

- Prevents sludge build-up and drain pan corrosion
- Cleans drain pan & lines
- Controls odors, improves IAQ
- Maintain free flowing drains
- Prevents drain pan corrosion
- Long lasting - Up to 6 months

Description

PurCool Strips are powerful, economical, preventive maintenance for A/C condensate drain pans. Just place them anywhere in the drain pan where the PurCool Strips will contact the condensate water and enjoy up to six months of economical protection. PurCool Strips will adhere to the drain pan and will not float or move. They dissolve completely, leaving no residue. Safe for metal and plastic drain pans.

Application

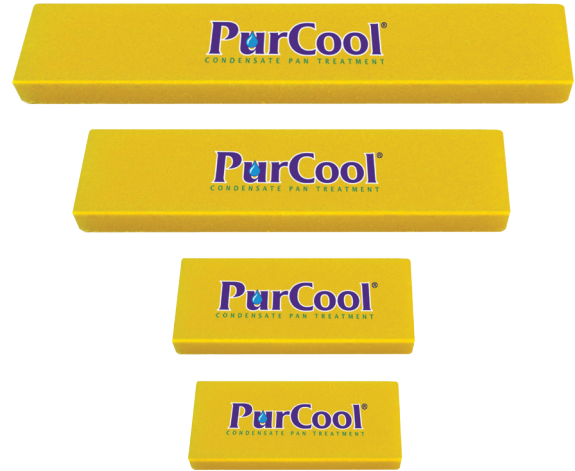

PurCool Strips keep A/C and refrigeration condensate drain pans clean and free flowing. Use PurCool Strips to prevent condensate drain clogs, costly overflow, and corrosion.

Treats 3 tons for 6 months (bulk)	61047	1903D-100

Condensate Drain Pan Treatment

PurCool Strips

Directions

Place the PurCool Strip in the condensate drain pan in an area away from the drain opening. When drain pan begins to collect condensate water, the PurCool Strip will adhere to the pan and begin to slowly dissolve and provide treatment. PurCool Strips will not float or move in the drain pan and over time, the PurCool Strip will completely dissolve leaving no residue. It will last up to 6 months.
