Model 5100

Model 5200

Available in Galvanized or Black Pipe

Auxiliary drains collect moisture from the dry sprinkler system while minimizing the potential for excessive loss of air pressure (NFPA 13, 8.16.2.5.3.5\*, A8.16.2.5.3.5).

The **COLLECT<sup>®</sup>ANDRAIN<sup>®</sup>** Family of products are auxiliary drains (low-point drains, drum drips, condensation collection assemblies) available in several configurations to meet and exceed NFPA 13 and NFPA 25 requirements addressing drainage in dry and pre-action sprinkler systems.

### Model 5100A **COLLECT<sup>®</sup>ANDRAIN<sup>®</sup>**

The COLLECT<sup>®</sup>ANDRAIN<sup>®</sup> Model 5100A Auxiliary Drain features a patented, AGF Anti-Trip Plate (ATP) which prevents the opening of the upper collection or lower drain valve unless the opposite valve is in the closed position (as per NFPA guidelines) deterring vandalism and improper maintenance. The 5100ALBV (alarm ball valve) detects water present in the collection assembly then sends audible and visual alert onsite and/or to a remote control panel.
