

Threaded Mechanical Branch Tee Fig. MT-1 & MT-1A

For Listings / Approval Details and Limitations, visit our website at www.asc-es.com or contact an ASC Engineered Solutions® Sales Representative.

Mechanical branch connections are used in fire protection systems for reducing branch outlets without welding. The MT-1 & MT-1A are a bolted saddle type fittings with NPT female threaded outlets. Design assures superior sealing, full pipe support, excellent stability and easy installation.

For the latest UL / ULC listed, LPCB, VdS and FM Approved pressure ratings versus pipe schedule, visit our website at www.asc-es.com or contact an ASC Engineered Solutions® Sales Representative.

Material Specifications

Housing

Ductile Iron conforming to ASTM A-536, Grade 65-45-12

Bolts

SAE J429, Grade 5, Zinc Electroplated
ISO 898-1, Class 8.8, Zinc Electroplated followed by a Yellow Chromate Dip

Heavy Hex Nuts

ASTM A563, Grade A, Zinc Electroplated
ISO 898-2, Class 8.8, Zinc Electroplated followed by a Yellow Chromate Dip

Coatings

Rust inhibiting paint Color: ORANGE (standard)
Hot Dipped Zinc Galvanized (optional)

Lubrication

Standard Gruvlok

Gruvlok Xtreme required for dry pipe systems and freezer applications

Gasket Materials

Properties as designated in accordance with ASTM D-2000.

Grade "E" EPDM (Green color code)
-40° F to 230° F (Service Temperature Range)
(-40° C to 110° C)

Recommended for water service, diluted acids, alkalies solutions, oil-free air and many chemical services.

NOT FOR USE IN PETROLEUM APPLICATIONS.

Building connections that last™

Fig. MT-1, MT-1A & MT-8 Threaded Mechanical Branch

ALWAYS USE A GRUVLOK® SPF / ANVIL® LUBRICANT FOR PROPER COUPLING ASSEMBLY.

Thorough lubrication of the gasket is essential to assist the gasket into the proper sealing position.

1 Pipe preparation

Cut the appropriate size hole in the pipe and remove any burrs. Be sure to remove the slug from inside the pipe. Clean the gasket sealing surface within $\frac{5}{8}$ " (16mm) of the hole and visually inspect the sealing surface for defects that may prevent proper sealing of the gasket.

Branch Size	Hole Saw Size
Inches (mm)	Inches $\pm\frac{1}{8}$, -0 (mm ± 3 , -0)
1 25	1½ 38
1¼ (2" run) 32 (50mm run)	1¾ 44
1½ (2½"-6" run) 32 (65-150mm run)	2 51
1½ (2" run) 40 (50mm run)	1¾ 44
1½ (2½"-6" run) 40 (65-150mm run)	2 51
2 50	2½ 64
2½ 65	2¾ 70
3 O.D. 76.1	2¾ 70
3 80.4	3½ 89

Note: Flow Data is expressed as Feet / Meters of Schedule 40 steel outlet pipe with a "Hazen-Williams coefficient of friction value of 120".

2 Check and lubricate gasket

Check the gasket to be sure it is compatible for the intended service. Apply a thin layer of Gruvlok SPF/Anvil lubricant to the back surface of the gasket. Be careful that foreign particles do not adhere to the lubricated surfaces. Insert the gasket back into the outlet housing making sure the tabs in the gasket line up with the tab recesses in the housing.

3 Gasket installation

Lubricate the exposed surface of the gasket. Align the outlet housing over the pipe hole making sure that the locating collar is in the pipe hole.

4 Alignment

Align the strap around the pipe, insert the bolts and tighten the nuts finger tight.

5 Tighten nuts

Alternately and evenly tighten the nuts to the specified bolt torque.

6 Assembly is complete

Specified Bolt Torque

Specified bolt torque is for the oval neck track bolts used on SPF threaded mechanical branches. The nuts must be tightened alternately and evenly until fully tightened.

Caution: Proper torquing of mechanical branch bolts is required to obtain specified performance. **Over torquing the bolts may result in damage to the bolt and / or casting which could result in pipe joint separation.** Under torquing the bolts may result in lower pressure retention capabilities, lower bend load capabilities, joint leakage and pipe joint separation. Pipe joint separation may result in significant property damage and serious injury.

ANSI Specified Bolt Torque

Bolt Size	Wrench Size	Specified Bolt Torque*
In.	In.	Ft.-Lbs
¾	1¼	30-45
½	7/8	80-100
5/8	1 1/16	100-130
¾	1 ¼	130-180

* Non-lubricated bolt torque

Metric Specified Bolt Torque

Bolt Size	Wrench Size	Specified Bolt Torque*
mm	mm	N-M
M10	16	40-60
M12	22	110-150
M16	24	135-175
M20	30	175-245

* Non-lubricated bolt torque
