Verify Meter Accuracy & Capture Lost Revenue
Efficient, Effective And Economical
Designed For Water Utilities And Providers

Description:

The MARS Company Series 100, Meter Test Bench System makes testing water meters 1/2" to 2" affordable for meter shops of all sizes.

This compact, one-of-a-kind design integrates the famously-rugged MARS fabricated frame into a reduced footprint, while providing this industry unique capability of testing meters up to two inch in size. All this, without the need for electrical or pneumatic supply for extreme portability and affordability.

The Series 100 uses the effortless self-locking mechanism for operation, three commercial rotameters, and a MARS 100 gallon stainless steel tank. Operators may accurately test at flow rates from 0.1 to 150 gpm with instant visual test results that require no calculations.

With the Series 100 Meter Test Bench System, MARS Company is making meter accuracy and revenue recovery a reality for every utility.

Features & Benefits

- Compact Size for Reduced Footprint
- Increases Revenue Recovery
- Affordable for Meter Shops of All Sizes
- Highly Accurate Results
- Ability To Grade Existing & New Meters
- Repair & Troubleshoot Meters
- Perfect for Isolated Meter Testing
- Instant Results - No Calculations
- Upgradeable for Automation
- No Electrical or Pneumatic Required

Specifications

- Test Meters From: 1/2" through 2"
- Flow rates from 0.1 to 150 gpm
- Volumetric Operation
- AWWA M6 Compliant
- Includes MARS patented 100 gallon Stainless Steel Tank
