

Specifications

PFXT1SS Stainless Steel Expansion Tank

Product Features

- Space-saving, compact design stainless steel expansion tank and shock arrestor for tankless and POU water heaters with 2 gallons or less of total water volume
- Designed to protect the heat exchanger on tankless water heaters by relieving excess pressure in the system
- Tank includes a 40 psi factory precharge but can be adjusted in the field
- Entire tank is constructed of 304 stainless steel
- 1/2" NPTM 304 stainless steel connection
- UV-resistant and approved for outdoor installation
- Butyl membrane diaphragm
- NSF 61 certified
- Should be installed on the cold water inlet below the isolation valve in between the tankless heater and the check valve
- Max working pressure: 150 psi
- Max operating temperature: 195°F
