

4				3				2				1																																																																																																																																										
NOTES:																																																																																																																																																						
(N1) 1. FIT / FORM / FUNCTION SHALL FOLLOW PS-E.008.																																																																																																																																																						
2 APPLY LOCTITE 680.																																																																																																																																																						
3 CUT AND SHORTEN O-RING BY .13" TO .20" IN LENGTH BEFORE INSTALLING.																																																																																																																																																						
4 SLIT O-RING BEFORE INSTALLING.																																																																																																																																																						
5 APPLY LOCTITE 242.																																																																																																																																																						
(N6) 6 CONNECT WHITE AND RED TUBINGS TOGETHER AND WATER TEST WHOLE UNIT.																																																																																																																																																						
7 BAG 5-035 IN A SEPARATE BAG.																																																																																																																																																						
(N8) 8 REWORK CARTRIDGE ASSY IF THE HANDLE DOES NOT RETURN TO THE 'OFF' POSITION AUTOMATICALLY AFTER WATER TESTING.																																																																																																																																																						
9 INSTALLATION TORQUE: 8-14 LB-FT.																																																																																																																																																						
10 INSTALLATION TORQUE: 30 LB-FT.																																																																																																																																																						
11 LUBRICATE SPRING WITH DOW CORNING III SILICONE COMPOUND.																																																																																																																																																						
12 PRE-CRIMPED THESE PARTS TOGETHER. SEE INSTALLATION INSTRUCTION.																																																																																																																																																						
13 APPLY LIGHT FILM OF DOW CORNING III SILICONE COMPOUND.																																																																																																																																																						
																																																																																																																																																						
BILL OF MATERIAL (CURRENT LEVEL)
