works with the Google Assistant

ERROR DISPLAY & E-MAIL NOTIFICATION

Be notified via e-mail of an error message.

SYSTEM DIAGRAM

Wireless router

- IEEE802.11b/g/n wireless LAN standard
- Frequency bands: 2.4GHz (1ch~13ch)

Internet access required, both in your home and on your mobile device(s).

Required Operating System version

- Android OS 4.1 or later
- iOS 8.0 or later

INSTALLER SETTING

This feature offers an easy way for contractors to perform the following settings without leaving the application:

- **Initiate Test Run**
- **Service Contact** allows the customer to notify their contractor whenever there is an issue with the system.
- **Function Setting** through an easy-to-use interface, contractors can enter function settings into the system by selecting the desired function and setting value.

IFTTT (IF THIS THEN THAT)

Multi system integration through cloud services. Choose from a number of applets to operate your system based on Geo-fencing, Weather conditions, Google Calendar and more.
