

Dummy Door Lock Installation

Dummy Knobs and Levers are generally used on Closet or Pantry Doors where the door is held Closed by a 1) Ball Catch, 2) Magnetic Catch or 3) Tension Catch.

Step 1 : Locate the Handle Position

Generally Handles are Located centered 36" Above the Floor
Centered 2-3/8" in from Door edge

Check other interior doors in your house to ensure consistency.

Double doors extra care should be taken to ensure that the Left and Right-Hand doors are hung evenly

Step 2 : Install Lock

Hold Lock with Screw Holes Level and screw onto Door.

In Hard woods and Masonite pilot holes should be drilled

Note: Shaped Levers Such as waves and Scrolls are not reversable and must be Purchased Left or Right-Handed
