

SCHEDULE 40 PVC DWV FITTINGS

FEATURES & BENEFITS

Lower Installation Costs

PVC pipe and fittings are easily handled, stored, cut and joined, meaning significant reductions in labor and transportation costs on typical installations.

Superior Chemical Resistance

PVC DWV pipe and fittings handle exceptionally well against such chemicals as acids, alkalis and normally diluted hydrocarbons. Aggressive industrial effluents and acid rain are easily tolerated as well.

Corrosion Resistance

PVC DWV fittings are immune to damage from naturally corrosive, soil conditions as well as electrochemical and galvanic corrosion. Our fittings' non-corroding properties ensure improved flow, lower maintenance costs and longer performance life.

Lower Thermal Conductivity

With a dramatically lower thermal conductivity factor as compared to metal, plastic systems have less heat loss or gain and sustain the temperature of the service with less variation than metal piping. As a result, pipe insulation is often not required.

SIZES

Injection Molded
4" – 12"

Fabricated Molded
10" – 24"

Multi Fittings offers a wide range of injection molded and fabricated Schedule 40 DWV fittings for the sewer market.

PVC DWV fittings are typically used for drainage and effluent piping and rainwater leaders for buildings such as parking garages or from roof tops in commercial and industrial applications.

For over 50 years, Multi Fittings has been an industry leader in offering the most comprehensively engineered and tested fittings for plastic pipe in North America.

Multi Fittings produces the widest range of injection molded fittings for pressurized water mains and sewer forcemains, gravity flow sewers and drain, waste and vent applications.
