Houzer Porcela Porcelain Enamel Sinks

Care and maintenance

Light but frequent cleaning, usually with no more than a damp cloth, then dry with a soft cloth would be the best way to keep your sink clean and like new.

- **Daily cleaning**

Always clean after each use by thoroughly rinsing with mild soap and warm water and wipe dry. This will prevent most water spots or dirt build-ups. Rinse thoroughly and use a soft cloth to wipe the product dry after each use.

- **Minor stains and mineral deposits**

Clean any daily stains or mineral deposits built-up over time with a mild solution of vinegar and water followed by a thorough flushing with water.

- **Stubborn stains**

Clean by soaking stained area with a solution of baking soda and hydrogen peroxide or non-abrasive household cleaner. Rinse thoroughly with warm water and wipe dry with cloth.

- **Do not use:**

Paint or nail-polish remover, straight bleach or any strong chemicals, abrasive cleaning products, scouring pad or steel wool.

- Be careful not to leave dirty dishes, coffee grounds, tea bags or other staining materials in contact with the enamel surface for extended periods of time.
- Consider kitchen sink accessories such as bottom basin racks and rinse baskets to help protect the surface from scratches.
- Do not store open containers of cleaners or chemicals such as acids, bleach, sodium chloride, lye, toilet bowl cleaner, drain cleaner, or hard water stain removal products under your sink.
