

EXTENDED COVERAGE ORDINARY HAZARD AUTOMATIC SPRINKLERS GL1121 & GL1113 UPRIGHT • PENDENT RECESSED PENDENT

DESCRIPTION AND OPERATION

The Globe Series GL-ECOH Extended Coverage Ordinary Hazard Extra Large Orifice Sprinkler is a low profile yet durable design which utilizes a 3mm frangible glass ampule as the thermosensitive element. While the sprinkler provides an aesthetically pleasing appearance, it serves to protect various areas of coverage. This sprinkler series is available in various styles, temperature ratings and several finishes to meet many varying design requirements. The Globe Series GL-ECOH Extended Coverage Ordinary Hazard Extra Large Orifice Sprinkler is to be installed per NFPA 13 guidelines.

The heart of Globe's Series GL sprinkler proven actuating assembly is a hermetically sealed frangible glass ampule that contains a precisely measured amount of fluid. When heat is absorbed, the liquid within the bulb expands increasing the internal pressure. At the prescribed temperature the internal pressure within the ampule exceeds the strength of the glass causing the glass to shatter. This results in water discharge which is distributed in an approved pattern depending upon the deflector style used.
