Ford offers many products that are classified to ANSI/NSF Standard 61. To verify if a product is classified to ANSI/NSF Standard 61, contact the Ford Meter Box Customer Service Department at 260-563-3171 or visit fordmeterbox.com.

Due to design improvements, product images in the catalog do not always reflect the most current design detail.

Ford, Ford Meter Box and Uni-Flange are trademarks of The Ford Meter Box Company, Inc. registered in the U.S.

▲ Ford Meter Box no-lead brass products manufactured from UNS/CDA No. 89833 alloy shall contain no more than 0.25% total lead content by weight.

Parties responsible for monitoring and maintaining proper water system design must exercise full responsibility in understanding and upholding the full intent and scope of applicable lead laws.

Note: See product listings in catalog to ensure desired sizes and options are available.

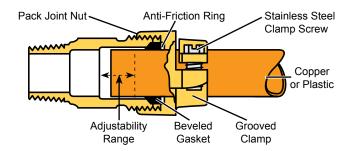

*Ford Pack Joint Couplings

Pack Joint Connections - How the Pack Joint Works

- Tightening the large Pack Joint Nut compresses an EPDM beveled gasket to make it watertight around the pipe or tubing.
- 2. For copper or plastic tubing and pipe the nut has a split clamp locking device, which is drawn down securely on the tubing or pipe by tightening a stainless steel screw. (For iron pipe, the nut has a stainless steel set screw to bite in and lock on the pipe.)
- **3.** Machined grooves in the clamp provide additional gripping action.

FOR COPPER, PET, PEP OR PVC

(Metal inserts to be used with PET or PEP)

Installation instructions are shipped with product and posted on the Ford Meter Box website. Consult pipe or tubing manufacturer for specific installation requirements.

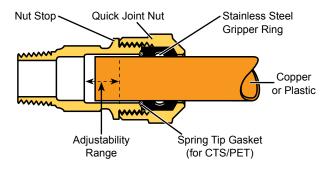

*Ford Quick Joint Couplings

The Ford Quick Joint Nut offers traditional Ford features of quality and reliability. This easy to use fitting is available on a wide variety of Ford products. Just stab the copper or plastic tubing into the fitting and tighten down the compression nut to the external stop. That's it! The Quick Joint provides excellent pullout resistance and superior hydraulic blow-off protection. Note: The Ford Quick Joint Nut is NOT interchangeable with other compression fittings.

Quick Joint Connections - How the Quick Joint Works

- A large gasket and stainless steel gripper ring are drawn down together when the nut is tightened, providing the hydraulic seal and mechanical restraint.
- 2. A transparent fluorocarbon coating covers the interior of the nut, providing smooth torque transfer. This coating eliminates "back drive," reduces tightening torque and minimizes gasket distortion.
- **3.** A positive, external and visual stop ensures correct installation, providing maximum gasket seal.

FOR 3/4" - 2" COPPER, PET (SDR9) OR 3/4" - 1" PEP (Metal inserts to be used with PET or PEP)

Installation instructions are shipped with product and posted on the Ford Meter Box website. Consult pipe or tubing manufacturer for specific installation requirements.

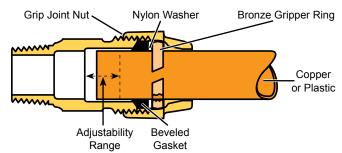

*Ford Grip Joint Couplings

Grip Joint Connections - How the Grip Joint Works

- Tightening the Grip Joint Nut compresses an EPDM beveled gasket to make it watertight around the pipe or tubing.
- The bronze split ring is drawn down when the nut is tightened, providing the mechanical seal and lock on the pipe.
- Grip Joint Couplings are manufactured for copper and PET or 3/4" and 1" PEP.

ONE STEP COUPLING FOR COPPER, PET OR PEP

(Metal inserts to be used with PET or PEP)

Installation instructions are shipped with product and posted on the Ford Meter Box website. Consult pipe or tubing manufacturer for specific installation requirements.

* See dimension comparison table on page 6 for recommended PE pipe and tubing.

Ford Ultra-Tite Couplings*

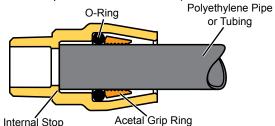

The Ford Ultra-Tite Compression Coupling provides an immediate lock onto polyethylene pipe (PEP/IPS) or polyethylene tubing (PET/CTS) when inserted to the internal stop.

STAB COUPLING FOR 3/4" AND 1" PEP AND PET

(No insert required or recommended.)

Ultra-Tite Connections - How the Ultra-Tite Works

- 1. An integral stop within the coupling ensures full pipe insertion.
- The directional serrations of the plastic grip ring engage the outside diameter of the pipe or tubing providing a mechanical seal and lock.
- 3. The internal O-ring provides a hydraulic seal.

Installation instructions are shipped with product and posted on the Ford Meter Box website. Consult pipe or tubing manufacturer for specific installation requirements.

Ultra-Tite couplings on corporation stops are assembled hand tight and must be removed for drilling or tapping machine adaptation to corporation stop outlet threads. Once the tap is made, the Ultra-Tite should be securely tightened to the corporation stop outlet thread. Unless otherwise requested, corporation stops with Ultra-Tite connections require a drilling/tapping (insertion) machine adapter for male iron pipe outlet threads. Contact the factory for Ultra-Tite corporation stops with optional outlet thread connections.

*See dimension comparison table on page 6 for recommended PE pipe and PE tubing dimensions.

Lead-Pack Couplings

Recognizing the potential hazard of lead service lines, the Environmental Protection Agency has a goal of eliminating lead lines. As buried lead services are unearthed because of construction or line failure, an opportunity exists to replace lead with a different type of material. By using the Lead-Pack you can attach copper, iron, plastic or PVC to an existing lead service line. Follow federal, state, and local regulations and AWWA best practices (AWWA C810) to reduce exposure to lead in potable water.

Lead-Pack Connections - How the Lead-Pack Works

- 1. Tightening the large Lead-Pack Nut compresses an EPDM beveled gasket to make it watertight around the pipe or tubing.
- 2. There is a split clamp locking device which is drawn down securely on the pipe by tightening a stainless steel screw.
- 3. Machined grooves in the clamp provide positive gripping action.
- 4. Lead-Pack Couplings are available with a variety of adapter connections, including female iron pipe threads, male iron pipe threads, flared copper, and compression fittings for copper, plastic or PVC.

Ford Pack Joint

Code Marks for Ford Compression Coupling Nuts

CTS - Copper and PET

S - Strong Lead Pipe

PEP - PE Pipe

XS - Extra Strong Lead Pipe

PVC - PVC Pipe

XXS - Double Extra Strong Lead Pipe

Types of Pipe and Tubing Explanation of Abbreviations

Copper Tube - CTS - Copper tubing is widely used as a service line and the **outside diameter** is closely held by manufacturers. The outside diameter of copper tubing has become a standard in the industry and is known as "copper tube size."

Plastic Tubing - CTS - Flexible water service tubing in what is referred to as "copper tube size." Plastic tube refers to *any* plastic with the same **outside diameter** as corresponding sizes of copper tube. PET – polyethylene tubing.

Plastic Pipe - PEP - Flexible water service pipe in what is referred to as "pipe size." Plastic pipe refers to *any* pipe having the same **inside diameter** as corresponding sizes of standard iron pipe. PEP – polyethylene pipe.

PVC Pipe - PVC - Polyvinyl chloride rigid plastic pipe. PVC Pipe refers to polyvinyl chloride rigid plastic pipe having the same **outside diameter** as corresponding sizes of standard iron pipe.

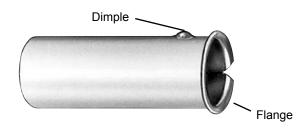

Ford Pack Joints for PVC are recommended for use only with Schedule 40 and Schedule 80 PVC.

Lead Pipe - Lead pipe is controlled by the inside diameter. The outside diameter varies and is manufactured in three ranges; strong (S), extra strong (XS) and double extra strong (XXS).

Accessories

Insert Stiffeners

Ford Insert Stiffeners are a solid tubular 304 stainless steel design, dimpled and flanged to retain placement within the service line.

Before using Ford Insert Stiffeners, be sure inside tubing or pipe dimensions correspond to the table below.

Ford recommends using insert stiffeners with plastic pipe or tubing.

Note: Consult pipe or tubing manufacturer for specific installation requirements.

50 Series For Polyethylene Tubing (PET)

| CATALOG | Nominal | PET |

Copper Rounding Tool

When copper tubing is used, Ford recommends it be checked to see if it is properly round. Compression connections do not perform properly if the tubing is out-of-round. Unrounded copper can result in a marginal gasket seal that may eventually permit leakage. The Copper Rounding Tool forms the copper tubing for a proper fit and a reliable gasket seal.

| CATALOG NUMBER | Tube Size | APPROX. Wt. Lbs. |
|-------------------|--------------|---------------------|
| CRT-3 | 3/4" | 0.7 |
| CRT-4 | 1" | 1.4 |

| CRT-6 | 1-1/2" | 3.8 |
| CRT-7 | 2" | 8.0 |

Ultra-Tite Compression Fittings

For Polyethylene Pipe (PEP/IPS) or Polyethylene Tubing (PET/CTS)

The Ford Ultra-Tite Compression Fitting provides an immediate lock onto polyethylene pipe (PEP/IPS) or polyethylene tubing (PET/CTS) when inserted to the internal stop. See the specific compatibility information below.

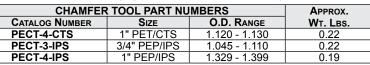

PET/CTS Ultra-Tite (contains red gripper ring)

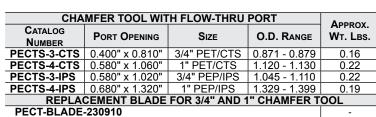

PEP/IPS Ultra-Tite (contains white gripper ring)

Chamfer Tool and Parts

Beveling the end of the pipe or tubing with the special chamfering tool permits proper engagement of the pipe or tubing into the socket.

Chamfer Tool / Flow-Thru Port

Chamfer Tool

Gripper Ring Removal Tool

Removing the Ultra-Tite from the pipe or tubing requires a removal tool* between the gripper and the pipe or tubing, to allow release of the compression.

| REMOVAL TOOL PART NUMBER | | | | | |
|--------------------------|---------------------|--|--|--|--|
| CATALOG NUMBER | DESCRIPTION | | | | |
| UTRT-520200 | 3/4" and 1" CTS-IPS | | | | |

^{*1&}quot; size requires the use of two removal tools.

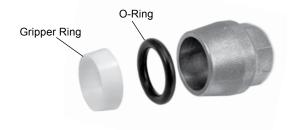

Gripper Ring Removal Tool

Ultra-Tite Component Parts

O-ring and Gripper Ring replacement is recommended prior to reusing the fitting.

Tubing/Pipe and Ford Ultra-Tite Compatibility Table

Use this table to ensure pipe/tubing compatibility.

| | | | 0 1 7 | |
|-----------------|-------------------|------------------|-----------------------|------------------|
| NOMINAL SIZE OF | MATERIAL | TUBING OR PIPE | TUBING OR PIPE WALL | TUBING OR PIPE |
| CONNECTION | IVIATERIAL | O.D. RANGE (IN.) | THICKNESS RANGE (IN.) | I.D. RANGE (IN.) |
| 3/4" CTS PE | Polyethylene (PE) | 0.871 - 0.879 | 0.097 - 0.107 | 0.657 - 0.685 |
| 1" CTS PE | Polyethylene (PE) | 1.120 - 1.130 | 0.125 - 0.137 | 0.846 - 0.880 |
| 3/4" IPS PE | Polyethylene (PE) | 1.045 - 1.110 | 0.118 - 0.138 | 0.809 - 0.834 |
| 1" IPS PF | Polyethylene (PF) | 1 329 - 1 399 | 0 150 - 0 170 | 1 029 - 1 059 |

The Ford Ultra-Tite is specifically recommended for applications on Polyethylene Pipe (PEP) or tubing (PET) and PEX tubing meeting ASTM F876 and AWWA C904. The pipe and tubing must meet the dimension ranges provided in the table above.

The use of a tubing insert is not required or recommended, except the PEX tubing identified above must be installed with an insert.

Grip Joint for CTS or PEP (3/4" and 1") is available. Add "-G" to the catalog number.

- ◆ Quick Joint is available. Add "-Q" to the catalog number.
- * Note: Item manufactured from multiple components assembled watertight.
- † Uses Ballcorp style Pack Joint nut.
- ▶ Ultra-Tite is available. Add "U-AWT" to the catalog number. (Consists of components assembled watertight)

Pack Joint Tees

Cut-In Tees with Detachable Pack Joints

An extra customer can be served from an existing service line by removing a 2-3/4" section of pipe to accommodate the body of a 3/4" cut-in tee (4" section for 1" service lines). Slip the detachable Pack Joints onto the ends of the sectioned line, screw them tight on each end of the tee. Tighten the Pack Joint nuts and stainless steel set screws (for iron pipe) or stainless steel clamp screws (for copper tube or tube-size plastic, or for iron pipe size plastic).

TD442-333-NL Side Outlet Flared Copper

TD441-333-NL Side Outlet Female Iron Pipe Thread

TD448-333-NL Side Outlet Male Iron Pipe Thread

^{*}These items fit two types/sizes of lead pipe as shown in the description. When ordering use complete catalog number.

NOTE: Numbers in parentheses indicate that some Lead-Pack couplings are the same as couplings found elsewhere in this catalog section for other types of tubing and pipe; however, Grip Joint couplings are not compatible with lead pipe.

Follow federal, state, and local regulations and AWWA best practices (AWWA C810) to reduce exposure to lead in potable water.

^{**}This item is not one piece, it is two pieces assembled watertight.

[◆] **Quick Joint** is available. Add "-Q" to the catalog number.

^{*}These items fit two types/sizes of lead pipe as shown in the description. When ordering use complete catalog number.

NOTE: Numbers in parentheses indicate that some Lead-Pack couplings are the same as couplings found elsewhere in this catalog section for other types of tubing and pipe; however, Grip Joint couplings are not compatible with lead pipe.

No-Contact Coupling

(patent pending)

The No-Contact coupling employs a permanently installed plastic liner to prevent direct contact of lead plumbling lines with other metallic water system components.

| CATALOG NUMBER | Description | | | APPROX. Wt. Lbs. |
|----------------------|---|---|-----------------------------------|---------------------|
| *Q11-33-Q31-23-NC-NL | 5/8" dbl. extra strong lead (XXS) or 3/4" strong lead (S) | Х | 3/4" female iron pipe thread | 1.2 |
| *Q14-33-Q34-23-NC-NL | 5/8" dbl. extra strong lead (XXS) or 3/4" strong lead (S) | Х | 3/4" cop. or plastic tubing (CTS) | 1.5 |
| *Q18-33-Q38-23-NC-NL | 5/8" dbl. extra strong lead (XXS) or 3/4" strong lead (S) | Х | 3/4" male iron pipe threads | 1.2 |
| Q22-33-NC-NL | 3/4" extra strong lead (XS) | Х | 3/4" flare copper | 1.4 |
| Q22-34-NC-NL | 3/4" extra strong lead (XS) | Х | 1" flare copper | 1.9 |
| Q24-33-NC-NL | 3/4" extra strong lead (XS) | Х | 3/4" cop. or plastic tubing (CTS) | 1.3 |
| Q24-34-NC-NL | 3/4" extra strong lead (XS) | Х | 1" cop. or plastic tubing (CTS) | 1.5 |
| Q28-33-NC-NL | 3/4" extra strong lead (XS) | Х | 3/4" male iron pipe threads | 1.1 |
| Q21-44-NC-NL | 1" extra strong lead (XS) | Х | 1" female iron pipe thread | 1.8 |
| Q22-44-NC-NL | 1" extra strong lead (XS) | Х | 1" flare copper | 2.4 |
| Q24-44-NC-NL | 1" extra strong lead (XS) | Х | 1" cop. or plastic tubing (CTS) | 1.4 |
| Q28-44-NC-NL | 1" extra strong lead (XS) | Х | 1" male iron pipe threads | 1.7 |

^{*}These items fit two types/sizes of lead pipe as shown in the description.

Lead Pipe Dimensions

Q24-44-N

Follow federal, state, and local regulations and AWWA best practices (AWWA C810) to reduce exposure to lead in potable water.

| SIZE (I.D.) AND TYPE OF LEAD PIPE | APPROX. AVG. SIZE O.D. |
|-----------------------------------|------------------------|
| 1/2" Extra Strong | 0.876 |
| 1/2" Double Extra Strong | 1.012 |
| 5/8" Strong | 1.019 |
| 5/8" Extra Strong | 1.082 |
| 5/8" Double Extra Strong | 1.137 |
| 3/4" Strong | 1.156 |
| 3/4" Extra Strong | 1.212 |
| 3/4" Double Extra Strong | 1.336 |
| 1" Strong | 1.428 |
| 1" Extra Strong | 1.492 |
| 1" Double Extra Strong | 1.596 |
| 1 1/4" Extra Strong | 1.765 |
| 1 1/2" Extra Strong | 2.076 |
| 2" Extra Strong | 2.751 |

This table represents some of the most common lead pipe sizes. Additional connection sizes might be available to accommodate lead sizes not listed above.

Section J

Ford[®] Couplings For Pipe And Tubing

Warranty

All merchandise is warranted to be free from defects in material and factory workmanship for one year from date of shipment from our factory. We will provide, free of charge, new products in equal quantities for any that prove defective within one year from date of shipment from our factory. Manufacturer shall not be liable for any loss, damage, or injury, direct or consequential, arising out of the use of or the inability to use the product. Before using, user shall determine the suitability of the product for user's intended use and user assumes all risk and liability whatever in connection therewith. No claims for labor or consequential damage will be allowed. The foregoing may not be changed except by agreement signed by an officer of the manufacturer.

No other warranties are applicable or may be implied, including the implied warranty of merchantability and the implied warranty of fitness for particular purpose and any warranty relating to infringement or the like, all of which are disclaimed.

Parties responsible for monitoring and maintaining proper water system design must exercise full responsibility in understanding and upholding the full intent and scope of applicable lead laws.

Please Note:

Consult The Ford Meter Box Company, Inc. website (www.fordmeterbox.com) for the most recent catalog information. The Ford Meter Box Company considers the information in this catalog to be correct at the time of publication. Items and option availability, including specifications, are subject to change without notice. Please verify your product information is current.
