Clean without a doubt.

**ECOLAB**<sup>®</sup>

Everywhere It Matters.<sup>™</sup>

**WHY AREN'T  
YOUR EMPLOYEES  
GETTING THEIR  
HANDS CLEAN?**

an estimated  
**80%**  
of all infections  
are transmitted  
by hands.<sup>1</sup>

**3**  
**Days**  
is the amount of time  
some germs can live  
on moist surfaces.<sup>2</sup>

**95%**  
of people don't  
wash their hands  
adequately.<sup>3</sup>

# A HANDFUL OF REASONS

- 1 **Low awareness** of the spread of germs that can lead to illness
- 2 **Wash without soap** and just rinse with water
- 3 **Lack of formal training** on proper hand hygiene procedures
- 4 **Equipment failure** and poor product inventory create a lag in use
- 5 **The “ick factor”** resulting from messy and dirty dispenser areas make them squeamish
