

Industrial PVF

SMITH-COOPER®
INTERNATIONAL

You get it All.

***It's not just a quality product
- it's a quality system***

Quality products are not enough. Because if you want every product to be a quality product, you need a quality system.

Every SCI product is manufactured to precise standards, and inspected twice. All materials and dimensions are carefully monitored and meet relevant standards, and the whole process complies with ISO 9001 Standards. The SCI Trademark on each product is 100% traceable, because we're 100% responsible.

Wherever we work - and we work all over the world - exactly the same higher quality standards and systems are used. Because SCI Quality Plus means our 50-year reputation for quality is built right in.

***The benchmark of
packaging***

Standardized carton sizes. Large wraparound labels. Packaging that's color coded by product line. And - outside of every box - a nice, clean picture of what's inside every box.

SCI's Pro Pak System is a big idea that makes it possible for you to cut costs and improve service, simply by making it easier. From shipping and handling to tracking and reordering. And, at the same time, you'll be using your valuable warehouse space much more efficiently.

All in one place.

*The best guarantee
you'll never need*

The SCI 5/50 Guarantee says we will replace any pipe, valve or fitting for up to a full five years, when properly installed and operated, if failure is due to defects in material or workmanship.

Smith-Cooper will even pay \$50 to the installing contractor to offset the cost of installation (please see the SCI Warranty at www.smithcooper.com for details).

We think that means we offer the highest quality pipe, valves and fittings available. Quality we stand behind for a full five years. Which makes it just that much easier for you to offer your customers the same high standards of quality and service.

And that, in the end, is what we're all here for.

It's all about time.

We understand that time is money which is why everything we do is designed to save you time. From our Quality Plus and Pro Pak systems to our 5/50 Guarantee, Smith-Cooper service adds value to each order you place.

With locations on the East and West coasts, Smith-Cooper also offers speedy delivery. Each order is packaged to the exacting standards you have come to expect from us, no matter where it ships. Since we pay more attention to you, you have time to pay more attention to your customers.

Brass Ball Valve

- 600 lb. WOG, 150 lb. WSP
- Full port
- Forged brass body
- Blow-out proof stem
- Chrome plated ball
- UL Listed (1/4 ± 2) Threaded
- FM Approved, (1/2 ± 2)
- CSA Approved under z21.15a for 1/2 psiG (1/2 ± 2) ± Threaded
- CSA Approved under 3-88 for 5 psiG (1/2 ± 2) ± Threaded
- Approved under ANSI/ASM B16.33 spec for gas piping to 125 psiG (1/2 ± 2)
- Meets Fed Spec WW-V-35, Type II, Class A, Style 3 (1/2 ± 2)
- Conforms to MSS-SP110
- Certified to NSF/ANSI 61.8
- ISO 9001:2008 manufacturer

Cast Iron Body Butterfly Valve

- 200 psi (2 - 12)
- 150 psi (14 & 16)
- Cast iron body
- 316 stainless steel, nickel plated ductile iron or aluminum bronze disc
- EPDM or BUNA-N seat
- Lug or wafer connections
- Stainless steel stem
- Stem extensions available
- Fusion bonded epoxy coating
- MSS SP-67/API 609
- ISO 5211 mounting pad
- Install between ANSI Class 125/150 flange
- ISO 9001:2008 manufacturer

Series 17

Ductile Iron Body Butterfly Valve

- 200 psi (2 - 12)
- 150 psi (14 & 16)
- Ductile iron body
- 316 stainless steel, nickel plated ductile iron, aluminum bronze, ductile iron nylon coated or monel disc
- EPDM, BUNA-N, BUNA (perox. cured), EPDM food grade, Viton, Hypalon, hi-temp Viton or PTFE seat
- Lug, wafer or flanged connections
- MSS SP - 67 and API 609 compliant
- MSS SP - 25 marking
- Self-lubricated bushings
- Blow-out proof shaft
- Epoxy coated
- Valves available with undercut discs to 50 psi
- ISO 5211 mounting pad
- For di-directional or dead end service
- Phenolic backed cartridge seat
- Stem extensions available

SMITH-COOPER[®]

I N T E R N A T I O N A L

GROOVED COUPLINGS, FITTINGS & VALVES

QUALITY

- All COOPLOK™ grooved couplings and cast fittings are UL Listed and FM Approved for use on schedule 10, schedule 40 steel pipe and sprinkler pipe. (see below)
- Not for use in steam applications
- 14” through 24” fittings available upon request
- Canadian Registration Numbers available at www.smithcooper.com
- Manufacturing facility is ISO 9001:2008
- Quality management inspections at both the factory and our warehouses
- For your protection, the  logo is marked on all fittings, couplings, bolts, and gaskets
- Ductile iron conforms to ASTM A-536
- Groove dimensions conforms to AWWA C606
- Electroplated track bolts conform to ASTM A-183 with a minimum tensile strength of 110,000 psi
- Magnetic particle inspection of each bolt
- Coatings available in orange paint or hot dipped galvanized conforming to ASTM A153
- Grade E EPDM gaskets (green stripe) -30° F (-34° C) to +230° F (+110° C)
- Grade T Nitrile gaskets (orange stripe) -20° F (-29° C) to +180° F (+82° C)
- Replacement part list available at www.smithcooper.com

SPRINKLER PIPE APPROVALS

*SCI COOPLOK™ Grooved Couplings are UL Listed and FM Approved for use with the following types of sprinkler pipe:**

PIPE NAME	MANUFACTURER
Dyna-Thread®, Central-Thread®, XL®, XL-II®, Dyna-Flow®, Super 40®, Super-Flo, TL®, Central 7®, BLT®	Allied Tube and Conduit Corp.
Eddylite®, Eddy Flow®, Eddy Thread 40®	Bull Moose Tube Co.
Gal-7®	IDOD Systems Co.
EZ-Flow®	Northwest Pipe & Casing Co.
WLS®, Mega-Flow®, Mega-Thread®, MLT®, GL®	Wheatland Tube Company
Steady Flow®, Steady Thread®	Welded Tube Corp.
Fire-Flo®, EZ-Thread®	Youngstown Tube Co.
Tex-Flow®	Tex-Tube International
SPS Flow®	Yieh Phui Enterprise Co. Ltd.

**Includes any manufacturer of Schedule 10 or Schedule 40 steel pipe.*

Lightweight Flexible Couplings

GROOVED

Fig. 65LF & 66LF

Lightweight Flexible Coupling with “C” Gasket

- Maximum working pressure 500 psi (34.5 bar) depending on the size and schedule of the pipe being used
- All bolts, gaskets and housings identified by SCI logo
- 100% magnetic particle inspection of each bolt
- Each bolt has a minimum tensile strength of 110,000 psi
- Gaskets are pre-lubricated
- Gasket Grade E EPDM (green stripe) -30°F (-34°C) to +230°F (+110°C)
- Gasket Grade T Nitrile (orange stripe) -20°F (-29°C) to +180°F (+82°C)
- Other gasket materials available by special order
- Ductile iron housings conform to ASTM A-536
- Groove dimensions to AWWA C606
- Orange paint or hot dipped galvanized conforming to ASTM A153
- Smith-Cooper Warranty only applies to assemblies made with gaskets, housings and bolts carrying the SCI logo

Lightweight Rigid Couplings

GROOVED

Fig. 65LR & 66LR

Lightweight Rigid Coupling with “C” Gasket

- Maximum working pressure 500 psi (34.5 bar) depending on the size and schedule of the pipe being used
- All bolts, gaskets and housings identified by SCI logo
- 100% magnetic particle inspection of each bolt
- Each bolt has a minimum tensile strength of 110,000 psi
- Gaskets are pre-lubricated
- Gasket Grade E EPDM (green stripe) -30°F (-34°C) to +230°F (+110°C)
- Gasket Grade T Nitrile (orange stripe) -20°F (-29°C) to +180°F (+82°C)
- Other gasket materials available by special order
- Ductile iron housings conform to ASTM A-536
- Groove dimensions to AWWA C606
- Orange paint or hot dipped galvanized conforming to ASTM A153
- Smith-Cooper Warranty only applies to assemblies made with gaskets, housings and bolts carrying the logo

Standard Weight Flexible Couplings

Fig. 65SF & 66SF

Standard Weight Flexible Coupling with "C" Gasket

- Maximum working pressure depending on the size and schedule of the pipe being used:

- 1" to 6" - 1000 psi (68.9 bar)
- 8" to 12" - 800 psi (55.1 bar)
- 14" to 20" - 300 psi (20.6 bar)
- 24" - 250 psi (17.2 bar)

- 14" and larger are not UL Listed or FM Approved
- All bolts, gaskets and housings identified by SCI logo
- Gaskets are pre-lubricated
- Gasket Grade E EPDM (green stripe) -30°F (-34°C) to +230°F (+110°C)
- Gasket Grade T Nitrile (orange stripe) -20°F (-29°C) to +180°F (+82°C)
- Other gasket materials available by special order
- Ductile iron housings conform to ASTM A-536
- Groove dimensions to AWWA C606
- Orange paint or hot dipped galvanized conforming to ASTM A153

Standard Weight Rigid Couplings with Triple Seal Gasket

Fig. 65SRTRI & 66SRTRI

Standard Weight Rigid Coupling with Triple Seal Gasket

- Maximum working pressure depending on the size and schedule of the pipe being used:
 1" to 6" - 1000 psi (68.9 bar)
 8" - 800 psi (55.1 bar)
- All bolts, gaskets and housings identified by SCI logo
- gaskets are pre-lubricated
- Gasket Grade E EPDM (green stripe) -30°F (-34°C) to +230°F (+110°C)
- Other gasket materials available by special order
- Ductile iron housings conform to ASTM A-536
- Groove dimensions to AWWA C606
- Orange paint or hot dipped galvanized conforming to ASTM A153
- Smith-Cooper Warranty only applies to assemblies made with gaskets, housings and bolts carrying the SCI logo

GROOVED

Reducing Couplings

GROOVED

Fig. 65RC & 66RC

Reducing Coupling

- Maximum working pressure 300 psi (20.7 bar) depending on the size and schedule of the pipe being used
- All bolts, gaskets and housings identified by SCI logo
- 100% magnetic particle inspection of each bolt
- Each bolt has a minimum tensile strength of 110,000 psi
- Gaskets are pre-lubricated
- Gasket Grade E EPDM (green stripe) -30°F (-34°C) to +230°F (+110°C)
- Gasket Grade T Nitrile (orange stripe) -20°F (-29°C) to +180°F (+82°C)
- Other gasket materials available by special order
- Ductile iron housings conform to ASTM A-536
- Groove dimensions to AWWA C606
- Orange paint or hot dipped galvanized conforming to ASTM A153
- Smith-Cooper Warranty only applies to assemblies made with gaskets, housings and bolts carrying the SCI logo

Hinged Flange Adapters

Fig. 65FH & 66FH

Hinged Flange Adapter

- Maximum working pressure 300 psi (20.7 bar) depending on the size and schedule of the pipe being used
- 3/8" x 2-3/4" latch bolt included
- SCI does not provide flange bolts
- All bolts and gaskets identified by SCI logo
- 100% magnetic particle inspection of each bolt
- Each bolt has a minimum tensile strength of 110,000 psi
- Gasket Grade E EPDM (green stripe) -30°F (-34°C) to +230°F (+110°C)
- Gasket Grade T Nitrile (orange stripe) -20°F (-29°C) to +180°F (+82°C)
- Other gasket materials available by special order
- Ductile iron housings conform to ASTM A-536
- Groove dimensions to AWWA C606
- Orange paint or hot dipped galvanized conforming to ASTM A153
- Smith-Cooper Warranty only applies to assemblies made with gaskets, housings and bolts carrying the SCI logo

Mechanical Tee, Threaded

Fig. 65MT & 66MT

Mechanical Tee, Threaded

- Maximum working pressure 500 psi (34.5 bar) depending on the size and schedule of the pipe being used
- Equivalent length in feet of schedule 40 outlet pipe with a Hazen-Williams coefficient of 120 per UL 213
- All bolts and gaskets identified by SCI logo
- 100% magnetic particle inspection of each bolt
- Each bolt has a minimum tensile strength of 110,000 psi
- Gaskets are pre-lubricated
- Gasket Grade E EPDM (green stripe) -30°F (-34°C) to +230°F (+110°C)
- Ductile iron housings conform to ASTM A-536
- Groove dimensions to AWWA C606
- Smith-Cooper Warranty only applies to assemblies made with gaskets, housings and bolts carrying the SCI logo

Strap Tee, Threaded

**Fig. 65MU & 66MU
Strap Tee, Threaded**

- Maximum working pressure 300 psi (20.7 bar) depending on the size and schedule of the pipe being used
- Equivalent length in feet of schedule 40 outlet pipe with a Hazen-Williams coefficient of 120 per UL 213
- 1" outlets not listed by UL for direct connection to 1" sprinkler heads
- Gaskets are pre-lubricated
- Gasket Grade E EPDM (green stripe) -30°F (-34°C) to +230°F (+110°C)
- Ductile iron housings conform to ASTM A-536
- Groove dimensions to AWWA C606
- Smith-Cooper Warranty only applies to assemblies made with gaskets, housings and bolts carrying the logo

Standard Roll Groove Specifications AWWA C606

GROOVED

Column 1
Nominal IPS pipe size.
Nominal metric pipe size.

Column 2
IPS outside diameter.
Metric outside diameter.

Column 3 & 4
For IPS pipe, the maximum allowable tolerance from square cut ends is 0.030" for 1 – 3-1/2", 0.045" for 4 – 6" and 0.060" for sizes 8" and above, measured from a true square line. For metric size pipe, the maximum allowable tolerance from square cut ends is 0.75mm for sizes 25 – 80mm, 1.15mm for sizes 100 – 150mm and 1.50mm for sizes 200mm and above, measured from a true square line.

Column 5
The groove must be of uniform depth around the entire pipe circumference (see Column 6).

Column 6
Groove depth: for reference only. Groove must conform to the groove diameter "C" listed in Column 5.

Column 7
Minimum allowable wall thickness which may be roll grooved.

Column 8
Maximum allowable pipe end flare diameter. Measured at the most extreme pipe end diameter of the gasket seat area.

① Nominal IPS Pipe Size IN / mm	② Pipe Outside Diameter (OD) Tolerance			③ Gasket Seat (A) ± 0.03 IN ± 0.77 mm IN / mm	④ Groove Width (B) ± 0.03 IN ± 0.77 mm IN / mm	⑤ Groove Diameter (C)		⑥ Groove Depth (D) (Ref.) IN / mm	⑦ Min. Wall Thick. (T) IN / mm	⑧ Max Flare Dia. IN / mm

* No equivalent metric pipe size.

Standard Cut Groove Specifications AWWA C606

Column 1

Nominal IPS pipe size.
Nominal metric pipe size.

Column 2

IPS outside diameter.
Metric outside diameter.

Column 3 & 4

For IPS pipe, the maximum allowable tolerance from square cut ends is 0.030" for 1 – 3-1/2", 0.045" for 4 – 6" and 0.060" for sizes 8" and above, measured from a true square line. For metric size pipe, the maximum allowable tolerance from square cut ends is 0.75mm for sizes 25 – 80mm, 1.15mm for sizes 100 – 150mm and 1.50mm for sizes 200mm and above, measured from a true square line.

Column 5

The groove must be of uniform depth around the entire pipe circumference (see Column 6).

Column 6

Groove depth: for reference only. Groove must conform to the groove diameter "C" listed in Column 5.

Column 7

Minimum allowable wall thickness which may be cut grooved.

* No equivalent metric pipe size.

NOTES:

- For grooving pipe with wall thickness less than "T" (Column 7), see Roll Groove Specifications on Page 13.
- Gasket seat and groove must be smooth and free from scores, seams, chips, rust or scale which may interfere with proper coupling assembly.
- Out of roundness: Difference between maximum OD and minimum OD measured at 90° must not exceed total OD tolerance listed.
- All tolerances not shown are to comply with latest ASME or ASTM specification applicable to material being used.

Assembly:

- Step 1: Check to ensure that gasket is suitable for intended service.
- Step 2: Gasket is pre-lubricated (additional lubrication may be necessary)
- Step 3: Remove any dirt or debris from gasket and pipe ends.
- Step 4: Install gasket by placing it over pipe, ensuring that gasket lip does not overhang pipe end.
- Step 5: Bring both pipe ends together ensuring proper alignment and slide gasket into position properly centered between the grooved portions of each pipe.
- Step 6: Place coupling housings over gasket so that housing keys fully engage into grooves. Insert bolts into couplings and rotate nuts until finger tight. Wrench-tighten bolts alternately to the torque requirements shown below.

GROOVED

Torque Requirements for Bolts (ft./lbs)					
Coupling Size	Fig. 65LF	Fig. 65LR	Fig. 65SF	Fig. 65SR	Fig. 65RC
1	-	-	30	30	-
1-1/4 - 1-1/2	30	30	90	30	-
2 - 2-1/2	30	30	90	30	30
3 - 4	50	30	90	90	50
5 - 6	90	50	200	150	90
8	150	90	250	200	150
10	-	-	250	220	-
12	-	-	250	220	-
14	-	-	250	220	-

30 ft./lbs.	= 40 N/M
50 ft./lbs.	= 67 N/M
90 ft./lbs.	= 121 N/M
150 ft./lbs.	= 202 N/M
200 ft./lbs.	= 271 N/M
220 ft./lbs.	= 298 N/M
250 ft./lbs.	= 339 N/M

MECHANICAL AND STRAP TEES

Preparation:

After cutting hole, clean pipe surface within 3/4 of hole to make certain it is free from foreign matter to allow adequate seating of gasket. The area around the circumference of the pipe should be cleaned to allow full seating of the branch opening on the pipe surface.

Branch Size	Hole Saw Size
1/2" - 3/4" - 1"	1-1/2"
1-1/4"	1-3/4"
1-1/2"	2*
2"	2-1/2"
3"	3-1/2"
4"	4-1/2"

*Exception: 2" x 1-1/2" (1-3/4")

Assembly:

- Step 1: Disassemble tee, removing track bolts.
- Step 2: Lubricate tee gasket using standard gasket lubricant.
- Step 3: Insert unit over hole, align it and hand-tighten bolts.
- Step 4: Gently rock the tee to assure proper placement over hole.
- Step 5: Wrench-tighten bolts alternately to the torque requirements shown below. Less torque than listed may not seat properly; more torque than listed may cause gasket to fail to hold pressure.
- Step 6: Check to see that housing is firmly installed against pipe with no gaps showing and that no foreign matter is between tee and pipe.

Torque Requirements:

- Mechanical Tees: 45-75 ft./LBs. Strap Tees: 30 ft./LBs.

Installation Instructions

HINGED FLANGE ADAPTER

Assembly:

- Step 1: Loosen the latch bolt nut and pull it out of the flange slot. Open the hinged flange and install it on the grooved pipe end with the flange's key section inserted into the pipe groove. The SCI logo must face away from the pipe end.
- Step 2: Return the latch bolt into the flange slot. Do not tighten the bolt completely.
- Step 3: Check the gasket to insure that it is suitable for the intended service. Lubricate the exterior of the gasket, using a silicone lubricant or equivalent.
- Step 4: Press the hinged flange gasket into the gasket cavity, making sure that the gasket is oriented correctly.
- Step 5: Tighten the nut of the latch bolt to the specified bolt torque. The hinged flange housings must overlap completely so a flange bolt can be inserted into the shared hole.
- Step 6: The mating flange must be flat, smooth and free of gouges or other indentations. Check that the gasket is still located properly and bring the two flanges together.
- Step 7: Starting with the shared holes on the hinged flange, insert flange bolts meeting SAE J429 Grade 5 or higher through both flanges. Hand-tighten nuts onto the bolts and then torque the nuts to the values in the table, keeping the flanges parallel as the nuts are being tightened alternately.

Adapter Size	Flange Bolt Torque
2" – 2-1/2" – 3"	100-130 ft./lbs. (135-175 N/M)
4" – 6"	200-250 ft./lbs. (270-340 N/M)
8"	300-400 ft./lbs. (400-540 N/M)

Adapter Size	Latch Bolt Torque
All Sizes	40 ft./lbs. (55 N/M)

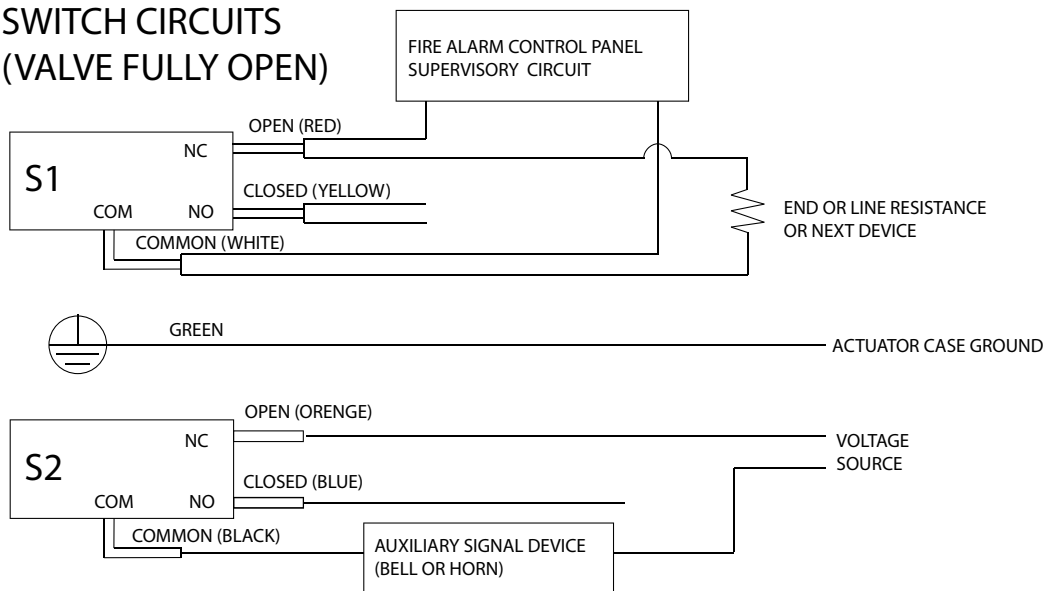

Hinged Flange Adapter

SUPERVISORY TAMPER SWITCH CIRCUITS (VALVE FULLY OPEN)

Malleable Iron Threaded Fittings

Class 150 and Class 300 Specifications

- Class 150  branded fittings are UL Listed and FM Approved at 300 psi
- Class 300  branded fittings are UL Listed
- Hot-dipped galvanized fittings are certified to; NSF/ANSI 61-4 and California AB1953 Lead Free
- Canadian Registration Numbers available at www.smithcooper.com
- Malleable castings conform to ASTM A197
- Hot-dipped galvanized fittings conform to ASTM A153
- Malleable fitting dimensions conform to ASME B16.3
- Malleable bushings, plugs and locknuts conform to ASME B16.14
- Malleable unions conform to ASME B16.39
- NPT threads on all fittings conform to ASME B1.20.1
- Independent lab verification that fittings meet applicable chemical & physical properties
- Manufacturing facilities are ISO 9001:2008 and ISO 14001
-  branded fittings are 100% air tested

Ductile Iron Threaded Fittings

Specifications

-  branded ductile iron threaded fittings are UL Listed and FM Approved at 500 psi
- Rated to 300 WSP
- Ductile iron castings conform to ASTM A536
- Fitting dimensions conform to ASME B16.3
- Bushings and plugs conform to ASME B16.14
- Fittings are 100% air tested
- NPT threads on all fittings conform to ASME B1.20.1
- Independent lab verification that fittings meet applicable chemical & physical properties
- Manufacturing facilities are ISO 9001:2008 and ISO 14001

Cast Iron Threaded Fittings

Specifications

-  branded cast iron threaded fittings are UL Listed and FM Approved at 300psi
- Rated to 125# WSP
- Casting date on each fitting
- Grey iron castings conform to ASTM A126
- Cast iron fitting dimensions conform to ASME B16.4 Class 125
- NPT threads on fittings conform to ASME B1.20.1
- Cast iron fittings have SCI Trademark and are 100% air tested
- Manufacturing facility is ISO 9001:2008 and ISO 14001

Flanged Fittings and Flanges

Flanged Fittings Class 125 & 250 Specifications

- Flanged fittings UL Listed through 12"
- Grey iron castings conform to ASTM A126 and ASTM A48
- Flanged fitting dimensions conform to ASME B16.1 and ANSI/AWWA C110/A21.10
- Manufacturing facility is ISO 9001:2008
- Flanged fittings made of 150# ductile iron for sizes 6" and below
- Galvanizing available upon request

Class 125 & 250 Cast Flanges Specifications

- Grey iron castings conform to ASTM A126 and ASTM A48
- Companion flange dimensions conform to ASME B16.1
- Hot-dipped galvanized flanges conform to ASTM A153
- Companion flanges threads conform to ASME B1.20.1
- Manufacturing facility is ISO 9001:2008

Forged Carbon Steel Fittings and Outlets

Specifications

- Forged carbon steel fitting material conforms to ASTM SA105N, NORMALIZED
- Canadian Registration Numbers available at www.smithcooper.com
- Forged carbon steel fitting dimensions conform to ASME B16.11
- Forged carbon steel fitting dimensions listed are either minimums or set by the factory per ASME B16.11 contact SCI for exact dimensional information
- NPT threads on forged steel fittings conform to ASME B1.20.1
- Forged carbon steel socket weld inserts conform to MSS-SP-79
- Forged carbon steel unions conform to MSS-SP-83
- Forged carbon steel outlet fittings conform to MSS-SP-97
- Manufacturing facility is ISO 9001:2008

2000#, 3000# or 6000#

All Butt Weld Outlets Have a Schedule 80 Bore

SMITH-COOPER[®]

I N T E R N A T I O N A L

Bronze Fittings 125# and Flanges 150#

Bronze Fittings Specifications

-  branded bronze fittings are UL Listed
- Canadian Registration Numbers available at www.smithcooper.com
- Bronze fittings conform to AWWA C800
- Bronze castings conform to ASTM B62, UNS Alloy C83600
- Bronze fitting dimensions conform to ASME B16.15
- Thread protectors on all male threads
- NPT threads on all fittings conform to ASME B1.20.1
- Bronze unions conform to specification A-A-59617
- Manufacturing facilities are ISO 9001:2008
- SCI trademarked fittings and are 100% air tested

Bronze Flanges Specifications

- Bronze castings conform to ASTM B62, UNS Alloy C83600
- Bronze flange dimensions conform to ASME B16.24
- NPT threads on all flanges conform to ASME B1.20.1
- Manufacturing facilities are ISO 9001:2008

Merchant Steel Couplings and Fittings Drop Pipe Couplings

Merchant Couplings and Fittings Specifications

- Merchant coupling dimensions and materials conform to ASTM A865
- Canadian Registration Numbers available at www.smithcooper.com
- Merchant coupling threads conform to ASME B1.20.1
- Merchant couplings from 1/8" to 2" are NPSC (straight threads),
2-1/2" and larger are NPT (tapered)
- Recessed couplings are API 5L style for extra heavy pipe, all sizes have NPT threads
- Merchant steel bushings and plugs conform to ASME B16.14
- Hot-dipped galvanized fittings conform to ASTM A153

Drop Pipe Couplings Specifications

-  branded
- Drop pipe couplings are NPT (tapered threadeds)

SMITH-COOPER[®]

INTERNATIONAL

COOPLET[®]

Weld Outlets & Adapter Nipples

Weld Outlet Specifications

-  Branded COOPLET[®] Weld Outlets are UL Listed and FM Approved at 300 psi
- COOPLET[®] Weld Outlets (Threaded) conform to ASTM A106, ASME B1.20.1
- COOPLET[®] Grooved Weld Outlets are made from Sch. 40 Pipe
- COOPLET[®] Grooved Weld Outlets size on size are UL Listed Only
- All Grooves are cut grooved Are A53, AWWA C606 (cut grooved specifications on page 70)

COOPLET[®] Weld Outlets are UL Listed and FM Approved for use on Sch 10, Sch 40 and the following sprinkler pipe

Pipe Name	Manufacturers
Dyna- Thread [®] , Central- Thread [®] , XL [®] , XL-II [®] , Dyna-Flow [®] , Super 40 [®] , Super- Flo [®] , TL [®] , Central 7 [®] , BLT [®]	Allied Tube and Conduit Corp.
Eddylite [®] , Eddy Flow [®] , Eddy Thread 40 [®]	Bull Moose Tube Co.
Gal-7 [®]	IDOD Systems Co.
EZ-Flow [®]	Northwest Pipe Company
WLS [®] , Mega Flow [®] , Mega- Thread [®] , MLT [®] , GL [®]	Wheatland Tube Company
Steady Flow [®] , Steady Thread [®]	Welded Tube Corp.
Fire-Flo [®] , Ez- Thread [®]	Youngstown Tube Co.
Tex- Flow [®]	Tex- Tube International
Fire Line Flow [®] , Rapid Thread [®] , Rapid-Thread Light [®]	Western International Forest Products Inc.

Adapter Nipple Specifications

- COOPLET[®] Adapter Nipples conform to ASTM A106, ASME B1.20.1, ASME B36.10, and AWWA C606
- All grooves are cut grooved (cut grooved specifications on page 70)

Steel Nipples and Brass Nipples

Welded Sch 40 & Sch 80 Specifications

-  branded
- Black and hot-dipped galvanized steel pipe used conforms to ASTM A53
- Canadian Registration Numbers available at www.smithcooper.com
- Welded steel nipples conform to ASTM A733
- NPT threads on nipples conform to ASME B1.20.1
- Manufacturing facility is ISO 9001:2008 and ISO 14001
- Import nipples have SCI Trademark and tracking number
- Domestic nipples available upon request
- Galvanized nipples are certified to; NSF/ANSI 61-4 and California AB1953 Lead Free

Seamless Sch 40, Sch 80, and XXH Specifications

-  branded
- Seamless steel pipe used conforms to ASTM A106 Grade B
- Canadian Registration Numbers available at www.smithcooper.com
- Seamless steel nipples conform to ASTM A733
- NPT threads on nipples conform to ASME B1.20.1
- Manufacturing facility is ISO 9001:2008 and ISO 14001
- Import nipples have SCI trademark and heat number
- Domestic nipples available upon request

Seamless Sch 40 Red Brass Specifications

-  Branded
- Canadian Registration Numbers available at www.smithcooper.com
- Seamless brass pipe conforms to ASTM B43
- Seamless brass nipples conform to ASTM B687
- NPT threads on nipples conform to ASME B1.20.1
- Certified to CA AB1953 Lead Free

* Special ends finishes and lengths available upon request

Lead Free Products

Valves, Brass, Fittings, Nipples, & Pipe; Galv: MI Fittings & Steel Pipe

Lead Free Product Listing

- Galvanized malleable iron fittings are certified to; NSF/ANSI 61-4 and California AB1953 Lead Free Pages 73-88
- Galvanized steel nipples are certified to; NSF/ANSI 61-4 and California AB1953 Lead Free Pages 157-158
- Red brass seamless nipples and pipe are certified to California AB 1953 Pages 162-164
- Lead free valves certified to; NSF/ANSI 61-8 and California AB1953 Lead Free Pages 167-171
- Lead free brass fittings certified to; NSF/ANSI 61-4 and California AB1953 Lead Free Pages 172-176

Lead Free Brass Fittings Specifications (pg 172-176)

- Brass fittings conform to AWWA C800
- Brass castings conform to ASTM B584, UNS Alloy C89833
- Brass fittings dimensions conform to ASME B16.15
- NPT threads on all fittings conform to ASME B1.20.1
- Brass unions conform to specification A-A-59617
- Manufacturing facilities are ISO 9001:2008
- Thread protectors on all male threads
- Fittings have SCI trademark and are 100% air tested
- Approved to ANSI/NSF 61-4 California AB 1953

Lead Free Valves

Series 8170L & 8171L

Brass Ball Valve

- 600 lb. WOG, 150 lb. WSP
- Full port
- Forged brass body
- Blow-out proof stem
- Chrome plated ball
- UL Listed (1/4 ± 2) threaded
- F/M Approved, (1/2 ± 2) CSA Approved under z21.15a for 1/2 psiG (1/2 ± 2) ± threaded
- CSA Approved under 3-88 for 5 psiG (1/2 ± 2) ± threaded
- Approved under ANSI/ASME B16.33 spec for Gas Piping to 125 psiG (1/2 ± 2)
- Meets Fed Spec WW-V-35, Type II, Class A, Style 3 (1/2 ± 2)
- Conforms to MSS-SP110
- Certified to NSF/ANSI 61-8 / Annex G Lead Free
- ISO 9001:2008 manufacturer

Warranty and Limitations of Liability

SMITH-COOPER INTERNATIONAL (SCI) warrants to its initial purchaser only, that its products which are delivered to this initial purchaser will be of the kind described in the order or price list and will be free of defects in workmanship or material for a period of five years from the date of delivery to our initial purchaser.

Should any failure to conform to this warranty appear within five years after the date of the initial delivery to our initial purchaser, SCI will, upon written notification thereof and substantiation that the goods have been stored, installed, maintained and operated in accordance with recognized engineering and piping practices and industry standards, correct such defects by suitable repair or replacement (which alternative shall be at the discretion of SCI) of product at SCI's own expense upon return of the defective part to SCI.

In the event that SCI elects to replace the defective product, SCI shall pay up to \$50 per defective product for total cost of replacement. In the event of multiple claims, such payment shall be no greater than \$1,000 for each installation project.

This warranty applies only during normal use that meets the above referenced conditions of installation and operation and is absolutely void if the product has been damaged after purchase or if it has been misused, repaired, altered or modified in any manner whatsoever. SCI shall not warranty any of its products if any portion of the product including without limitation, any component, gasket, housing or bolt has been modified, altered, remanufactured or replaced in any manner by any customer, user of the product or third party.

Correction of non-conformities, in the manner and for the period of time provided above, shall constitute fulfillment of all liabilities of SCI to our initial purchaser, with respect to the goods, whether based on contract, negligence, strict tort, or otherwise. It is the intention of SCI that no warranty of any kind, whether expressed or implied shall pass through our initial purchaser to any other person or corporation.

No returns will be allowed unless prior written permission of SCI is first obtained. Buyers shall be responsible for all costs of transportation as well as a restocking charge.

This warranty is exclusively for the benefit of the initial purchaser of this product from SCI and, except to the extent prohibited by applicable law, the foregoing warranty is in lieu of all other warranties, express or implied, including but not limited to warranties of fitness or merchantability.

LIMITATIONS OF LIABILITY: SCI shall not under any circumstances be liable for special or consequential damages such as, but not limited to damage to loss of other property or equipment, loss of profits or revenue, cost of capital, cost of purchased or replacement goods, claims of customers of our initial purchaser, any labor cost for repair or replacement of the product or damage caused by the product.

The remedies of our initial purchaser, and all others, set forth herein are exclusive, and the liability of SCI with respect to same shall not, except as expressly provided herein, exceed the price of the SCI products on which such liability is based.
