

High Capacity Trash Compactors

BROAN®

High Capacity Trash Compactors 1050 1052

Enjoy the convenience of the industry's most powerful residential compactors. One bag of garbage per week. That's all the average family of four will produce, thanks to the 182-gallon capacity of these powerful units. They easily crush bottles and cans that cause problems for other machines. To complement any kitchen decor, your choices include classic black, white (special order) and biscuit. Or choose our model 1052 Stainless Steel Compactor, styled for today's upscale commercial-look kitchens.

These powerful units compress a full 14 average garbage bags of refuse into one easy-to-handle compactor bag: 65 percent more trash than the leading competitor. Plus they offer your customers more style and feature options than any other units:

A. Most powerful residential compactor on the market

Broan's patented "double scissors" ram and motor deliver up to 5,000 lbs. of compaction force. Exclusive new screw guard prevents loose trash from interfering with operation.

B. Swing away door

Simply slide out full trash bag. Entire drawer removes for easy cleaning. Convenient toe release on models 1050 and 1051.

C. Interlocking door with auto reverse

Safety interlock prevents operation when door is open. Ram automatically reverses if load is off-center.

D. Broan Trash Compactor Bags 1006

Broan's reinforced plastic trash bags are available ten packs of 12.

E. Optional cutting board top (models 1050 and 1051) 1004

Solid hardwood cutting board adds a finishing touch to free-standing applications.

Note: A handy storage area is located behind the flip-down decorator door. All models include three compactor bags and a convenient bag caddy.

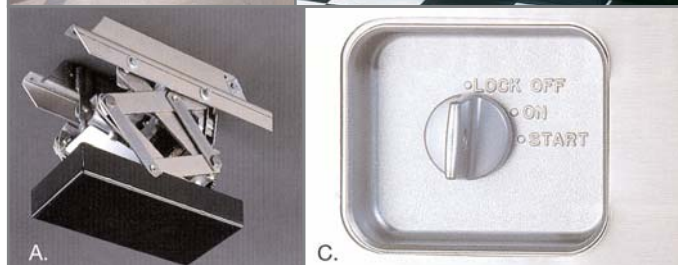

Model 1052: Stainless Steel

Models 1050 & 1051: Reversible door panels

It's easy to match your kitchen decor with the reversible door panels or by inserting your own 1/4" x 11-11/16" x 20-7/8" wood or laminate panel. If using a laminate/wood panel, the panels described below simply slide out.

Specifications - All Models: 12" W x 34-1/2" H x 20-1/4" D, compaction up to 5000 lbs., leveled with four adjustable leveling legs.

Materials - Model 1052: Door panel and control panel insert made of 304 grade brushed stainless steel; bag storage door and toe space cover made of color-matched high-impact ABS; cabinet frame made of black textured cold rolled steel; control panel made of satin silver high-impact ABS.
