## FIGURE 7708/7709 ROOFTOP SUPPORT SYSTEM

### ALL-IN-ONE ROOFTOP SUPPORT & CUSTOM BOOT

This rooftop support solves the challenge of specifying and procuring rooftop supports to accommodate a wide variety of project types. Incredibly light, strong and modular, these supports may be used individually for pipe diameters up to 6 inches or securely combined to address virtually any rooftop support design.

#### FEATURES

- Strong and versatile
- Extremely adaptable for virtually any rooftop support project: From gas, water or condensate piping to electrical conduit and even heavy equipment
- Integrated, bi-directional strut channels allow multiple base units to be securely combined to accommodate larger pipes, multiple runs, ductwork and equipment
- A wide base and large footprint better distribute weight and provide solid protection for any roof surface
- Made of weatherproof polycarbonate for high performance and longevity in harsh environments

#### PRODUCT SPECIFICATIONS

- Part # FNW7708
- Maximum capacity: 2850 lbs
- Rooftop working load (calculated at 5 psi): 315 lbs\*
- Height: 4.5"
- Length: 10.625"
- Width (base): 6"
- Weight: 2 lbs/6 oz
- Packaging: 6 units/box
- Pallet quantity: 240
- Included galvanized strut: 1-5/8" x 13/16" x 10" 14ga

\*NOTE: Please consult roofing manufacturer or project engineer for maximum allowable load

#### ACCESSORIES

- Part # FNW7709
- Custom Boot: For added roof protection and improved wind performance
