

Beautiful Stone Seeded glass defines this 1-light pendant fixture featuring a teardrop shape that tapers off at the base. Topped by a turned wood finial, this glass pendant captures the essence of sea, sand and sky, evoking coastal vibes. Stone seeding is produced by rolling hot glass over a bed of fine gravel, then blowing the glass so some fragments get encased within. Additionally, air bubbles create traditional seeding alongside the visual grit. Try this glass pendant light by itself or in a staggered cluster of light pendants above a breakfast table or kitchen island. - Stone Seeded glass - Mango wood finial
