## PressG

# PRESS

## FOR GAS AND COMPRESSED AIR APPLICATIONS

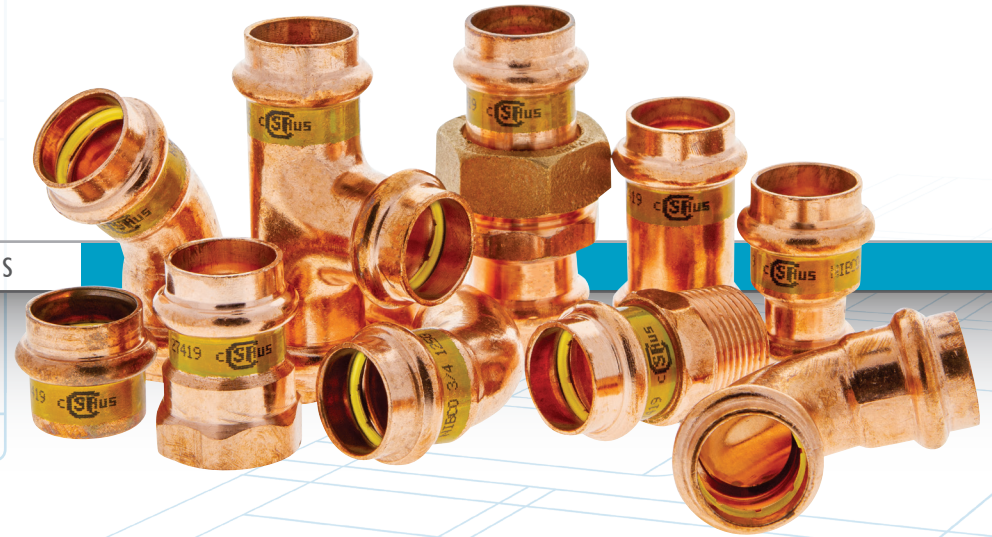

Drive your business forward with NIBCO® PressG and its patented leak detection feature allowing you to quickly identify uncrimped connections during system testing.

Only NIBCO offers a single-source package of press fittings and tools, saving you valuable time on job sites and allowing you to press forward.

### Why Use Press?

- Lower total installed costs for the entire system
- Systems can be dry-fit before crimping
- Making secure, consistent and leak-proof connections a smooth, efficient process
- Faster installation time means greater productivity on the job site
- CSA approved for use in gas applications

### FITTINGS AND TOOLS

Press fittings install easily for a perfect fit every time.

Flame-free installations are safer – great for occupied spaces.

Perfect for wet installations when pressed for time.

## FOR GAS AND COMPRESSED AIR APPLICATIONS

Engineered specifically to install our press products, NIBCO press tools are lightweight, ergonomic, convert easily to electric power, and include LED lights to illuminate work areas. The large press tool is the only tool in the industry that can crimp every brand of fittings or valves.

Backed by more than 110 years of experience, our unparalleled customer service ensures you'll have the products and tools you need – when you need them – saving you time and money.

The NIBCO Press System will increase your productivity and profitability.

### FITTINGS AND TOOLS

#### Performance

- Patented leak detection feature ensures uncrimped connections are found during system testing
- Flame-free installation is safer than soldering or brazing
- Perfect for wet installations when pressed for time
- Consistent joint quality means fewer callbacks and reliable performance

#### NIBCO Advantage

- Fittings are manufactured in the USA from 100% North American pure copper
- Complete line of tools and jaws
- Exclusive AC adapter is convenient for prefabrication, reducing down time
- ½" - 2" fittings have the same lay lengths as NIBCO® solder end fittings – no need for system redesign
- Features a yellow HNBR seal for a variety of applications
- Save time with our single-source package of fittings and tools
