DESCRIPTION

When your work requires delicate, precision wiping to handle critical tasks, Kimtech Science™ Kimwipes®, by Kimberly-Clark, are an obvious choice. With a legacy of more than 60 years of being the go-to wipe for cleaning surfaces, parts, instruments in labs, laboratory lenses, and medical offices, these wipes easily clean liquids, dust and small particles. Plus, the anti-static dispensing design reduces electrostatic discharge. As a wipes chooser, our delicate task wipes are an efficient choice, thanks to our waste-reducing, one-at-a-time dispensing box.

286 Sheets/Box; 60 Boxes of Kimtech Science™ Kimwipes® Delicate Task Wipes/Case; 17,160 Sheets/Case; White; Pop-Up Box

Kimtech Science™ Kimwipes™ Delicate Task Wipes easily wipe up liquids, dust and tiny particles and are designed for delicate tasks.

Each wipe is useful for polishing glassware, cleaning laboratory instruments and other delicate surfaces.

The anti-static dispensing system reduces lint and electrostatic discharge (for sensitive environments like labs).

One-at-a-time dispensing for minimized waste.

They have changed something about the wipes

Leon

a year ago

Have been using these for over 10 years and they used to be great. For the last few months though I've just been constantly frustrated by them. Any time I would pull one out of the box the next one would get partially pulled out and be ready for the next pull. Now whenever I pull one out, the next one either slips off of the other wipe before getting to the film or just a tiny portion of it gets caught but isn't enough to pull it out and when you try to pull it out it'll just fall back down into the box and so you have to reach into the box and try to grab it but it's impossible and you just end up stretching the plastic film which will then make the problem even worse in the future. I'm pretty sure they've changed how the wipes are folded and placed in the box because this was never an issue and none of the materials seems or feels different. The wipe itself works great and does what it's supposed to.
