - all to ensure availability. The M4THM15 line of Multi-Splits outdoors are designed to work with M4MHW15 High-wall units we launched in the Spring.

Product data for the 15 SEER Multi-Split is on Page two of this document. These products will continue Ameristar's tradition of quality products at an affordable price. The portfolio will be available to all independent distribution, Trane Supply, and company owned distribution. In addition, the Ameristar team is always looking for more opportunities to expand to new and non-traditional points of distribution.

- Wall Mounted Indoor offering
- Indoor unit comes with hand held remote
- Multi-Split with 2, 3, 4, and 5 Port offering
- All models are 15 SEER
- Up to 8.2 HSPF
- Up to 10 EER

#### Limited Warranty

- **Registered:**
  - 10 year Compressor, Coil, Functional Parts
- **Base:**
  - 5 year Compressor, Coil, Functional Parts

#### Extended Warranty

- Available

#### Pricing

- Available

#### Consumer & Technical Literature

- Available on the Ameristar Support Site
- Submittals and Installation Instructions are available
