WWW.MIAMITECH.COM

Miami Tech, Inc. was established in 1987 in a small warehouse with a handful of products to offer. Today, Miami Tech spans over 135,000 square feet of manufacturing and warehousing space in our three facilities located in Miami, Florida, with over 17,000 components in our product lines.

Miami Tech continuously designs, builds, and implements new methods of manufacturing, delivering quality, efficiency and mass production to the industry. We continue to operate on the cutting edge with fully automated production lines and CNC laser cutting technology ensuring consistent quality of our products. Always striving to be ahead of the competition, we are constantly innovating new designs and product lines as well as offering swift and versatile processing of custom requests to cater to every last one of our customers' needs. We work tirelessly to improve the products themselves, redesigning them based on you and your customers' feedback.

Since we build to stock and ship from inventory at our highly efficient Miami Tech Distribution Center, the moment we receive an order, it can be fulfilled and shipped within forty-eight hours and in most cases the same day. You don't have to wait two or three weeks for your order, which is the industry standard. You can count on our friendly and knowledgeable customer representatives to get it right, so you can receive it on time. As one of the leading manufacturers in the HVAC industry, we strive to be the best, setting new standards in quality, service, and price.

Industry Leaders. Manufacturing Experts.

Setting the industry standard since 1987.

3611 NW 74th Street
Miami, Florida 33147

TRANE/AMERICAN STANDARD AIR-HANDLER BASE

Product Information

- Plastic capped feet to protect foundation surface.
- Pre-filter track accommodates a 1" thick air-filter (filter not included).
- Stands are individually boxed for easy inventory.

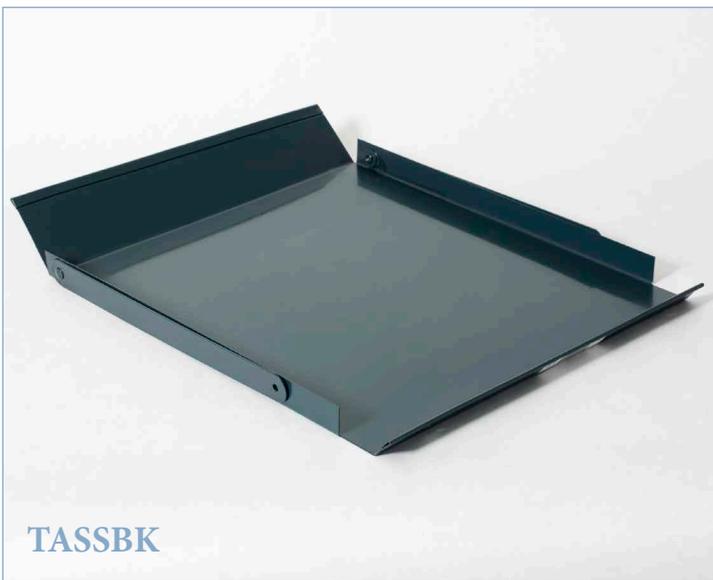

Product Construction

- Frame:
- 16 gauge 1" x 1" square tube.
 - 16 gauge 1" x 1" steel angle.
 - 20 gauge 1/2" x 1/2" steel angle.
- Outside Casing:
- 16 gauge ASTM A-653 hot-dipped steel.
 - 26 gauge ASTM A-653 hot-dipped steel.

Mesh:

- 13 gauge 1.75" x .75" expanded steel.

Part No.	Width	Height	Depth	Qty.
TASB175	17-5/8"	17.25"	21"	1

TASB235	23-5/8"	17.25"	21"	1

TASSBK

TRANE/AMERICAN STANDARD AIR-HANDLER BASE SOUND Baffle KIT

Product Information

- Fully powder coated to give a long lasting corrosion resistant finish.
- Installs in just minutes using the provided four #10 sheet metal screws.
- Packaged in a 2" high box for easy transport and storage.

Product Construction

Body:

- 20 gauge powder-coated galvanized steel.
- 14 gauge powder-coated galvanized steel.

Part No.	Width	Qty.
TASSBK175	14.75"	1
TASSBK215	18.75"	1
TASSBK235	20.75"	1

MTISRKIT

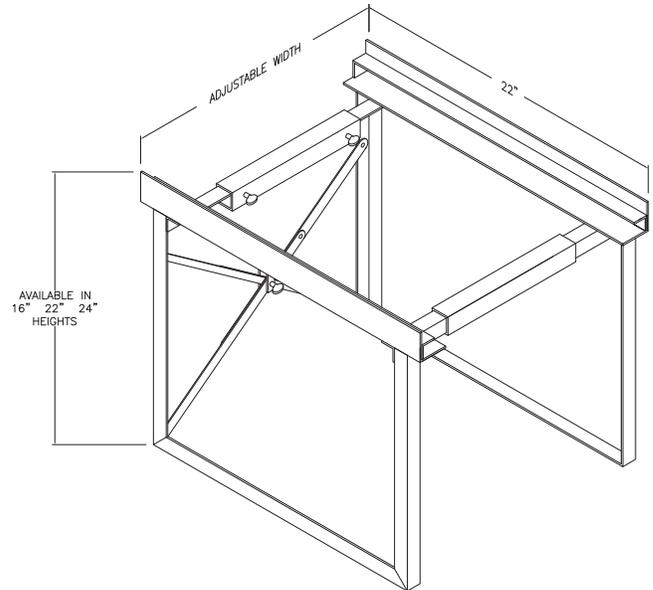

TRANE/AMERICAN STANDARD SIDE RETURN KIT

Product Information

- Designed to offer the end user flexibility and convenience in the installation of Trane and American Standard air handlers.
- Filter rack designed for widely available 16" x 20" x 1" filters.
- Individually boxed with installation instructions included.

Part No.	Size	Gauge	Qty.
MTISRKIT1620	16" x 20"	26ga	1

HEAVY DUTY ADJUSTABLE AIR HANDLER BASE MODEL HAB

Product Information

- Standard 22" depth with filter rack.
- Air handler features adjustable width.
- Rated to support air handler units up to 200lbs.
- Rating tested by Construction Research Laboratory, Inc.
- All HAB stands are packaged in a 24" x 24" x 3" box.
- US Patent No. 5,308,037.

Product Construction

Legs:

- 16 gauge steel.

Height:

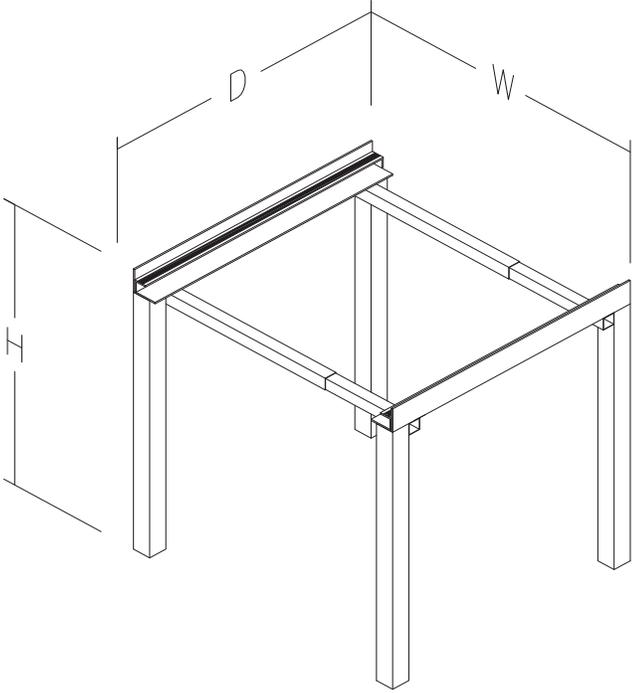

- Add 1.5" to leg height for total base height.

Adjustable Width Types:

- Narrow Frame (N): 14" to 25".
- Wide Frame (W): 17" to 27".

Part No.	Height / Frame Type	Qty.
HAB22/16N	16" / Narrow Frame	1
HAB22/16W	16" / Wide Frame	1
HAB22/22N	22" / Narrow Frame	1
HAB22/22W	22" / Wide Frame	1
HAB22/24N	24" / Narrow Frame	1
HAB22/24W	24" / Wide Frame	1

STEEL HEAVY DUTY ECONOMICAL ADJUSTABLE AIR HANDLER BASE MODEL HEB

Product Information

- Standard 22" depth with filter rack.
- Filter rack is included.
- Plastic 1" caps in upper and lower leg openings.
- 1/8" x 3/8" rubber strips included to minimize vibration.
- Air handler features adjustable width.

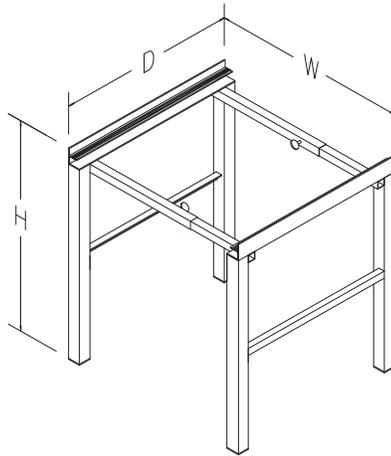

Product Construction

- Legs:
- 16 gauge steel.
- Frame:
- 14 gauge steel.
- Adjustable Width Types:
- Narrow Frame (N): 14" to 24".
 - Wide Frame (W): 17" to 27".

Part No.	Height / Frame Type	Qty.
HEB18N	18" / Narrow Frame	1
HEB18W	18" / Wide Frame	1
HEB24N	24" / Narrow Frame	1
HEB24W	24" / Wide Frame	1

ALUMINUM HEAVY DUTY ECONOMICAL ADJUSTABLE AIR HANDLER BASE MODEL AHEB

Product Information

- Standard 22" depth with filter rack.
- Air handler features adjustable width.
- 1/8" x 3/8" rubber strips included to minimize vibration.
- No assembly required.
- Custom sizes are available upon request.
- 25 units per skid.

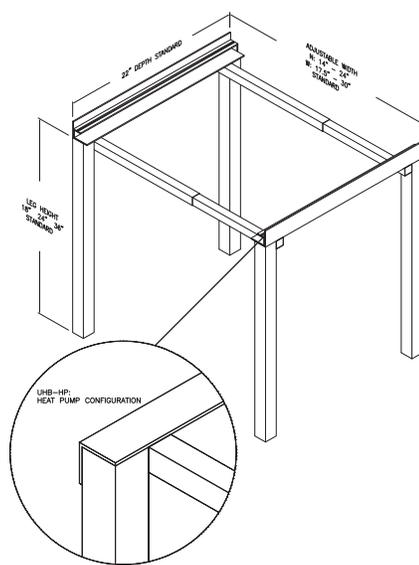

Product Construction

- Material:
- 6003-T5 aluminum.

- Adjustable Width:
- W: 16" to 26"

Part No.	Stand Size (H x D x W)
AHEB1720W	17.5" x 20" x W (16" to 26")
AHEB1722W	17.5" x 22" x W (16" to 26")
AHEB1727W	17.5" x 27" x W (16" to 26")
AHEB2422W	24" x 22" x W (16" to 26")
AHEB2722W	27" x 22" x W (16" to 26")

ULTRA HEAVY-DUTY ADJUSTABLE AIR HANDLER BASE MODEL UHB

Product Information

- Standard 22" depth with filter rack.
- Filter rack is included.
- No assembly required.
- Plastic caps in lower leg openings.
- 1/8" x 3/8" rubber strips included to minimize vibration.
- Air handler features adjustable width.
- Custom sizes are available upon request.
- 20 stands per skid.

Product Construction

- Legs:
- 1.5" x 1.5" x 16ga galvanized steel tubing.

- Frame:
- 2" x 2" x 1/8" steel angles.

- Adjustable Width Types:
- Narrow Frame (N): 14" to 24".
 - Wide Frame (W): 17.5" to 30".

Part No.	Height / Frame Type	Qty.
UHB18N	18" / Narrow Frame	1
UHB18W	18" / Wide Frame	1
UHB24N	24" / Narrow Frame	1
UHB24W	24" / Wide Frame	1
UHB36N	36" / Narrow Frame	1
UHB36W	36" / Wide Frame	1

ALUMINUM CONDENSING UNIT STAND FOR NON-HVHZ ZONE

Product Information

- Engineered specifically for non-use in high velocity hurricane zones. (HVHZ = Miami-Dade County & Broward County).
- Available with optional cross-mounting angle.
- Available with optional lead boots.
- Available with optional electrical box mounting bracket (EMB).
- Available with optional vibration pad to isolate vibration from condensing unit.
- Engineer's raised-seal drawings available.
- Florida State Approval #FL21464.
- Engineering backed calculator available at www.miamitech.com.

Part No.	AST 18.5" Stand Assembly	Height
AST185Q-K3	Aluminum C/U Stand, 18.5" Legs (2 Frames), 1/4 Plate, 3' I-Beam, For Non-HVHZ	18.5"
AST185Q-K6	Aluminum C/U Stand, 18.5" Legs (2 Frames), 1/4 Plate, 6' I-Beam, For Non-HVHZ	18.5"
AST185Q-K9	Aluminum C/U Stand, 18.5" Legs (3 Frames), 1/4 Plate, 9' I-Beam, For Non-HVHZ	18.5"
AST185Q-K12	Aluminum C/U Stand, 18.5" Legs (4 Frames), 1/4 Plate, 12' I-Beam, For Non-HVHZ	18.5"
AST185Q-K15	Aluminum C/U Stand, 18.5" Legs (5 Frames), 1/4 Plate, 15' I-Beam, For Non-HVHZ	18.5"
AST185Q-K18	Aluminum C/U Stand, 18.5" Legs (6 Frames), 1/4 Plate, 18' I-Beam, For Non-HVHZ	18.5"
Part No.	AST 24" Stand Assembly	Height
AST240Q-K3	Aluminum C/U Stand, 24" Legs (2 Frames), 1/4 Plate, 3' I-Beam, For Non-HVHZ	24"
AST240Q-K6	Aluminum C/U Stand, 24" Legs (2 Frames), 1/4 Plate, 6' I-Beam, For Non-HVHZ	24"
AST240Q-K9	Aluminum C/U Stand, 24" Legs (3 Frames), 1/4 Plate, 9' I-Beam, For Non-HVHZ	24"
AST240Q-K12	Aluminum C/U Stand, 24" Legs (4 Frames), 1/4 Plate, 12' I-Beam, For Non-HVHZ	24"
AST240Q-K15	Aluminum C/U Stand, 24" Legs (5 Frames), 1/4 Plate, 15' I-Beam, For Non-HVHZ	24"
AST240Q-K18	Aluminum C/U Stand, 24" Legs (6 Frames), 1/4 Plate, 18' I-Beam, For Non-HVHZ	24"
Part No.	AST 30" Stand Assembly	Height
AST300Q-K3	Aluminum C/U Stand, 30" Legs (2 Frames), 1/4 Plate, 3' I-Beam, For Non-HVHZ	30"
AST300Q-K6	Aluminum C/U Stand, 30" Legs (2 Frames), 1/4 Plate, 6' I-Beam, For Non-HVHZ	30"
AST300Q-K9	Aluminum C/U Stand, 30" Legs (3 Frames), 1/4 Plate, 9' I-Beam, For Non-HVHZ	30"
AST300Q-K12	Aluminum C/U Stand, 30" Legs (4 Frames), 1/4 Plate, 12' I-Beam, For Non-HVHZ	30"
AST300Q-K15	Aluminum C/U Stand, 30" Legs (5 Frames), 1/4 Plate, 15' I-Beam, For Non-HVHZ	30"
AST300Q-K18	Aluminum C/U Stand, 30" Legs (6 Frames), 1/4 Plate, 18' I-Beam, For Non-HVHZ	30"

Part No.	Post Pairs	Size
AST185Q	Aluminum C/U 18.5" Post Pairs	18.5"
AST240Q	Aluminum C/U 24" Post Pairs	24"
AST300Q	Aluminum C/U 30" Post Pairs	30"

Part No.	I-Beams	Size
ASTI-3	Aluminum I-Beam, 3'	3'
ASTI-6	Aluminum I-Beam, 6'	6'
ASTI-9	Aluminum I-Beam, 9'	9'
ASTI-12	Aluminum I-Beam, 12'	12'
ASTI-15	Aluminum I-Beam, 15'	15'
ASTI-18	Aluminum I-Beam, 18'	18'

ALUMINUM TELESCOPING CONDENSING UNIT STAND MODEL AS14

AS14

Product Information

- 2014 Florida Building Code Compliant.
- Engineered to accommodate the larger SEER 13 units.
- Available with optional vibration pad to isolate vibration from condensing unit.
- Available with optional cross-mounting angle (AS14CAB).
- Available with optional lead boots (LB).
- Available with optional electrical box mounting bracket (EMB).
- Engineer's raised-seal drawings available.
- **Miami-Dade NOA #16-0601.01**
- Protected under US Patent No. 9,052,120.

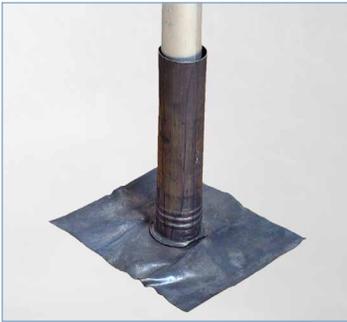

Product Construction

- Body:
- All aluminum 6061-T6 alloy construction.
- Legs:
- Patented webbed posts.

Part No.	Standard AS14 Leg Assembly	Size
AS14S18	Standard Aluminum Stand Leg Assembly, 2014 FBC 20-30" spread, 18" tall	18"
AS14S24	Standard Aluminum Stand Leg Assembly, 2014 FBC 20-30" spread, 24" tall	24"
AS14S30	Standard Aluminum Stand Leg Assembly, 2014 FBC 20-30" spread, 30" tall	30"
Part No.	Heavy Duty AS14 Leg Assembly	Size
AS14H18	Heavy Duty Aluminum Stand Leg Assembly, 2014 FBC 36-42" spread, 18" tall	18"
AS14H24	Heavy Duty Aluminum Stand Leg Assembly, 2014 FBC 36-42" spread, 24" tall	24"
AS14H30	Heavy Duty Aluminum Stand Leg Assembly, 2014 FBC 36-42" spread, 30" tall	30"

AS14 OPTIONS

Lead Boot Option

The lead boot is a commonly used item in the roofing industry. When the roof will have lightweight concrete poured over the base plates, we recommend the usage of our lead boots as it acts as an isolator between the concrete and the aluminum to help prevent oxidation.

Cross Mounting Angle Option

Our aluminum cross mounting angle allows us to extend the width of the stand up to 42" (center to center of beam). By widening the stance of the stand, we can achieve much higher PSF ratings for even the most stringent requirements. When a condensing unit is too narrow to sit on the required stand, a set of AS14CAB will allow for installation.

Electrical Mounting Bracket (EMB) Option

Our optional electrical mounting bracket allows the contractor to mount the electrical box on our condenser stand in either a hanging or standing position. Clean and easy.

TOOLS TO GET THE JOB DONE

Miami Tech, Inc.
A/C Stand Post Tabulation

Use With 5th FBC (2014) (NOA 15-0902...)

In collaboration with the best team at Engineering Express, Miami Tech is the first HVAC manufacturer to introduce an interactive calculator to the industry, allowing both, contractors and wholesalers, to plan out jobs in advance with engineer-backed accuracy. Not only are we the first in offering an interactive calculator, but also the first manufacturer with engineering data based-on real world applications, giving contractors the added confidence in knowing their job is backed by the best engineering data available.

MODEL AWB14 (WIND LOAD RATED) ALUMINUM CONDENSING UNIT WALL MOUNT BRACKET

Product Information

- FBC 2014 compliant.
- Rated for wind-loads up to 170 psf.
- Original raised-seal engineering drawings available at an additional cost.
- Optional vibration pad made from recycled rubber to isolate vibration from condensing unit available.

Product Construction

- 6061-T6 alloy temper aluminum.

Part No.	Bracket Length	Bracket Spacing	Inner Spacing	Max Unit

CONDENSING UNIT CAGE

Product Information

- Powder-coated galvanized steel for long-term resistance and MIG welded.
- Ships knocked-down for easy storage and transportation.
- Removable top and side for easy service access.
- Pivot design allows for total access of condensing unit.
- 10" clearance between cage and slab for electrical and refrigerant lines.
- 3" clearance between cage and slab on all other sides.
- Padlocks included. Anchoring hardware not included.

Product Construction

- 16ga galvanized steel tubes.

Part No.	Size (H x D x W)	Gauge	Quantity
CUC403434RR	40" x 34" x 34"	16ga	1
CUC524040RR	52" x 40" x 40"	16ga	1

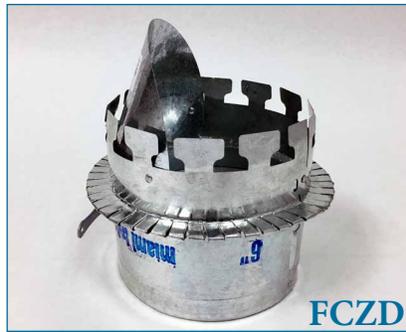

TAB COLLARS FOR FIBERGLASS

Product Information

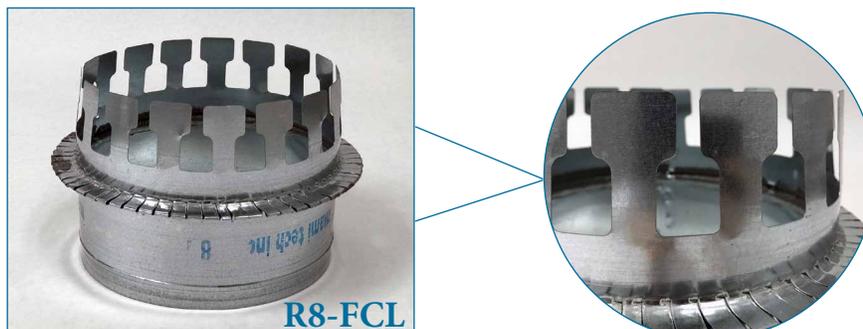

- FCL designed to accommodate R-4 & R-6 ductboard.
- R8-FCL designed to accommodate R-8 ductboard.
- 180° hemmed circumference and no raw edges.
- FCL flange dimension (.700") exceeds Florida Building code requirement of .625" (FL Building Code # 603.5.6).

Product Models

- FCL: One piece wide tab collar for R-4 or R-6 ductboard.
- R8-FCL: One piece wide tab collar for R-8 ductboard.
- FCZ: One piece wide tab collar with scoop.
- FCD: One piece wide tab collar with damper.
- FCZD: One piece wide tab collar with scoop and damper.
- FCLG: One piece wide tab collar with gasket.
- FCLN: Nested one piece wide tab collar.
- CG: Gasket only.
- FCD-SOE: FCD with Miami Tech's 2" stand-off.
- FCZD-SOE: FCZD with Miami Tech's 2" stand-off.
- Refer to page 33 for more details on collar options.

SPIN-IN COLLAR FOR METAL DUCT

Product Information

- Mechanically riveted body.
- Spin-in groove fabricated into body to ensure accurate inlet diameter.
- Clamp bend and pipe crimp facilitate quick and secure field installation.

STAND-OFF OPTION

Product Information

- 2" stand-off equipped with butterfly-nuts top and bottom lock in damper, as well as position lock nut.
- Designed for commercial applications.

Add "SO" to part number to indicate this option.

SO

E-STYLE STAND-OFF OPTION

Product Information

- 2" stand-off equipped with butterfly-nuts top and bottom lock in damper, as well as position lock nut.
- For use on any fitting damper.
- Designed for light commercial and residential applications.

Add "SOE" to part number to indicate this option.

SOE

HD (HEAVY DUTY) STAND-OFF OPTION

Product Information

- Equipped with a heavy duty handle and a position lock nut on 2" stand-off (1" stand-off available).
- 3/8" aluminum square rod shaft and 22 gauge damper blade for heavy duty applications.
- Nylon bushings on both ends of damper.
- Ideal for commercial and high-volume applications.

Add "HD" to part number to indicate this option.

HD

Products below shown with heavy duty stand-off option installed.

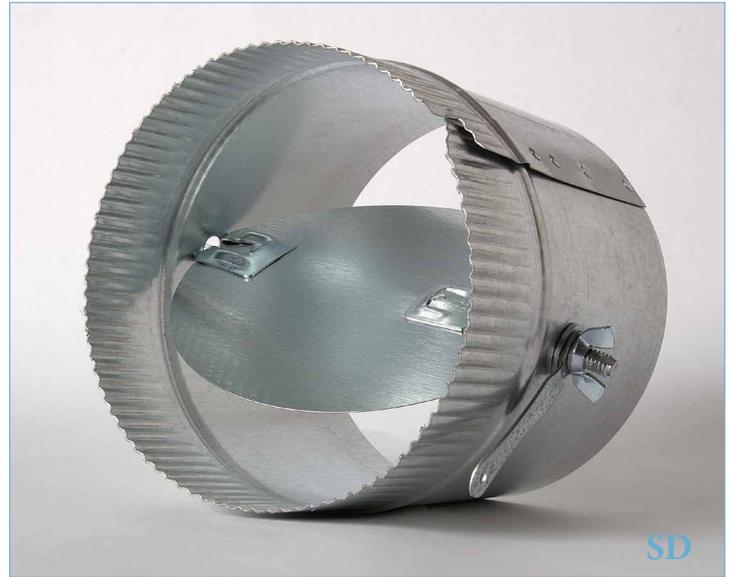

SLEEVE DAMPER

Product Information

- Clamp bend and pipe crimp facilitate quick and secure field installation.
- Refer to page 33 for options available.

Product Information

- Refer to page 33 for options available.

Size Availability (Width x Height)		
Minimum	Maximum	Qty.
6" x 6"	36" x 12"	1

OBD

ALUMINUM OPPOSED-BLADE VOLUME DAMPER

Product Information

Frame

- 6063-T5 extruded aluminum, .081" wall thickness.
- Universal C-Channel Frame.

Blades

- 6063-T5 extruded aluminum, .081" wall thickness.
- Spaced at approximate 6" centers.

Bearings

- Permanently lubricated oilite bronze. Press fit into frame.

Operator Shaft

- 1/2" diameter plated steel shaft extends 3" past frame.

Finish

- Mill Aluminum.

Size Availability (Width x Height)		
Minimum	Maximum (Single Section)	Qty.
12" x 12"	48" x 60"	1
Minimum	Maximum (Multi-Section)	Qty.
12" x 12"	96" x 60" (Horizontal)	1
Minimum	Maximum (Multi-Section)	Qty.
12" x 12"	48" x 120" (Vertical)	1

PBD

ALUMINUM PARALLEL-BLADE VOLUME DAMPER

Product Information

Frame

- 6063-T5 extruded aluminum, .081" wall thickness.
- Universal C-Channel Frame.

Blades

- 6063-T5 extruded aluminum, .081" wall thickness.
- Spaced at approximate 4" centers.

Bearings

- Permanently lubricated oilite bronze. Press fit into frame.

Operator Shaft

- 1/2" diameter plated steel shaft extends 3 or 6" past frame.

Finish

- Mill Aluminum.

Size Availability (Width x Height)

MPBD

RECTANGULAR MOTORIZED ZONE DAMPER

Product Information

Frame

- 6063-T5 extruded aluminum.

Blades

- 6063-T5 extruded aluminum.

Gasket

- Vinyl gasket extrusion.

Gears

- 2" round glass-filled fire-retardant nylon.

Operator Motor

Two motor actuator styles available:

- POPC: power open, power close (24VAC) (ex. MZD1212-POPC).
- POSC: power open, spring close (24VAC) (ex. MZD1212-POSC).

MZD

Size Availability (Width x Height)		
Minimum	Maximum	Qty.
6" x 6"	36"x18"	1

ROUND MOTORIZED ZONE DAMPER

Product Information

- Includes a 3/8" aluminum shaft and 22 gauge damper blade.
- Perimeter foam gasket to reduce leakage when damper is closed.

Operator Motor

- POSC: power open, spring close (24VAC) (ex. MZDR06-POSC).

MZDR

Part No.	Diameter	Body Length	Qty.

RXCH

RHEEM/RUUD HORIZONTAL DRAIN PAN

Product Information

- Powder-coated galvanized steel.
- Brazed corners for a watertight seal.
- 1/2" NPT threaded nipple installed.

Part No.	Size (W x L)	Gauge	Qty.
MTI-RXCHA10	13" x 19-1/16"	22ga	1
MTI-RXCHA14	15-1/8" x 21-1/8"	22ga	1
MTI-RXCHA16	20-3/8" x 23-11/16"	22ga	1

DPA

AUXILIARY DRAIN PAN

Product Information

- Powder-coated galvanized steel.
- For Rheem air-handler units.

Part No.	Size	Gauge	Qty.
DPA	4" x 19" x 1"	24ga	1

AHK

DRAIN PAN HANGING KIT

Product Information

- Designed for various sizes of air handlers.
- Hardware for mounting to wooden trusses or steel bar joists included.

AHK1/4 Hanging Kit

- Part No. AHK1/4
- Qty. 5 Kits/Pack

Kit includes the following:

- (2) - 32" x 14ga. Slotted Angles
- (4) - 1/4" x 6ft. Threaded Rods
- (4) - 1/4" x 3" Eye Bolts
- (4) - 1/4" x 2" Eye Lag Bolts
- (4) - 3/8" Fender Washers
- (12) - 1/4" Hex Nuts
- (12) - 5/16" Flat Washers

AHK3/8 Hanging Kit

- Part No. AHK3/8
- Qty. 5 Kits/Pack

Kit includes the following:

- (2) - 32" x 14ga. Slotted Angles
- (4) - 3/8" x 6ft. Threaded Rods
- (4) - 1/4" x 3" Eye Bolts
- (4) - 1/4" x 2" Eye Lag Bolts
- (4) - 1/4" Hex Nuts
- (8) - 3/8" Hex Nuts
- (4) - 3/8" Fender Washers
- (12) - 5/16" Flat Washers

FIBERGLASS REDUCERS

Product Information

- All models are available assembled or knocked-down.
- Unfolded units can be built quickly and only require tape to fasten them.
- Duct openings can be easily cut with a utility knife.
- Fiberglass reducers are made of 1-1/2" thick R6 fiberglass insulation with a foil barrier (FSK).

- RED-NC: Standard metal reducer without crimp.

RECTANGULAR TRANSITION (WITH GASKET)

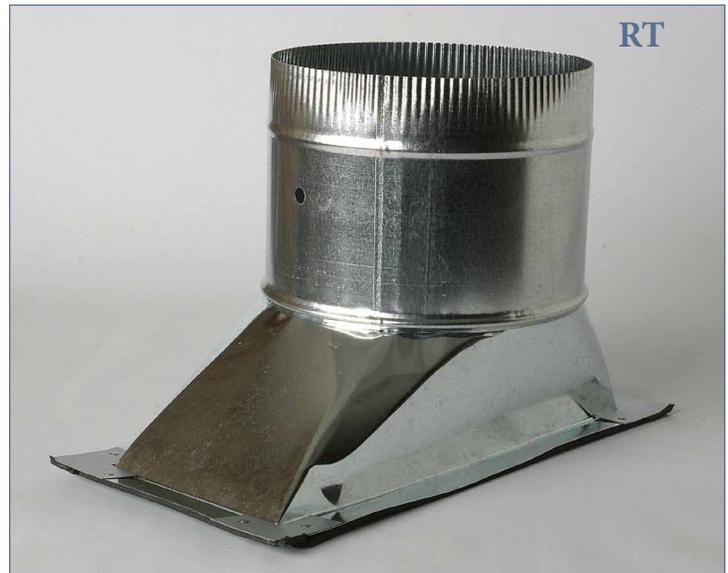

Product Information

- Continuous welded seam prevents air leakage.
- 1" pre-drilled flange with gasket face helps provide a secure connection.

Product Models

- RT: Plain rectangular transition.
- RTD: Rectangular transition with damper.
- RTDS: Rectangular transition with damper and 2" stand-off.
- RTDS-HD: Heavy-duty rectangular transition with damper and 2" stand-off.
- RTDS-HDG: Heavy-duty rectangular transition with damper, 2" stand-off and blade total-seal gasket.
- Refer to page 33 for hardware details.

TWIN SIDE WALL CAP

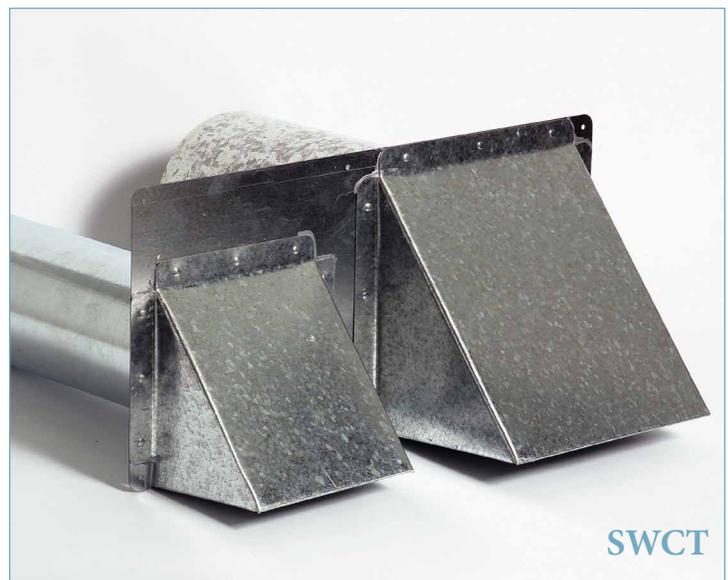

Product Information

- Expanded metal screen keeps debris and small animals out of ductwork.
- Riveted, heat-glued seams create a strong, moisture resistant seal.
- Flanged base provides for good vent-to-wall contact and easy caulking surface.
- Includes a long galvanized neck for easy union through walls to interior ducts.

Product Models

- SWCT: Plain twin side wall cap.
 - SWCTXDXD: Twin side wall cap with damper.
- (X to be replaced with either 4 or 6 to indicate size)

- Type C Damper Overall Width = Duct Opening/Nominal Size plus 2"
- All fire dampers are available in 1/4" increments.

FIRE DAMPER SELECTION GUIDE

Fire Damper Description

Curtain-type fire dampers are designed to restrict the spread of fire through ventilation systems by shutting when the fusible link melts. Fire dampers are evaluated for use in either Static applications (for HVAC systems that are automatically shut down in the event of a fire) or Dynamic applications (for HVAC systems that continue to operate in the event of a fire).

Dynamic Fire Damper Description

Underwriters Laboratories (UL) Standard for Safety 555 categorizes smoke and fire control systems as either static and dynamic. UL555 defines dampers intended to close under no airflow conditions as dampers for static systems, and dampers intended to close under flow conditions as dampers for dynamic systems.

For dynamically rated dampers, the label indicates airflow direction, maximum rated velocity through the open damper, and the maximum pressure differential across the closed damper.

Ceiling Radiation Damper Description

Butterfly-style ceiling radiation dampers are installed in the air distribution portion of a fire-rated ceiling assembly. The sole purpose of which is to help maintain the fire endurance rating of the assembly. A ceiling radiation damper shuts automatically to restrict the passage of heat.

Dynamic Fire Damper Ratings

The following figures represent the approved flow ratings for dynamically rated dampers in various mounting arrangements.

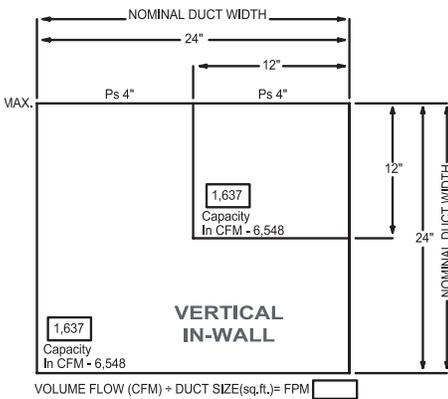

FIGURE 1

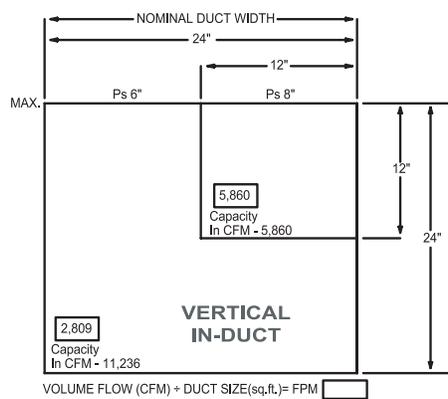

FIGURE 2

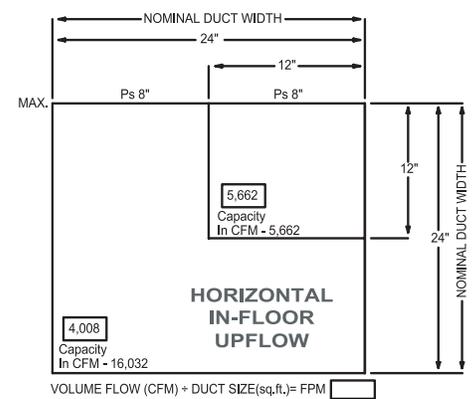

FIGURE 3

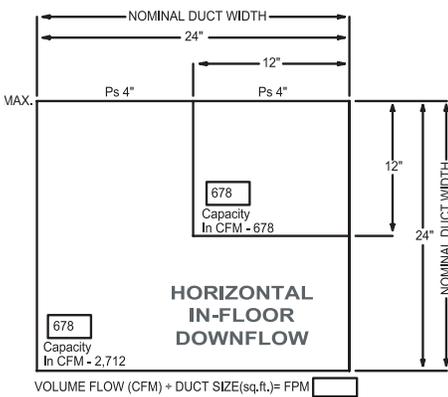

FIGURE 4

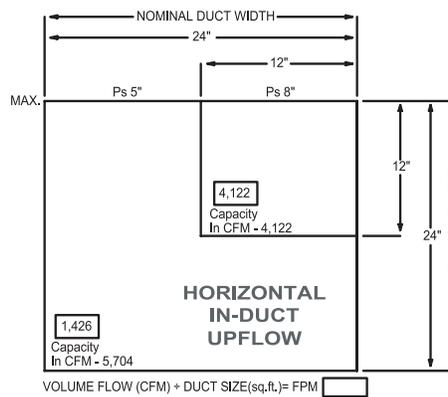

FIGURE 5

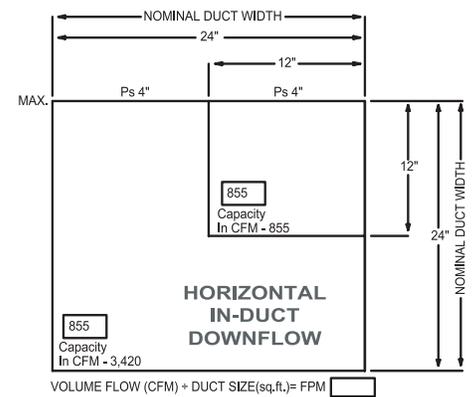

FIGURE 6

FIRE DAMPER AND CEILING DAMPER ORDERING GUIDE

Fire Damper Ordering Guidelines

- When ordering fire dampers, designate the appropriate model number to specify static or dynamic rating (see Model Ordering Guidelines below).
- When ordering dynamically rated fire dampers, also refer to Figures 1 through 6 on page 68. When duct sizes are larger than the sizes shown, multiple unit assemblies are required. Since each individual damper in the assembly has its own heat responsive device, it must be assumed that each damper will close at slightly different times. Because of this, Underwriters Laboratories (UL), requires that the total volume of air for the assembly must not exceed the allowable rating of the smallest unit in the assembly.

Example: A model 151A 24" x 24" is ordered to be installed in a Vertical In-Duct position (see Figure 2, page 68). This unit shall be assembled in (1) 24" x 24" section, which according to the table, is rated for an air volume of 11,236 CFM with an air velocity of 2,809 FPM and a static pressure (Ps) of 6" w.g. Therefore, the 24" x 24" unit will have a maximum air volume of no more than 11,236 CFM with an air velocity of 2,809 FPM and a static air pressure (Ps) of 6" w.g.

- For CFM of a Round Collar unit (Type C), multiply the CFM in the appropriate figure by .785.

Model Ordering Guide

Square and Rectangle Fire Damper Ordering Guide					
Model 15X	Type X	Width (Inches)	Height (Inches)	Collar Size (C Only)	Fusible Link Rating (°F)
Static --- 0	Blades In Airstream --- A	XX Specify	XX Specify	XX Specify	L1 - 165° L2 - 212°
Dynamic ---- 1	Blades out of Airstream --- B				
	High Pressure --- C				
	Slimline (1-1/2 Hours) --- E				
	Slimline (3 hours) --- F	Note: For Model 150E, please specify mounting position V (vertical) or H (horizontal).			

Round Fire Damper Ordering Guide	
Model	Diameter (inches)
US3 ---Round	XX Specify

Ceiling Radiation Damper Ordering Guide			
Model 61X	Width (Inches)	Height (Inches)	Fusible Link Rating (°F)
Square/Rectangle --- 5	XX Specify	XX Specify	165°
Round --- 6			212°

Required Information For Ordering

- Please specify dimensions of damper: Width (in.) x Height (in.).
Note: For round dampers, specify diameter. Dampers are manufactured 1/4" undersized, unless actual size is requested.
- Please select model number:
 - 151A - Dynamic Fire Damper, blades in the airstream. (1-1/2 hour fire-rated)
 - 151B - Dynamic Fire Damper, blades out of the airstream. (1-1/2 hour fire-rated)
 - 151C - Dynamic Fire Damper with round transitions. (1-1/2 hour fire-rated)
 - 150E - Static Slimline Fire Damper, blades in the airstream. (Vertical/Horizontal, 1-1/2 hour fire-rated)
 - 150F - Static Slimline Fire Damper, blades in the airstream. (Vertical 3 hour fire-rated)
 - 615 - Ceiling Radiation Damper, UL555 classification, square and rectangle.
 - 616 - Ceiling Radiation Damper, UL555 classification, round.
- Please specify temperature of the fusible link:
 - 165°F - Standard.
 - 212°F - Optional.
- Are factory-installed leaves required? Y/N, if yes, please specify length of the sleeve.
Note: Available lengths - 8", 10", 12", 14", 16", 18", 20", 24".
Standard sleeve is 12" in length and 22 gauge. As a default, fire dampers are installed centered in the sleeve. Off-center installation is available upon request.
- Are pre-cut mounting angles required? Y/N
Note: Set includes 4 individual angles per side, 8 in total.

Replacement Fusible Links	
Part No.	Applications
FL-165-JS	165°F - For use in models 150E/150F
FL-165-GS	165°F - For use in models 151A/B/C
FL-165-J14	165°F - For use in models 616, Diameter 4"-7" 165°F - For use in models 615, Height. 4"-7"
FL-165-J316	165°F - For use in models 616, Diameter: 8"+ 165°F - For use in models 615, Height: 8"+

Note: Also available in 212° F.

MODEL 150E - SLIMLINE

Curtain Type Fire Damper - UL555 Classification
Horizontal and Vertical, 1.5 Hour Rating

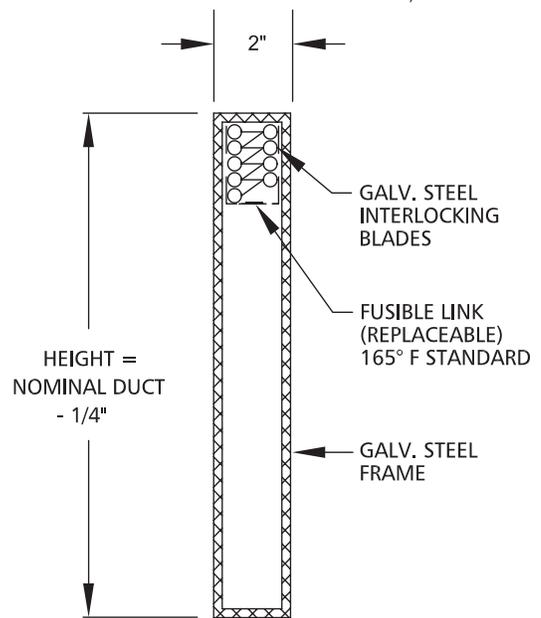

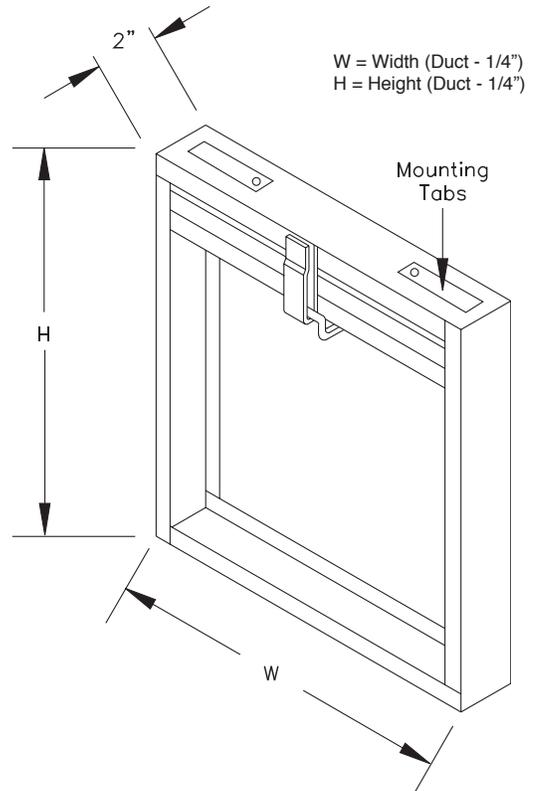

Product Information

- Slimline frame profile where narrow clearances are required.
- Meets all UL and NFPA requirements for **Primary Fire Dampers** and carries a UL555 classified fire damper label.
- **Approved for use where ducts penetrate partitions with fire resistance ratings of two hours or less.**
- Gravity operated for vertical installation.
- Closure springs and latches included for horizontal installation.
- 1.5 hour rating for use in fire barriers rated two hours or less.
- Integral mounting tabs for quick installation.
- Optional installed duct sleeves available, see page 85.

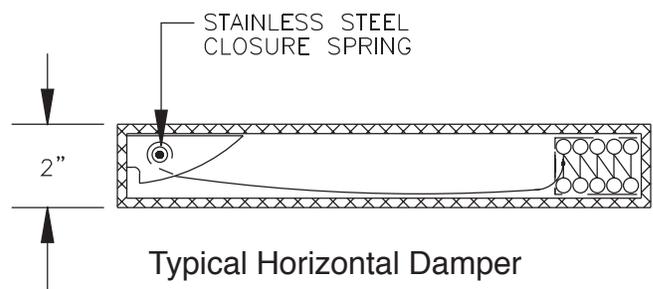

UL File No. 10250

Minimum Available Sizes (W" x H")	
Horizontal (150E)	Vertical (150E)
6" x 6"	6" x 6"

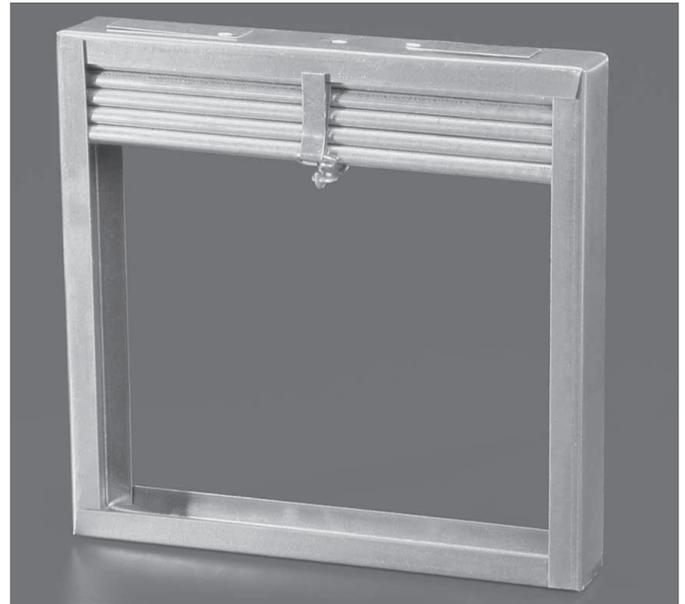

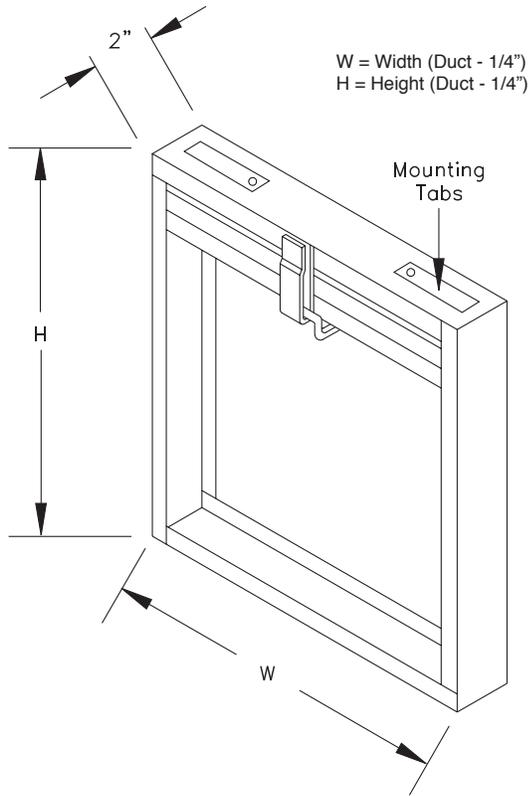

Typical Vertical Damper

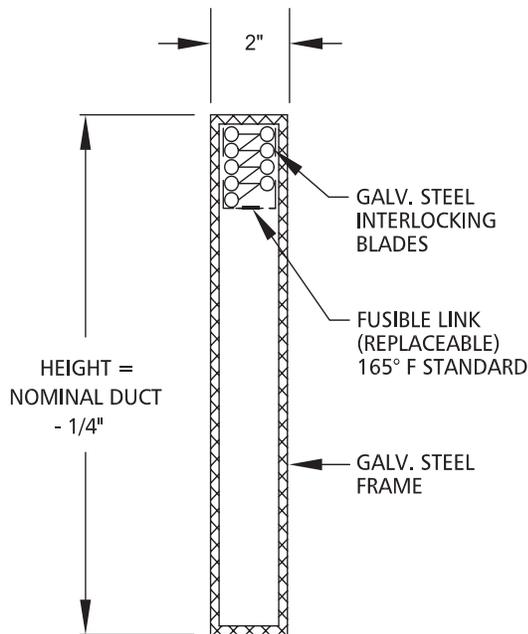

Typical Horizontal Damper

MODEL 150F - SLIMLINE
Curtain Type Fire Damper - UL555 Classification
Vertical, 3 Hour Rating

Product Information

- Slimline frame profile where narrow clearances are required.
- Meets all UL and NFPA requirements for **Primary Fire Dampers** and carries a UL555 classified fire damper label.
- **Approved for use where ducts penetrate partitions with fire resistance ratings of two hours or less.**
- Gravity operated for vertical installation.
- 3 hour rating or use in fire barriers rated four hours or less.
- Integral mounting tabs for quick installation.
- Optional installed duct sleeves available, see page 85.

Typical Vertical Damper

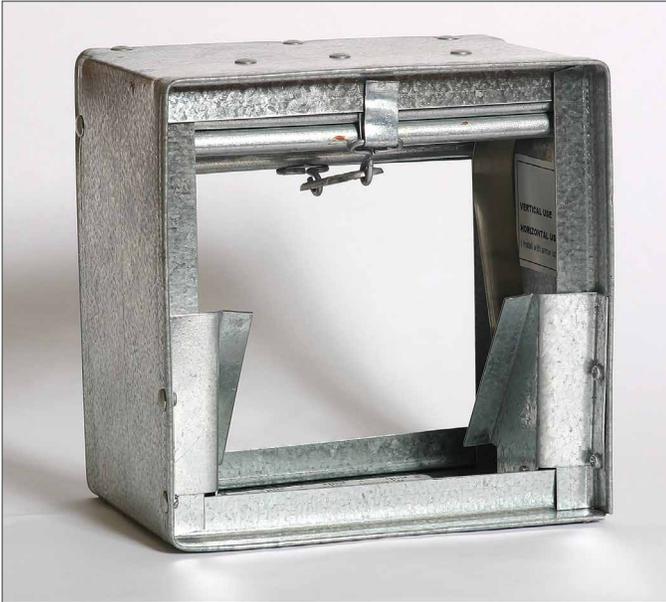

UL File No. 10250

Minimum Available Sizes (W" x H")
Vertical (150F)
6" x 6"

MODEL 151A

Curtain Type Fire Damper - UL555 Classification
Horizontal and Vertical, 1.5 Hour Rating

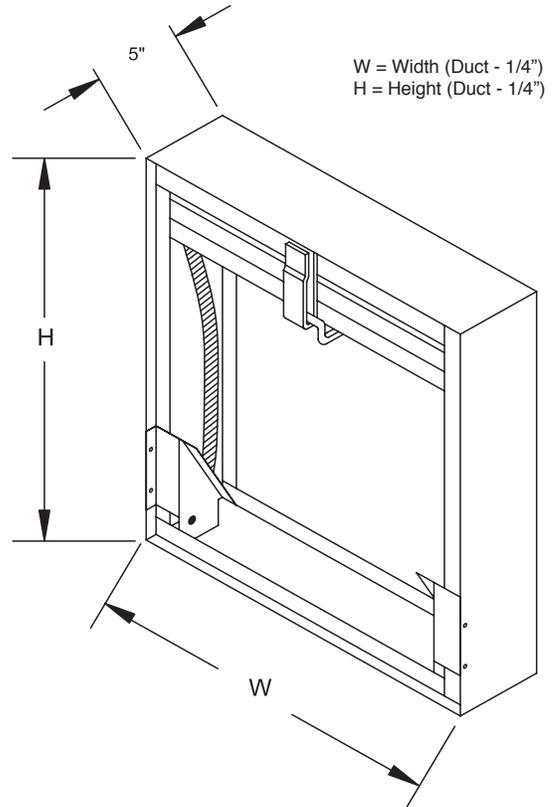

Product Information

- Designed with constant force springs in the horizontal configurations to ensure closure under airflow conditions.
- Meets all UL and NFPA requirements for **Primary Fire Dampers**, and carries a UL555 classified fire damper label.
- **Approved for use where ducts penetrate partitions with fire resistance ratings of two hours or less.**
- 1.5 hour rating for use in fire barriers rated two hours or less.
- Optional installed duct sleeves available, see page 85.

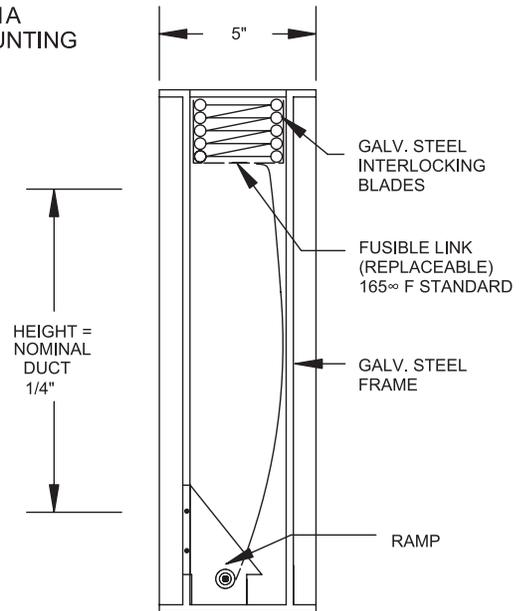

UL File No. 10250

MODEL 151A
VERTICAL MOUNTING

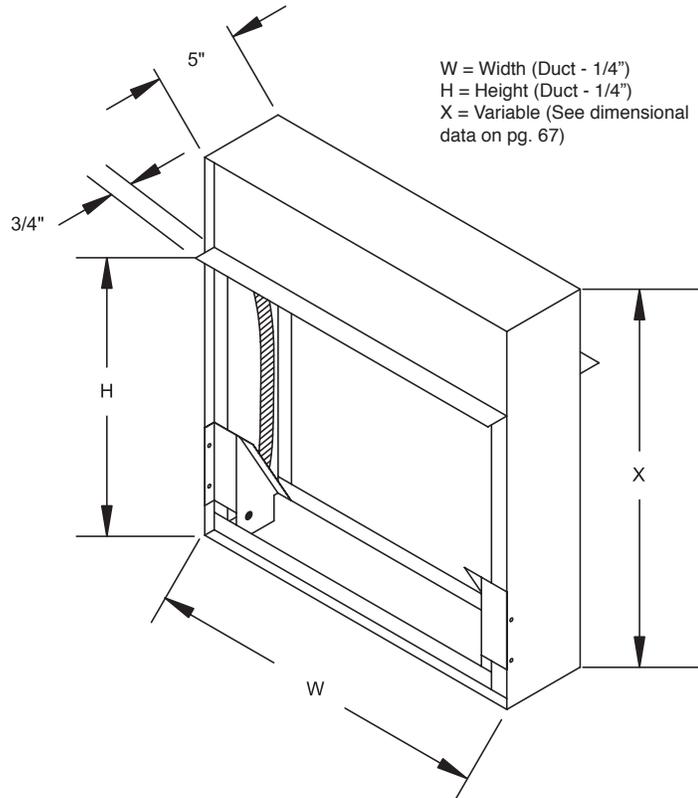

MODEL 151A
HORIZONTAL MOUNTING

MODEL 151B

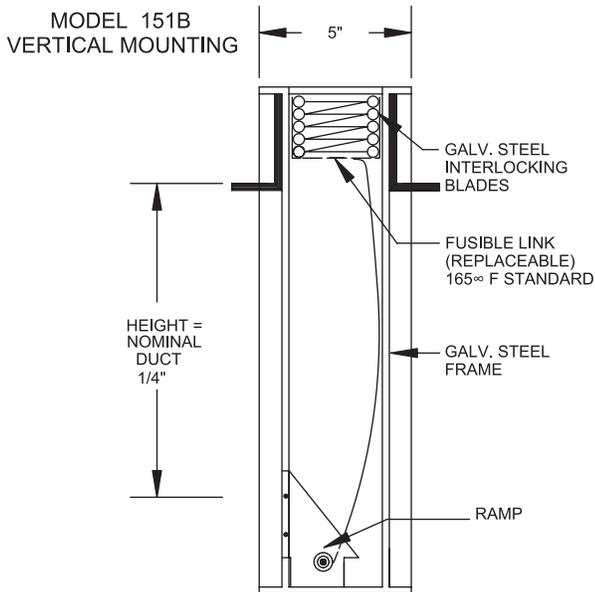

Curtain Type Fire Damper - UL555 Classification

Horizontal and Vertical, 1.5 Hour Rating

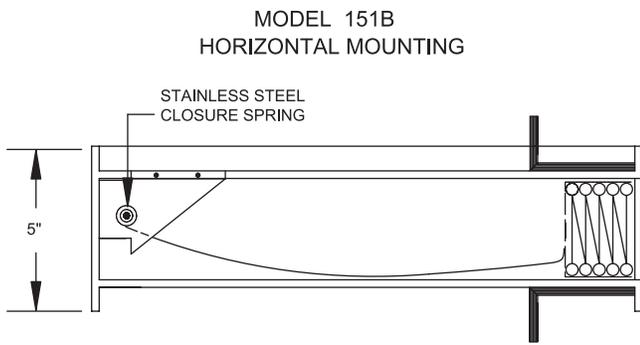

Product Information

- Designed with constant force springs in the horizontal configurations to ensure closure under airflow conditions.
- Meets all UL and NFPA requirements for **Primary Fire Dampers**, and carries a UL555 classified fire damper label.
- **Approved for use where ducts penetrate partitions with fire resistance ratings of two hours or less.**
- 1.5 hour rating for use in fire barriers rated two hours or less.
- Optional installed duct sleeves available, see page 85.

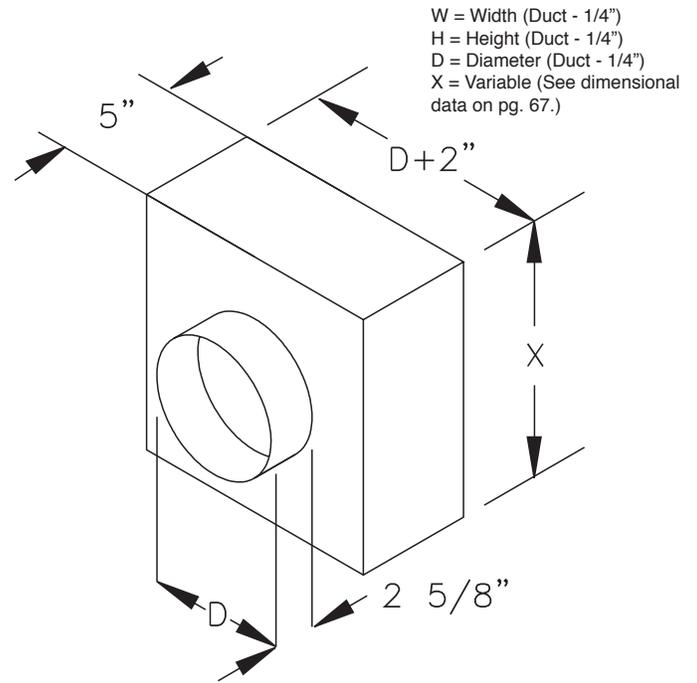

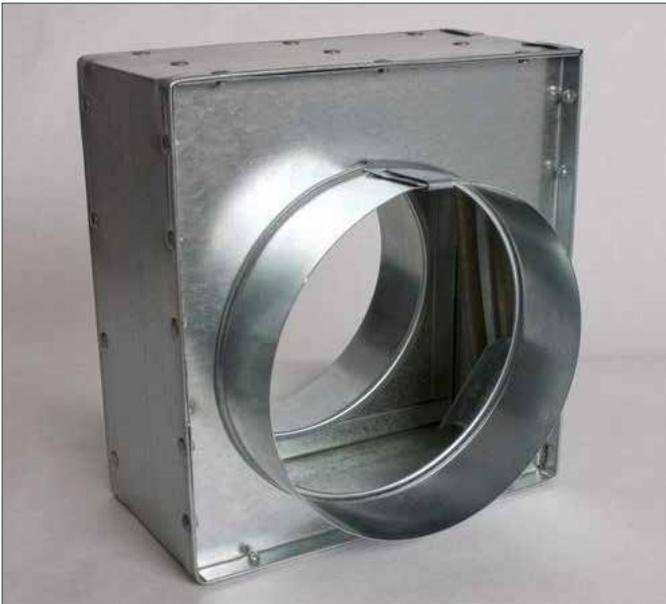

UL File No. 10250

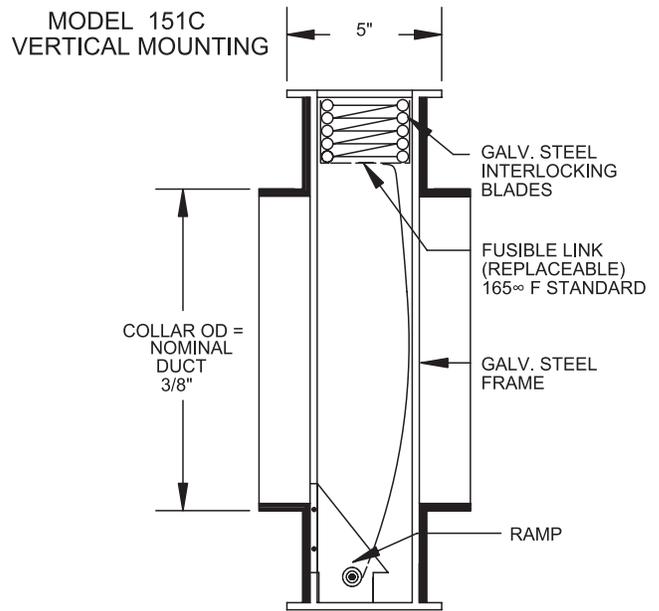

Minimum Available Sizes (W" x H")	
Horizontal (151B)	Vertical (151B)
6" x 6"	6" x 6"

MODEL 151C - High Pressure Series
 Curtain Type Fire Damper - UL555 Classification
 Horizontal and Vertical, 1.5 Hour Rating

Product Information

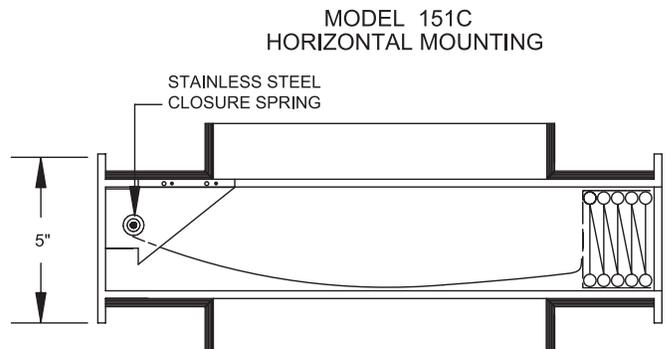

- Designed with constant force springs in the horizontal configurations to ensure closure under airflow conditions.
- Meets all UL and NFPA requirements for **Primary Fire Dampers**, and carries a UL555 classified fire damper label.
- **Approved for use where ducts penetrate partitions with fire resistance ratings of two hours or less.**
- 1.5 hour rating for use in fire barriers rated two hours or less.
- Transition collars in round configurations for simple duct attachment.
- Units also available with collar on one side only.
- Optional installed duct sleeves available, see page 85.

UL File No. 10250

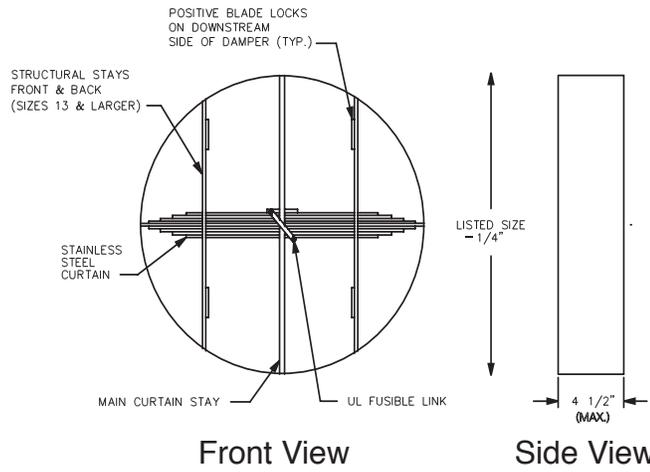

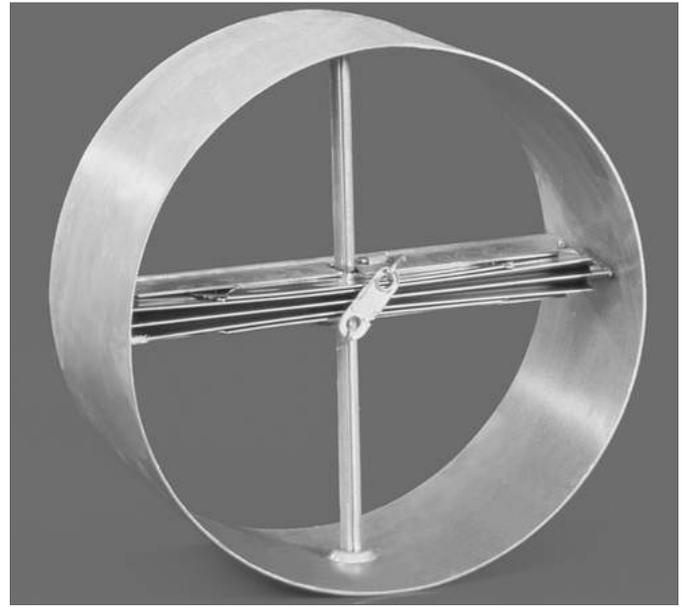

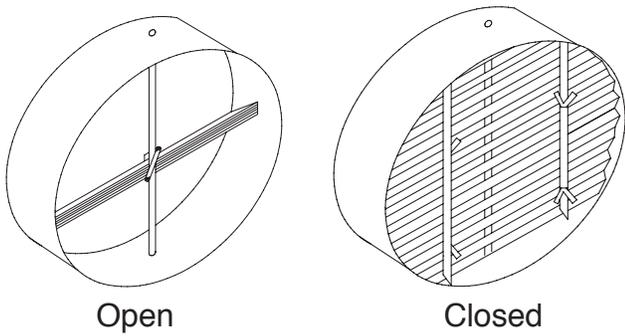

Minimum Available Sizes (W" x H")	
Horizontal (151C)	Vertical (151C)
4" (diameter)	4" (diameter)

MODEL US-3

Curtain Type Fire Damper - UL555 Classification
Horizontal and Vertical, 1.5 Hour Rating

Product Information

- Designed with constant force stainless steel curtain in both vertical and horizontal configurations to ensure closure under airflow conditions. Can also be used in static system applications.
- Meets all UL and NFPA requirements for **Primary Fire Dampers**, and carries a UL555 classified fire damper label.
- **Approved for use where ducts penetrate partitions with fire resistance ratings of two hours or less.**
- 1.5 hour rating for use in fire barriers rated two hours or less.

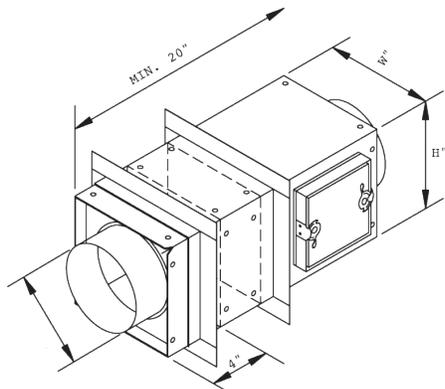

Available Sizes (Diameter Inches)	
Minimum	Maximum
4"	12"

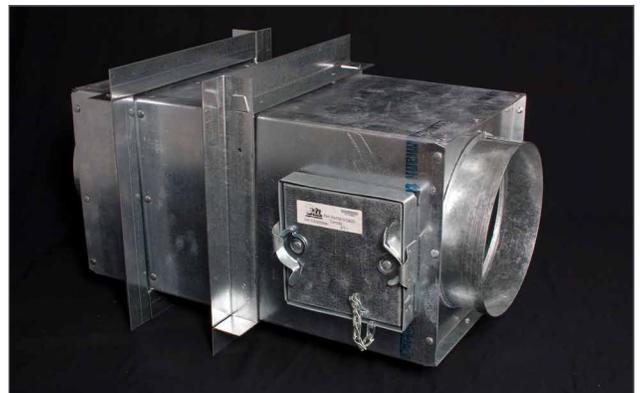

Size Availability: 4" to 12" diameter in one inch increments.

Product Information

- Dynamic fire rated damper (Model 151A or 151B).
- Minimum sleeve length 20".
- Square cam-lock access door included.
- Standard 4" offset from the edge of the sleeve to the fire damper frame.
- Picture frame mounting angles included.

BIRDCAGE FIRE DAMPER ASSEMBLY

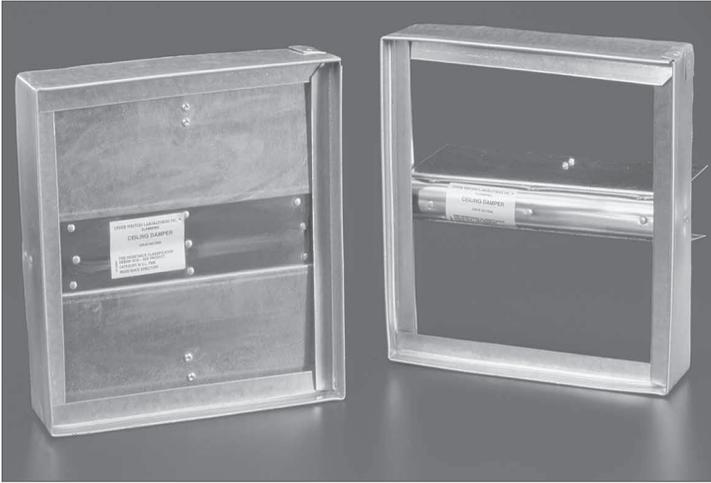

Available Sizes
Visit miamitech.com for a full list of available sizes.

MODEL 615

Ceiling Radiation Damper - UL555 Classification
Square and Rectangular

Product Construction

- **Frame:** Minimum 22 gauge galvanized steel.
- **Blades:** Minimum 22 gauge galvanized steel.
- **Springs:** Tempered stainless steel.
- **Fusible Link:** UL Listed 165° Standard or 212° Optional.
- **Thermal Barrier:** Non-asbestos ceramic blanket.

Product Information

- UL fire-rated floor/ceiling assemblies and roof/ceiling assemblies require specially tested and classified ceiling dampers (also called Ceiling Fire Dampers or Heat Radiation Dampers) to provide proper protection where HVAC components penetrate the ceiling membrane. Standard primary fire dampers (1.5 hour and 3 hour) **do not** provide the necessary fire and heat protection.
- UL classified Model 615 ceiling damper may be substituted for each 113 square inch or larger steel duct outlet protected with a hinged sheet metal damper in any floor or roof/ceiling design with a restrained or unrestrained assembly rating of 3 hours or less.
- Thermal barrier supplied on units larger than 70 square inches. Smaller sizes do not require thermal barrier on blades.

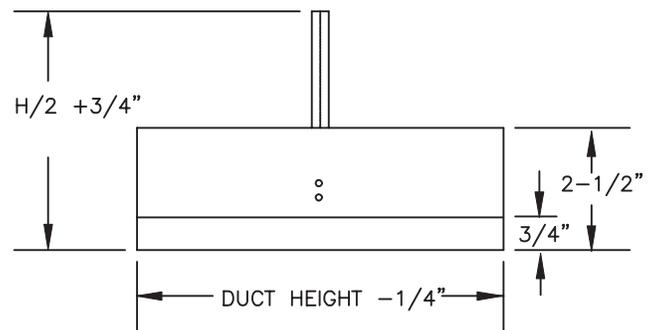

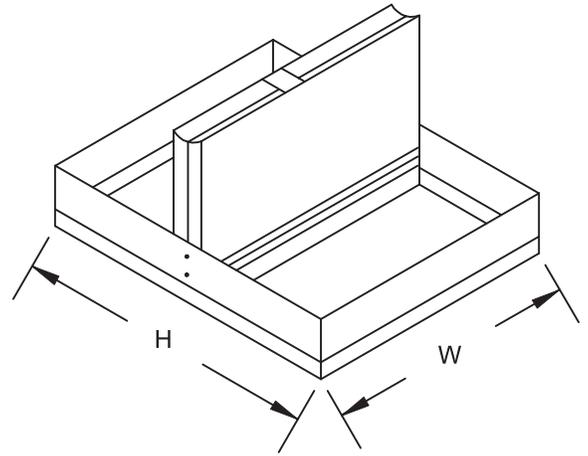

UL File No. 10967

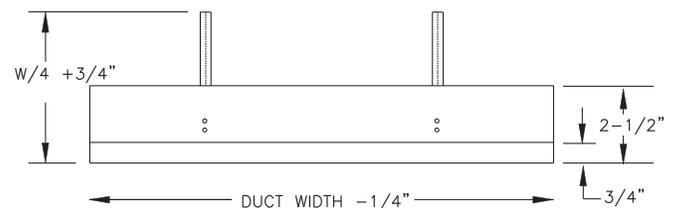

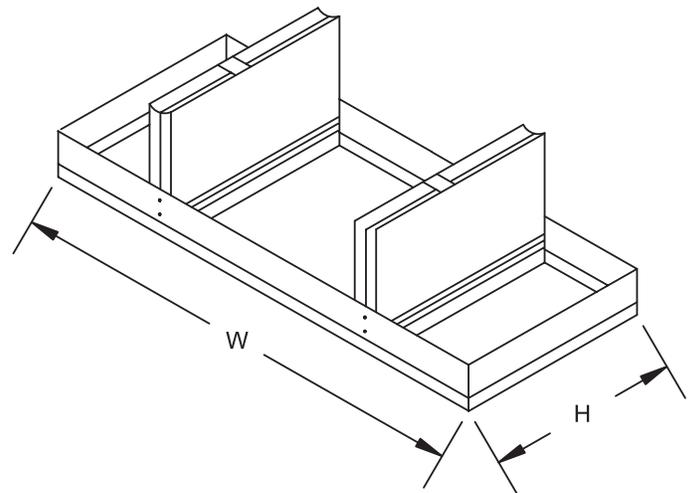

Available Sizes (W" x H")			
Single Butterfly		Double Butterfly	
Minimum	Maximum	Minimum	Maximum
6" x 4"	18" x 18"	20" x 20"	24" x 24"

All fire dampers are available in 1/4" increments.

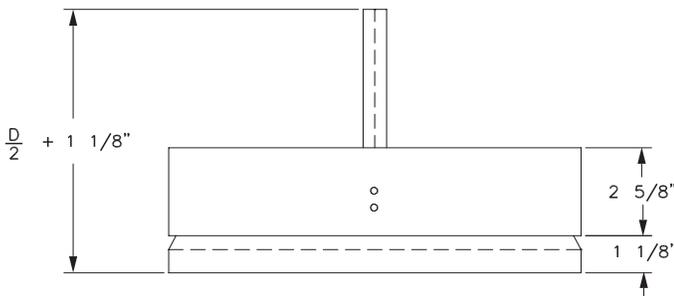

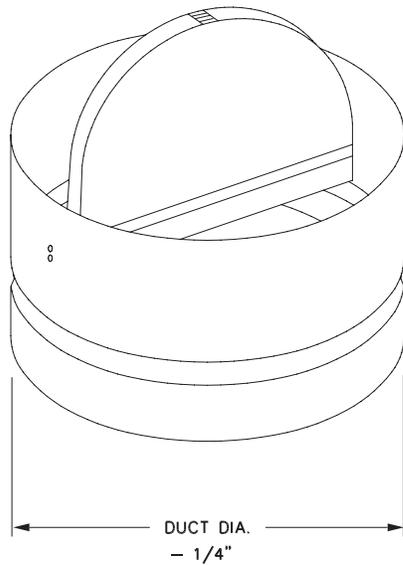

Single Butterfly

Double Butterfly

MODEL 616 Ceiling Radiation Damper - UL555 Classification Round

UL File No. 10967

Available Sizes (Diameter Inches)	
Minimum	Maximum
4"	24"

Product Construction

- **Frame:** Minimum 22 gauge galvanized steel.
- **Blades:** Minimum 22 gauge galvanized steel.
- **Springs:** Tempered stainless steel.
- **Fusible Link:** UL Listed 165° Standard or 212° Optional.
- **Thermal Barrier:** Non-asbestos ceramic blanket.

Product Information

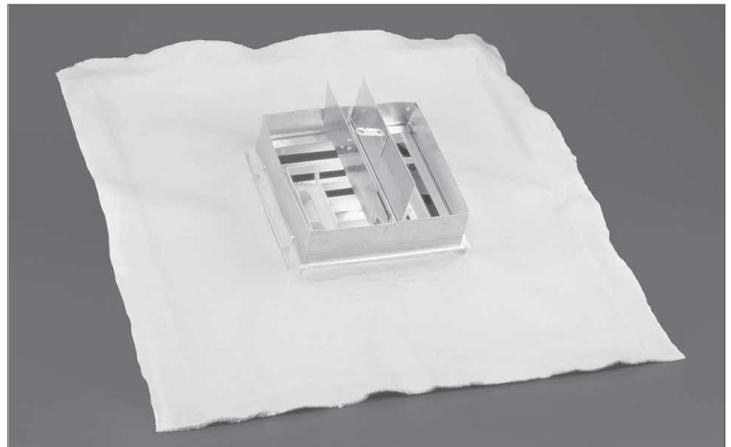

- UL fire-rated floor/ceiling assemblies and roof/ceiling assemblies require specially tested and classified ceiling dampers (also called Ceiling Fire Dampers or Heat Radiation Dampers) to provide proper protection where HVAC components penetrate the ceiling membrane. Standard primary fire dampers (1.5 hour and 3 hour) **do not** provide the necessary fire and heat protection.
- UL classified Model 616 ceiling damper may be substituted for each 113 square inch or larger steel duct outlet protected with a hinged sheet metal damper in any floor or roof/ceiling design with a restrained or unrestrained assembly rating of 3 hours or less.
- Thermal barrier supplied on units larger than 70 square inches. Smaller sizes do not require thermal barrier on blades.

MODEL FCB Fire Ceramic Blanket

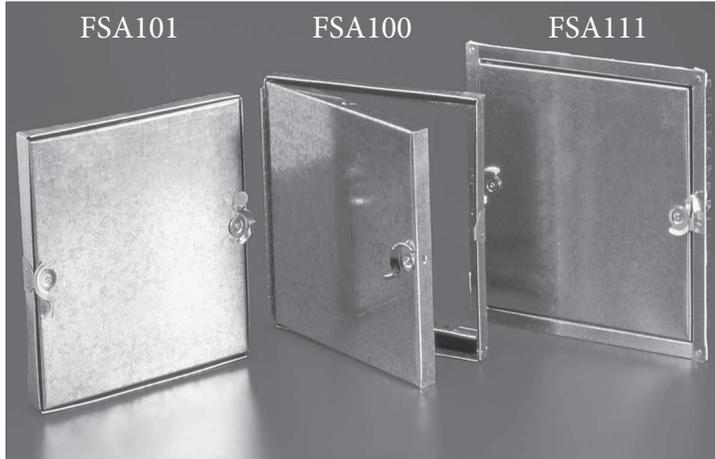

Product Information

Lay-in diffusers or grilles supporting ceiling dampers must include a thermal blanket for adequate protection. The Miami Tech thermal blanket is constructed of the following:

- 1/4" thick KAOWOOL® ceramic fiber.
- 8lbs./ft³ density
- Designed with field cut center for any diffuser or grille neck size.
- Also available in 1/2".

MODEL FSA100 and FSA101 Access Door for Metal Duct

Product Construction

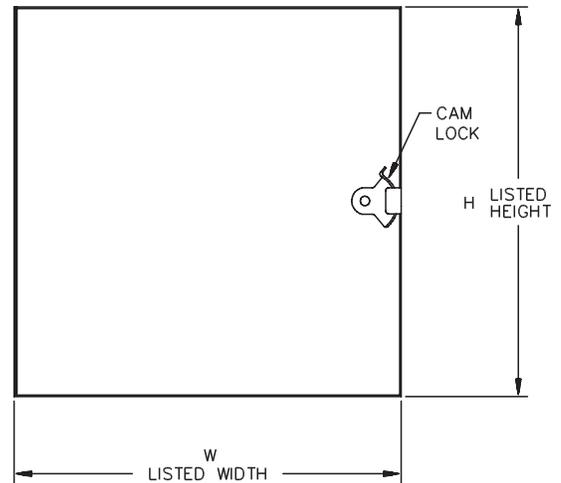

- **Frame:** 24 gauge galvanized steel roll formed with pre-notched “knock over” edges for easy installation.
- **Door:** 24 gauge edge riveted galvanized steel front and back face containing 1” UL classified insulation.
- **Hinge:** Pivot type hinge top and bottom for rigidity.
- **Closure:** All cam locks are zinc plated steel.
- **Opening:** Duct cutout is 1” less than listed size.

Product Information

- Miami Tech Model FSA100 and FSA101 access doors are designed for quick installation in metal duct. They provide direct access to fire dampers for resetting, as well as any item requiring maintenance or inspection.
- All FSA 101 access doors are built with safety chain to secure door frame.

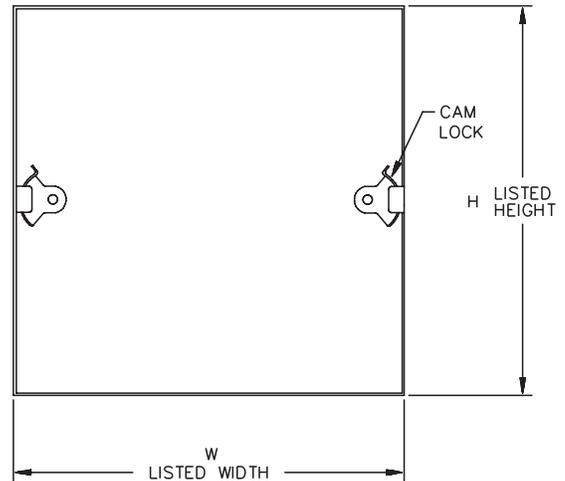

Available Sizes (H” x W”)	
Minimum	Maximum
6” x 6”	24” x 24”
Size	Box Quantity
6” x 6”	10
8” x 8”	10
10” x 10”	10
12” x 12”	10
14” x 14”	5
16” x 16”	5
18” x 18”	5
20” x 20”	5
22” x 22”	5
24” x 24”	5

Model FSA100 Hinged Access Door for Metal Duct

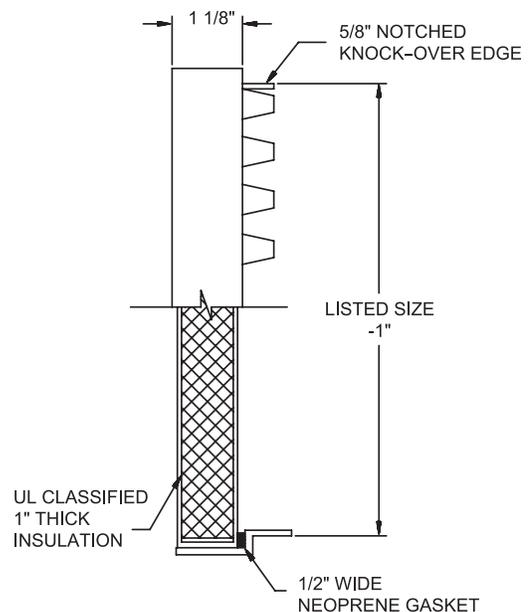

Hinged doors larger than 14” x 14” have a minimum of two cam locks.

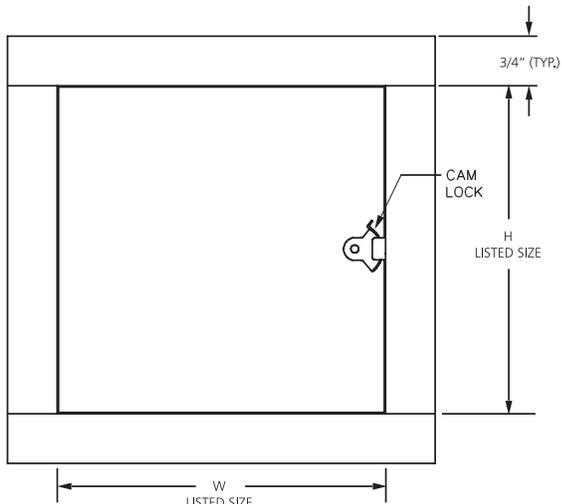

Model FSA101 All Cam Lock Access Door for Metal Duct

Cam lock doors larger than 14” x 14” have a minimum of two cam locks.

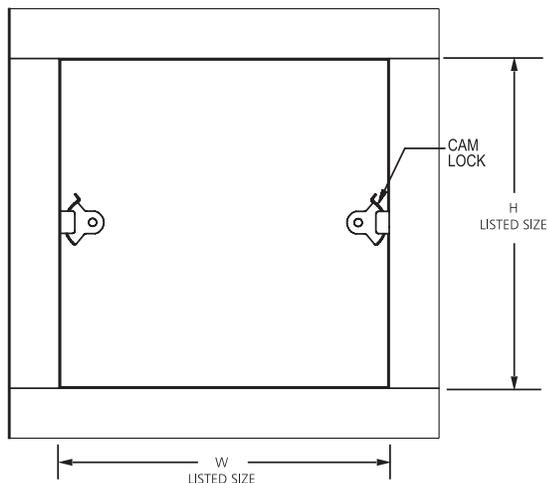

Model FSA110 Hinged Access Door for Fiberglass Duct

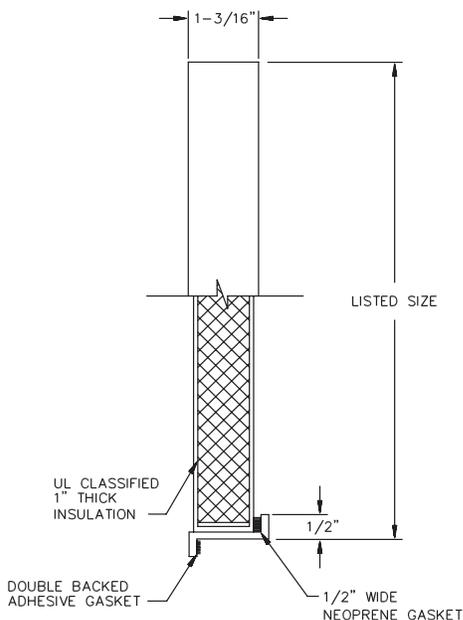

Hinged doors larger than 14" x 14" have a minimum of two cam locks.

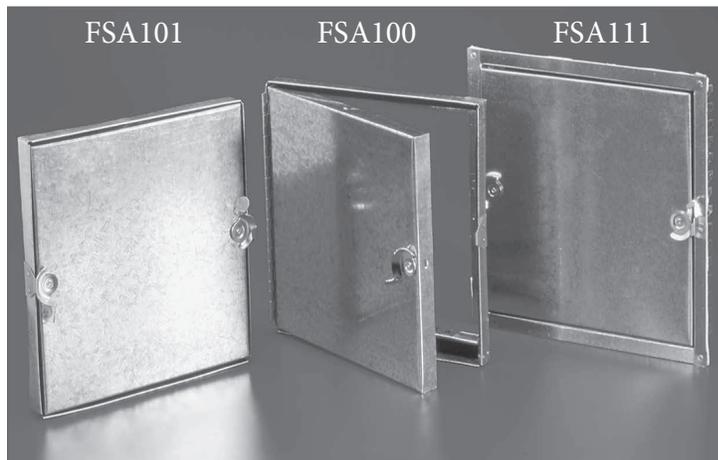

Model FSA111 All Cam Lock Access Door for Fiberglass Duct

Cam lock doors larger than 14" x 14" have a minimum of two cam locks.

MODEL FSA110 and FSA111 Access Doors for Fiberglass Duct

Product Construction

- **Frame:** 24 gauge galvanized steel roll formed with 1/8" x 1" double backed adhesive on inside of flange.
- **Door:** 24 gauge edge riveted galvanized steel front and back face containing 1" UL classified insulation.
- **Hinge:** Pivot type hinge top and bottom for rigidity.
- **Closure:** All cam locks are zinc plated steel.
- **Opening:** Duct cutout is 1" less than listed size.

Product Information

- Miami Tech Model FSA110 and FSA111 access doors are designed for quick installation in fiberglass duct. They provide direct access to fire dampers for resetting, as well as any item requiring maintenance or inspection.
- All FSA 111 access doors are built with safety chain to secure door frame.

Available Sizes (H" x W")	
Minimum	Maximum
6" x 6"	24" x 24"
Size	Box Quantity
6" x 6"	10
8" x 8"	10
10" x 10"	10
12" x 12"	10
14" x 14"	5
16" x 16"	5
18" x 18"	5
20" x 20"	5
22" x 22"	5
24" x 24"	5

MODEL FSA115 and FSA116 Access Door for Metal or Fiberglass Duct

Product Construction

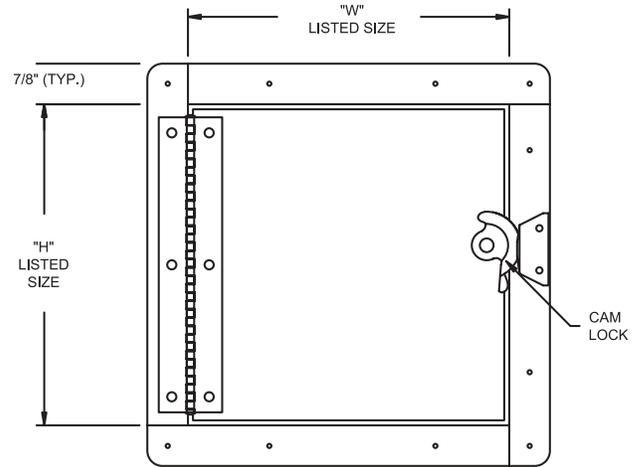

- **Door Frame:** 24 gauge galvanized steel roll formed.
- **Door:** 24 gauge edge riveted galvanized steel front and back face containing 1" UL classified insulation.
- **Hinge:** Pivot type hinge top and bottom for rigidity.
- **Closure:** All cam locks are zinc plated steel.
- **Opening:** Duct cutout is 1" less than listed size.
- **Sleeve Frame:** 24 gauge galvanized steel roll formed with pre-notched "knock over edges for easy installation.

Product Information

- Miami Tech Model FSA115 and FSA116 access doors are designed for quick installation in metal duct. They provide direct access to fire dampers for resetting, as well as any item requiring maintenance or inspection.
- All FSA 116 access doors are built with safety chain to secure door frame.
- Custom sizes available.

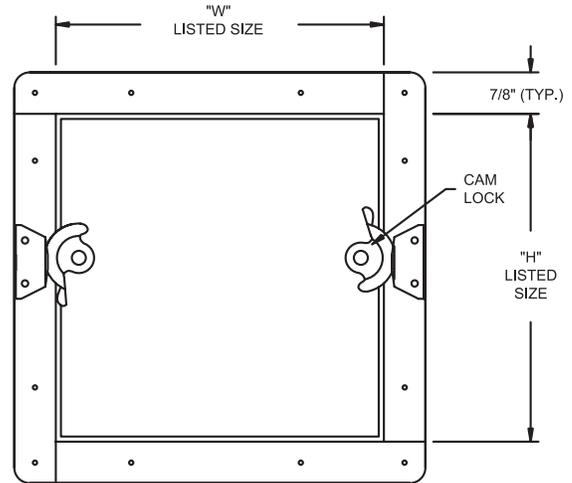

Available Sizes (H" x W")	
Minimum	Maximum
6" x 6"	24" x 24"
Size	Box Quantity
6" x 6"	10
8" x 8"	10
10" x 10"	10
12" x 12"	10
14" x 14"	5
16" x 16"	5
18" x 18"	5
20" x 20"	5
22" x 22"	5
24" x 24"	5

Model FSA115 All Hinged Access Door for Metal or Fiberglass Duct

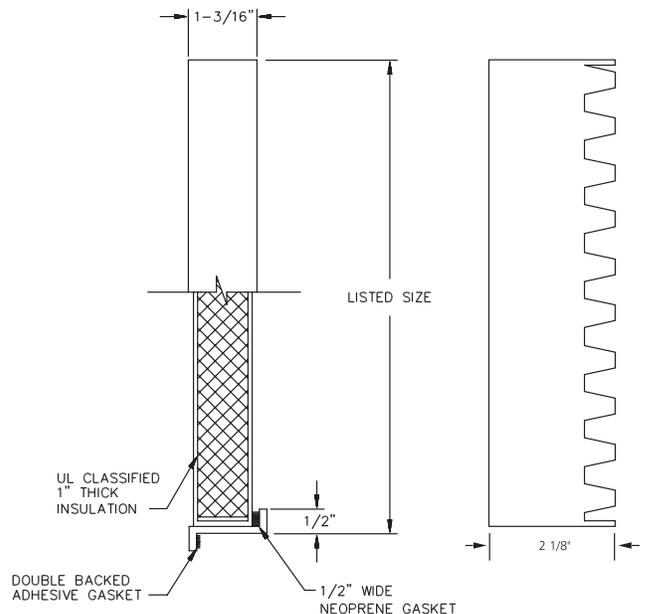

Hinged doors larger than 14" x 14" have a minimum of two cam locks.

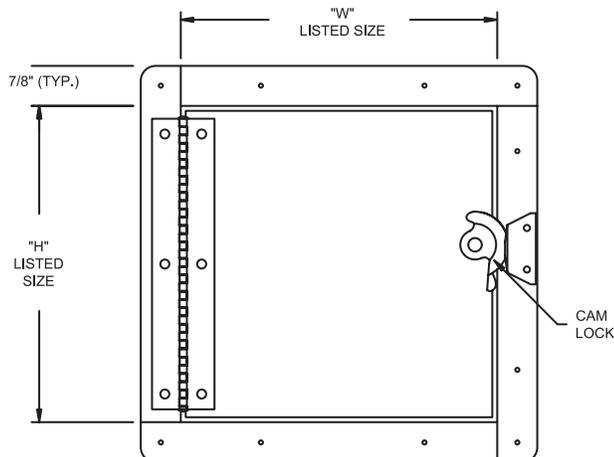

Model FSA116 All Cam Lock Access Door for Metal or Fiberglass Duct

Cam lock doors larger than 14" x 14" have a minimum of two cam locks.

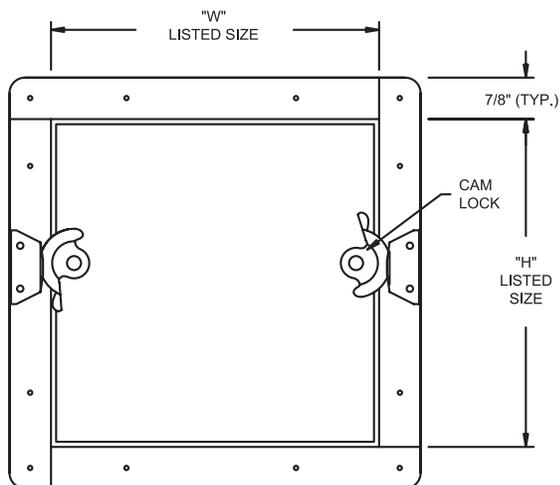

Model FSA125SM Hinged Access Door for Metal or Fiberglass Duct

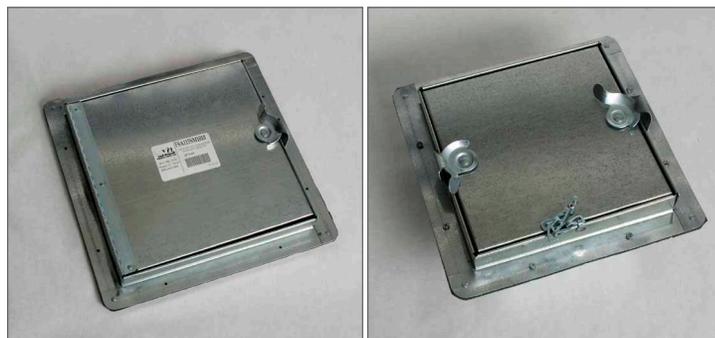

Hinged doors larger than 14" x 14" have a minimum of two cam locks.

Model FSA126SM All Cam Lock Access Door for Metal or Fiberglass Duct

Cam lock doors larger than 14" x 14" have a minimum of two cam locks.

MODEL FSA125SM and FSA126SM Access Doors for Metal or Fiberglass Duct (Surface Mount)

Product Construction

- **Frame:** 24 gauge galvanized steel roll formed with 1/6" x 1" double backed adhesive on inside of flange.
- **Door:** 24 gauge edge riveted galvanized steel front and back face containing 1" UL classified insulation.
- **Hinge:** Pivot type hinge top and bottom for rigidity.
- **Closure:** All cam locks are zinc plated steel.
- **Opening:** Duct cutout is 1" less than listed size.

Product Information

- Miami Tech Model FSA125 and FSA126 access doors are designed for quick installation in fiberglass duct. They provide direct access to fire dampers for resetting, as well as any item requiring maintenance or inspection.
- All FSA 126 access doors are built with safety chain to secure door frame.

Available Sizes (H" x W")	
Minimum	Maximum
6" x 6"	24" x 24"

Product Information

- 24 gauge galvanized steel roll formed with pre-notched "knock-over" edges for easy installation.
- Optional accessory kit for fiberglass duct installation.
- Sold separately.

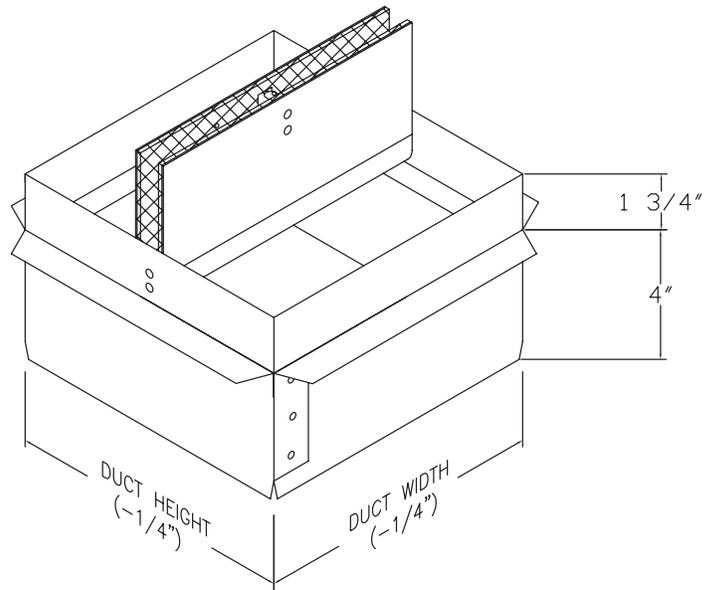

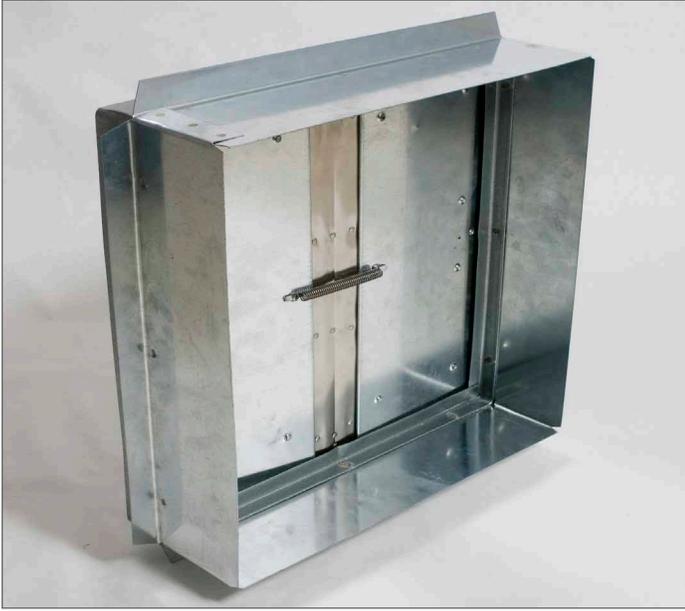

Available Sizes (H" x W")	
Minimum	Maximum
6" x 6"	24" x 24"

MODEL FSASMF Surface Mount Crown Frame

MODEL CRPD

Ceiling Radiation Plenum Damper Box

Product Construction

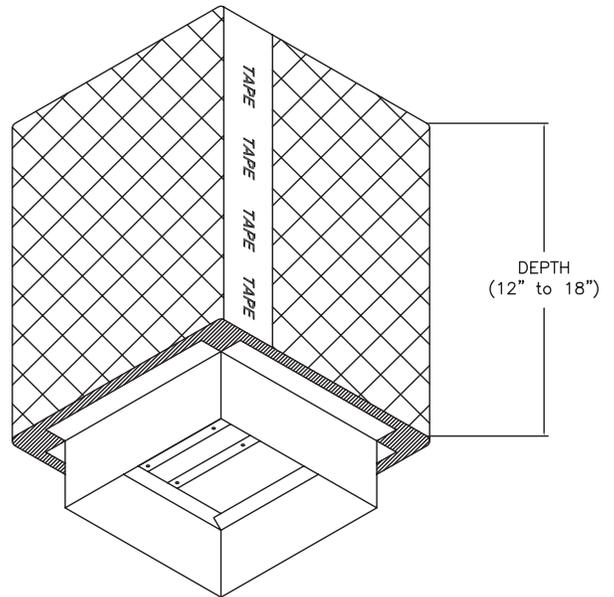

- **Body:** 22 gauge galvanized steel construction.
- **Fusible Link:** UL-listed fusible (165°F Standard)

Product Information

- UL classified.
- Designed to function as a heat barrier in air handler openings in fire resistant membrane ceilings.
- UL approved for use in design types: L-528, L-546, L-558, L-562, L-563, L-585, M-516, P-533, P-544, and P-547 (similar design applications*: L-521, L-550, L-586, and P-522).
- Available with R-6 or R-8 ductboard plenum installed with depths 12" through 18".
- 1" perimeter flange provided for boot clip or angle installation.
- Insulation available in R-6 or R-8.
- Special sizes available upon request.

UL File No. 10967

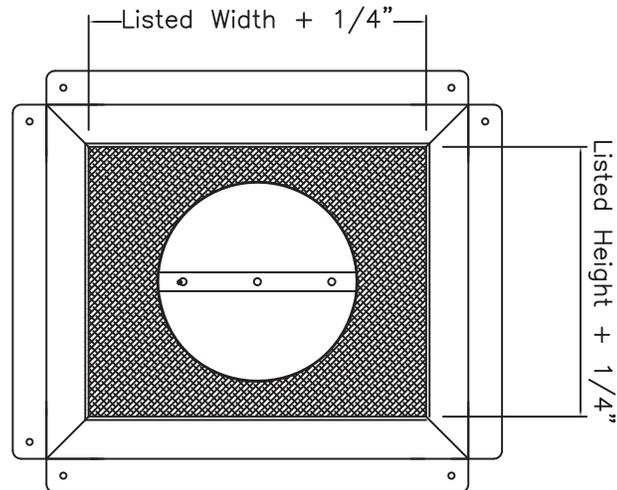

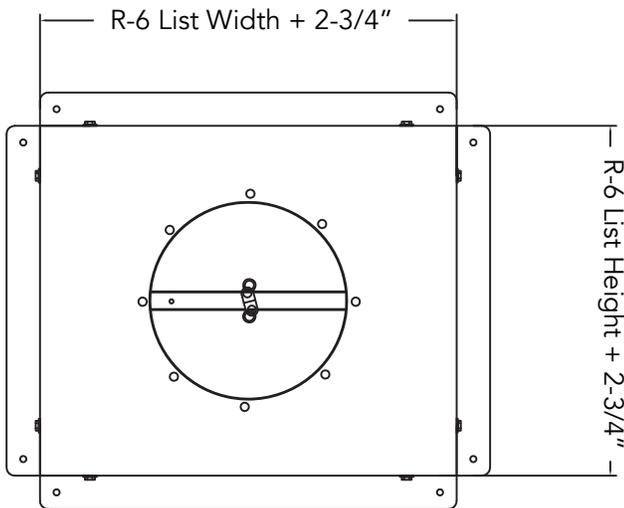

*Optional ductboard plenum shown (PB)

Available Sizes (W" x H")	
Minimum	Maximum
6" x 6"	16" x 16"

*Similar design applications have not been evaluated and are not UL Classified for use with the associated Miami Tech products.

MODEL CRD Ceiling Radiation Damper Box

Ceiling Radiation Damper Construction

- **Body:** Roll-formed round 22 gauge galvanized steel frame.
- **Blades:** 22 gauge galvanized steel.
- **Fusible Link:** UL-listed fusible (165°F Standard).

Register Box

- **Outer Box:** 30 gauge galvanized steel.
- **Collar:** Roll-formed 28 gauge galvanized steel with roll-formed 1/4" bead.
- **Insulation:** Fiberglass diffuser-board 1-1/2" thick.

Product Information

- UL classified.
- Body case is fabricated from hot dipped G60 galvanized steel sheets as per ASTM A-653.
- UL approved for use in design types: L-528, L-546, L-558, L-562, L-563, L-585, M-516, P-533, P-544, and P-547 (similar design applications*: L-521, L-550, L-586, and P-522).
- Box design includes 1/2" drywall lip.
- Overall assembly height is 7.75"
- Dual bead box design for added strength.
- No assembly required, ready to mount.
- Insulation available in R-6 or R-8.
- Plaster ground extension available in 1", 1-1/2", and 2".
- Special sizes available upon request.

UL File No. 10967

Minimum	Maximum	Outlet Size	Box Height
4" x 4"	16" x 16"	4"-12"	4.5"

*Similar design applications have not been evaluated and are not UL Classified for use with the associated Miami Tech products.

MODEL CRDS

Ceiling Radiation Damper Box

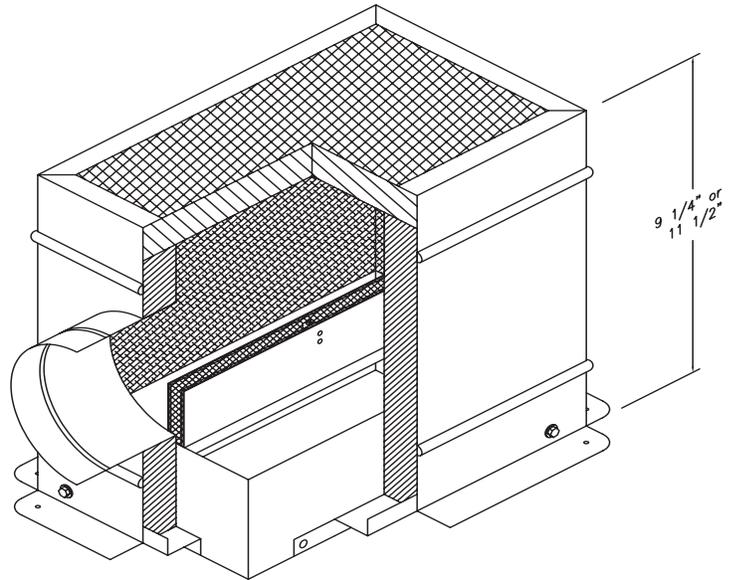

Product Construction

- **Fusible Link:** UL-listed fusible (165°F Standard)

Product Information

- UL classified.
- Designed to function as a heat barrier in air handler openings in fire resistant membrane ceilings.
- UL approved for use in design types: L-528, L-546, L-558, L-562, L-563, L-585, M-516, P-533, P-544, and P-547 (similar design applications*: L-521, L-550, L-586, and P-522).
- 1" perimeter flange provided for boot clip or angle installation.
- Opening 1/4" oversized to accommodate register/grille.
- Approved for use with steel and aluminum registers/grilles.
- Body case is fabricated from hot dipped G60 galvanized steel sheets as per ASTM A-653.
- No assembly required, ready to mount.
- Insulation available in R-6 or R-8.
- Available collar diameters 4"-12".
- Box depth is 11-1/2" for collars over 8". All others are 9-1/4".
- Damper surface depth is minimum 3" from drywall lip.
- Plaster ground extension available in 1", 1-1/2", and 2".
- Special sizes available upon request.

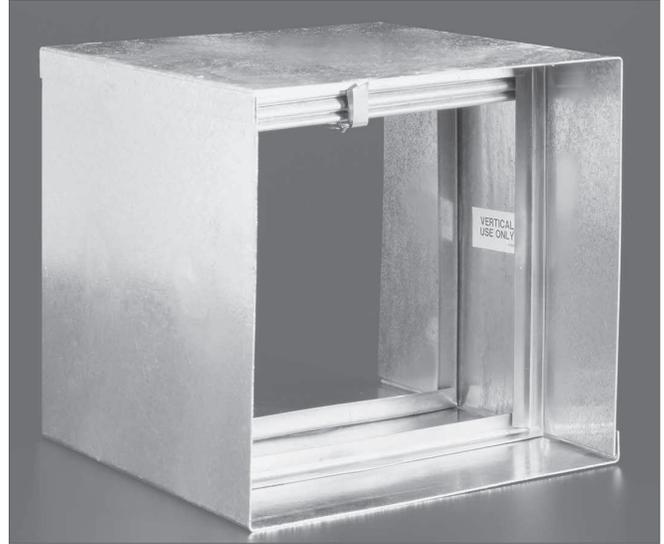

UL File No. 10967

Available Sizes (W" x H")	
Minimum	Maximum
6" x 4"	16" x 16"

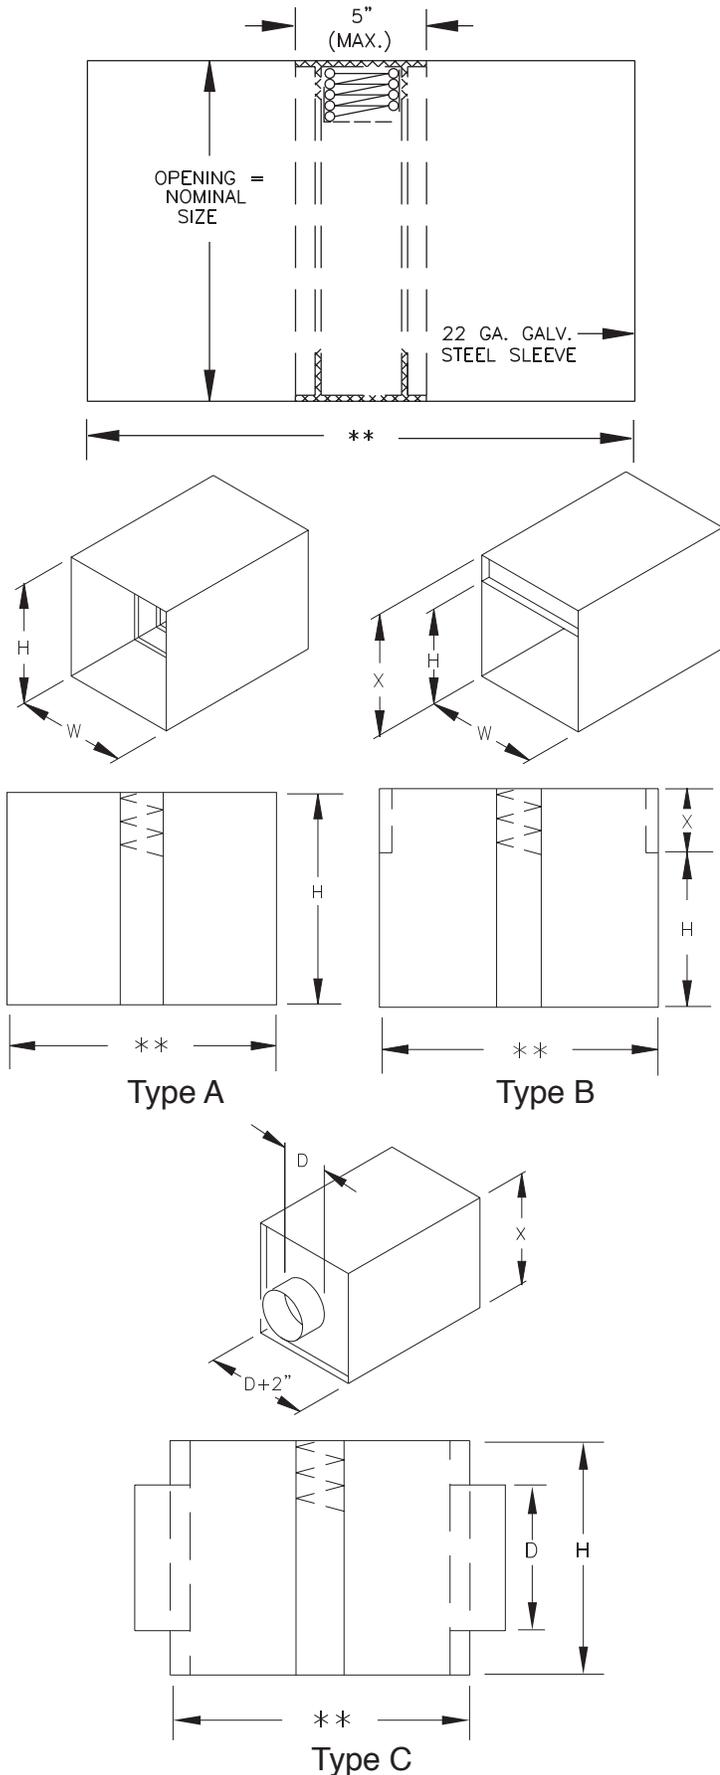

*Similar design applications have not been evaluated and are not UL Classified for use with the associated Miami Tech products.

Fixed Fire Damper Sleeve Optional Accessory

Product Information

- Standard 22 gauge galvanized steel sleeves for use with Type A, B, C, E, and F curtain fire dampers.
- Assembled at the factory, each fire damper sleeve ensures appropriate UL approved installation.
- Available for both static and dynamic system applied fire dampers.
- Assembly meets all UL and NFPA requirements for Primary Fire Dampers and carries a UL555 classified fire damper label. Approved for use where ducts penetrate partitions with fire resistance ratings of two hours or less.
- Dampers are mounted in the center of the sleeve as standard. Optional off-center mounting locations are also available.

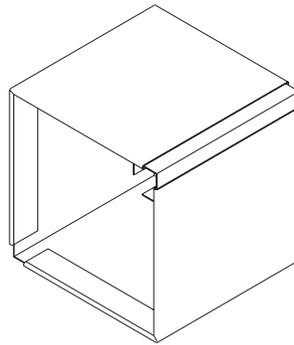

W = Width (Duct), H = Height (Duct), D = Duct Diameter - 1/4"
 X = Variable (see Dimensional Data on page 67). Available in 8", 12", 14", 16", 18", 20" and 24" lengths.

Adjustable Fire Damper Sleeve Optional Accessory

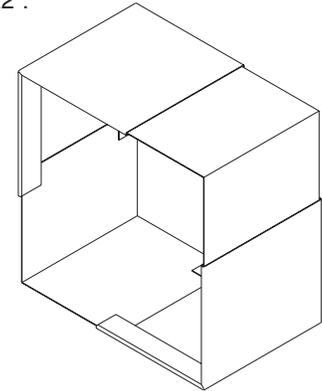

Product Information

- Adjustable sleeves for all 150 series fire dampers allowing stocking of one sleeve to accommodate a multitude of damper sizes.
- Standard configurations use 22 gauge galvanized steel in 12" lengths. Custom sizes and gauges are also available.
- Available in four base sizes:
- Model 8 can accommodate square or rectangular dampers from 8" x 8" through 12" x 12".
- Model 12 can accommodate square or rectangular dampers from 12" x 12" through 16" x 16".
- Model 16 can accommodate square or rectangular dampers from 16" x 16" through 18" x 18".
- Model 16 can accommodate square or rectangular dampers from 18" x 18" through 22" x 22".

Minimum Size

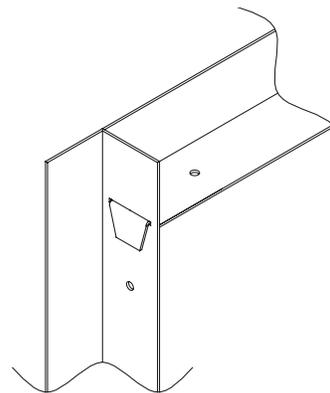

Fully Expanded

Model PFA - Picture Frame Angle Optional Accessory

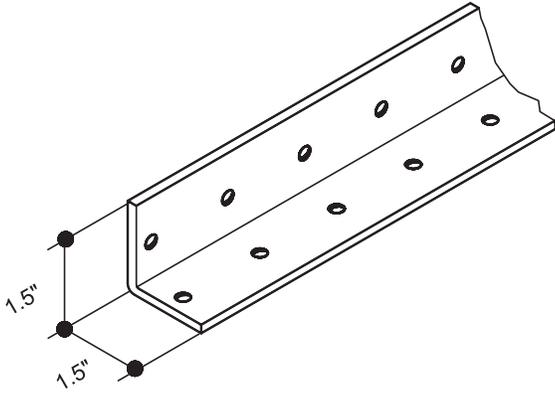

Product Information

- Retaining angles are required to ensure correct installation per UL instructions.
- All retaining angles are manufactured for each individual fire damper to ensure correct size.
- Standard angles are manufactured of 1-1/2" x 1-1/2" x 16 gauge galvanized steel.
- Angles are shipped loose with each individual damper.

RDB Mounting Angles

Models: RDBSA & RDBSA10

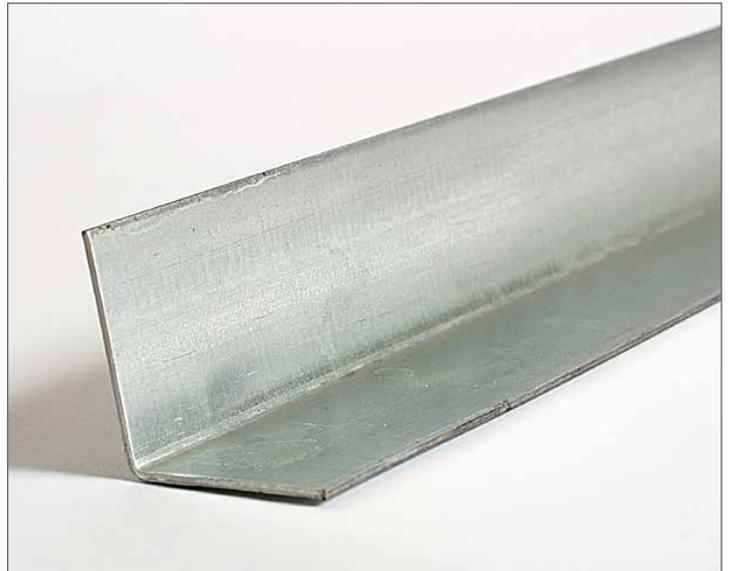

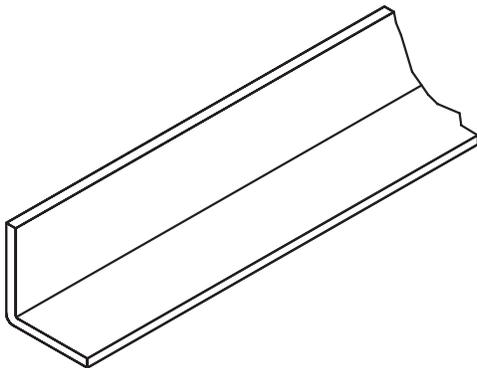

Available Sizes, (1.5" x 1.5")		
Part No.	Size	Bundle Qty.
RDBSA	26"	10 pcs
RDBSA10	10'	100 ft.

Product Information

- Custom sizes available.
- Standard 16 gauge.

Mounting Angles

Models: MA1, MA15, & MA2

Available Sizes				
Part No.	Size	Gauge	Length	Qty.
MA261-10	1" x 1"	26ga.	10'	50 ft.
MA2615-10	1.5" x 1.5"	26ga.	10'	50 ft.
MA2222-10	2" x 2"	22ga.	10'	50 ft.
MA1615-10	1.5" x 1.5"	16ga.	10'	50 ft.
MA261	1" x 1"	26ga.	26"	10 pcs

Product Information

- Available in 26" length.
- Available in 10ft length.
- Various sizes available.
- Various gauges available.
