

Dark Solid Surface Stone Bathroom Wares Cleaning and Maintenance

KKR Dark Solid Surface Stone Color Range

Tips on What You Should Do

Being resistant to stains and scratches, our solid surface stone bathroom wares are nonporous and durable enough to withstand day-to-day using.

However, to keep the original beauty in prime condition, it is recommended to :

- Rinse them after each use in time to prevent mineral or soap accumulation. Most dirt will be washed off with clean water.
- Wipe the surface with a soft cloth in time after rinsing to keep them clean and dry.
- Reseal the bathroom wares once or twice a year with car wax to keep the natural shine.

Tips on What You Should Not Do

Although our solid surface bathroom wares are very easy to clean, however, you should still make sure that the cleaning is completely thorough and will not affect the surface finish.

To avoid irreversible damage, it is recommended to:

- Avoid cleansers with acid and alkali/ammonia chemical solvent and other solutions not approved used, such as household cleaners, CIF, Mr. Chen, Scrubbing Bubbles, Goof Off, aerosol cleaners, and paint removers.
- Avoid products that contain abrasives.
- Avoid wiping with the snake melon cloth or hard brush.
- Do not grind with sandpaper.
- Avoid hot water flushing when cleaning.
- Do not place any hot items directly on the surface to prevent them from direct heat exposure.

KKR After-sales Service

For more professional guidance, please contact our Customer Service Department with detailed products pictures or videos. We will provide the most suitable solution as quickly as we can. You can email customercare@jamesmartinvanities.com.
