LIGHTS CAMERA ACTION

notice what comes first?

It's impossible to create a mood, or a style, or an impression, without light. Lighting brings all things to life. While many people think mostly of its functional benefits, lighting influences just about every facet of our life. From the ability to see things clearly, to distinguish color and to appreciate the world around us, lighting is the dominant factor.

At Designers Fountain, we help you create your vision of lighting for your home, from the outdoor light that welcomes guests to your home, or provides you the warmth of security to the chandelier and sconces that add character and panache to your home. We provide you the choices that you need to truly make a house a home.

Lighting is the jewelry of the home. It sparkles, it shines, it creates moods and makes impressions. Lighting is what makes your keepsakes, your photographs, your art, your memories, all come alive within your space.

This is a guide to find your lighting inspiration. From a multitude of finish options and styles as diverse as mid century modern, rustic, industrial, new traditional to modern farmhouse, you will find the opportunity to create your personal expression. Designers Fountain offers the lighting products that you need to fit your style. Thank you for taking the time to visit our catalog.
