

HEAT PUMPS

DRHP15

DURASTAR™ residential heat pumps are built to perform both efficiently and quietly, delivering home comfort you can count on.

Durable Construction

Constructed with a wire grille exterior that does an outstanding job protecting the condensing coil fins from yard hazards, weather and corrosion, so you can be confident in the way it performs.

Quiet Operation

Several features contribute to quiet and better overall performance – starting with the composite base pan. The design helps eliminate corrosion and adds to quieter performance. Extensive UV testing was done to ensure that it stays black for years to come. The enhanced mufflers and refrigerant tubing design also contribute to a quieter more durable operation.

Efficient Performance

Legendary scroll compressor technology makes the DRHP15 as efficient as it is durable. The optimized fan orifice contributes to quieter operation, optimal airflow and better overall performance.

AVAILABLE SIZES:

1.5 – 5 TONS

EFFICIENCY:

15 SEER / 13 EER / 9.0 HSPF

Limited Warranty Information:¹

Parts – Five (5) Years
