family of aesthetic  
sprinklers**

- Long throw up to 24 feet of extended coverage
- Quick Response
- Concealed operating parts prevent objects from being hung from the sprinkler and causing activation
- Custom factory-painted cover plates available
- cULus Listed

The TYCO Model RFIII Extended Coverage Flat-Plate Concealed sprinkler has an 8.0 K-Factor and is rated for Light Hazard occupancies. With its unique, flat cover designed to conceal the sprinkler within the wall, the RFIII is an ideal choice for architecturally-sensitive installations, such as hotel rooms, reception areas, banquet facilities, conference rooms, and hospitals. The RFIII is designed to provide protection for coverage areas up to 16 ft x 24 ft (4,9 m x 7,3 m) and 18 ft x 22 ft (5,9 m x 6,7 m).

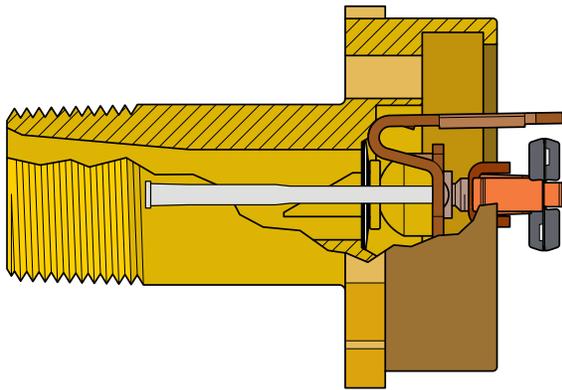

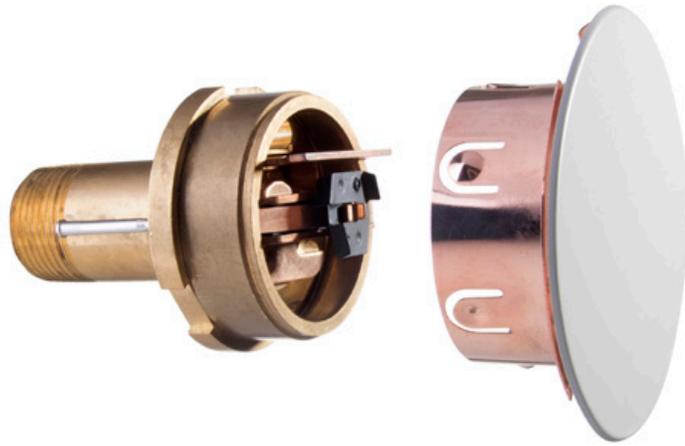

The flat profile of the sprinkler cover plate allows it to easily blend with the wall surface for a clean look and additionally helps prevent damage and interruption from accidental activations that may be caused by objects being hung from or striking the sprinkler. The cover plate assembly is available in a variety of standard colors, as well as factory-painted custom colors—visit [www.tyco-fire.com/custompaint](http://www.tyco-fire.com/custompaint) for more details on custom paint options.

The RFIII joins the TYCO family of aesthetic sprinklers, which includes RFII flat-plate concealed pendant sprinklers, also available in a range of standard and custom colors, as well as the Raven Studio sprinkler, available in custom colors or with a paint-in-place escutcheon. To learn more about the RFIII, visit [www.tyco-fire.com](http://www.tyco-fire.com).

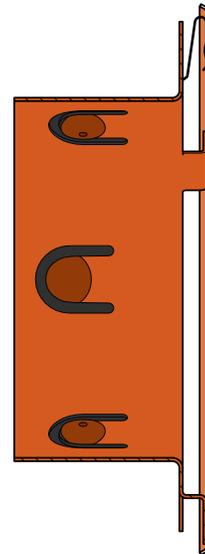

*Always refer to the Technical Data Sheet TFP270 for complete description of all listing criteria, design parameters, installation instructions, and care and maintenance guidelines.*
