

This synthetic sling is used for handle fire hydrants in a proper manner. It fits over any size discharge outlet or side valve system and is designed to lift under the valve body, not the valve stem.

FEATURES AND BENEFITS

- Perfect for safely installing and removing fire hydrants.
- Available in two lengths; 4'-6" and 7'-6"
- It will not rust and won't scrape the paint off the hydrant.
- 4,000-lb capacity.
