VANITY MIRROR

SKU: 947922, 949460, 933511, 933512, 947924, 949461, 949462, 947923

INSTALLATION

1. With the help of another person, center the mirror above the sink at the appropriate height and mark a line at the top of the mirror on the wall.

2. Locate and mark the position of the wall studs to which you will fasten your mirror. You can find studs by listening for a solid sound as you knock on the wall or by using a stud finder

Tip: If the studs in your bathroom do not line up to the mounting location for your mirror, wood blocking can be installed between the studs using standard 2 x 4's. We recommend consulting a professional if you are unfamiliar with this type of installation.

3. Measure the location of the mounting rail on the back of the mirror to determine the location of your wall bracket. Use the top of the mirror as your guide-line. Use your level to verify that the wall bracket is properly aligned.

4. Drill pilot holes and install the wall bracket. Because wall construction and materials vary from home to home, the appropriate mounting hardware may need to be purchased from your local hardware store. Consult a professional if you are unfamiliar with this type of installation.

5. With the help of another person, hang your mirror by attaching the mounting rail to the wall bracket.
