Warner Vision: We call it the Warner Way. We're SMARTER, STRONGER AND BETTER at making tools and giving our customers the support they need to be successful.

Smarter: We listen to our customers and consumers to develop tools that fit their needs to ensure they will be successful in the market place. Ultimately for us, the proof that we are smarter at our business is in the design of our tools, their durability and their ease of use.

Stronger: We enjoy pushing our innovations from good to great. Even in areas where we have the strongest products, we keep generating ways to make them better. Our company began in 1927, and our staying power is a testament to our strength. Our tools are made tough and strong by people who are tough and strong.

Better: Our goal is to give our customers the best customer service the industry has to offer and to give consumers the best information they need to complete their projects. We live by the creed be honest, trustworthy and loyal. This represents the Warner Way of dealing with our customers.

History: Harry H. Warner who founded Warner Tool Products in 1927 used to say the only thing you have that is worth anything is your name. To keep your name, you've got to provide customers value and put every customer first. The Warner family still runs the company this way, four generations later. If it's got our name on it, it works.

Innovation:

Warner's innovation has demonstrated that Warner is the leader in the Paint Tool Category, and the commitment to continue developing industry leading products.

PROGRIP®

Patented Color-Coding Handle Technology*

Customizable Inserts

The PROGRIP® line uses a patented color-coded handle system to identify blade flexibility: Stiff, Flex, Full Flex. Matched color-coded icons on the labels demonstrate usages. This at-a-glance identification helps customers select the right tools for their needs and makes for easier, faster sales for you. The PROGRIP line features:

- Ergonomic, color-coded soft grip handles
- Polypropylene with a TPE (Thermoplastic Elastomer) overmold
- Two soft-grip handle styles, Push & Pull
- Two cap styles
- Color coded blade flex on handle
- Three blade-flexibility options
- High-quality carbon steel blades
- Full tang
- Plated Zinc Hammer Cap™ on select models
- Dura Cap™ on select models
- Chisel-edge on stiff knives
- Large hang-hole size
- **Made in U.S.A.**

FOR SCRAPING AND REMOVAL

Red Handle = Stiff

Heavy-duty blades provide maximum strength and have a chisel ground edge. For fine scraping and shaving with less gouging or chipping. Standard blades are .050" thick and heavy-duty blades are .080" thick. Ergonomic handles have a ribbed finger grip for better pushing control.

PROGRIP®

Blue Handle = Flex

Standard carbon steel blades are hollow ground to provide consistent flex and proper stiffness for spreading heavy drywall compound. Ideal for first-coat applications. Ergonomic handles are designed to fit the hand more comfortably, for use as a spreading tool and to reduce fatigue. Some models available with Hammer Cap™. Angled blades reach into corners, help keep hands away from wall.

	For Scraping and Removal	For Spreading and Applying	Applying Lightweight Spackling

Use 1-1/4"-2"

Knives to apply spackle, putty and for detail work in smaller areas.

Use 3"

Knives for patching, touch-up and heavy-duty scraping.

Use 4" - 6"

Knives for taping drywall joints and large surface scraping

Use a **multi-purpose** tool to scrape, clean and glaze.

PROGRIP®

Yellow Handle = Full Flex

Full Flex applies to blades that have been hollow-ground thinner for maximum flexibility. They are designed for lighter compounds. Perfect choice for final or finish-coat applications. Ergonomic handle is wider and flatter, designed to fit the hand for use as a spreading tool and to reduce fatigue. Design improves blade control.

Rosewood Series

Warner Quality— Craftsmanship You Can Trust

If you're a professional who likes the feel of wood-handled tools but wants the performance of today's technology, the choice is Warner. The Rosewood Series offers the same high-quality blades as the PROGRIP® Series, but with wood handles. Rosewood-colored handles are affixed to blades with brass coated steel rivets and eyelets. Blades are made from .050", .060", and .080" thick carbon steel.

Rosewood Series Features:

- Rosewood colored handles with brass rivet & eyelets
- Blades are made of high carbon-grade steel
- Hollow-ground, heat-treated and annealed for toughness
- Blades polished and buffed to high luster finish for easier application and cleanup
- Full-tang design for maximum strength
- Brass rivets and eyelets mechanically lock handle to tang so it cannot come loose
- Chisel-edge on stiff knives

Carbon Steel Blades

Heavy-duty blades provide maximum strength and have a chisel ground edge. Use for fine scraping and shaving with less gouging or chipping.

The Painter's Blade®, 12-in-1 Folding Knife

It's another Warner innovation—performance that you carry in your pocket. This patented tool features a carbon steel blade in a secure lockback system. It has a thumb knob for one-hand easy opening and a spring-loaded lock for closing. #10801 Folding knife is extra thin, 3/8" thick, to slide into pockets easier. The textured Aluminum handle helps prevent slippage and hand fatigue. Spring clip end. Carbon steel blade.

100X® Paint Scraper with Carbide Blades

Warner uses a special grade of tungsten carbide on 100X® Paint Scrapers because it is extremely hard and durable. In fact, the softest grade of tungsten carbide composite starts where steel stops.

Carbide 100X® Blades are diamond-ground to produce an edge sharper than steel! These blades will scrape paint faster and cleaner than any standard, hardened steel blade! That's the performance that has pushed 100X® paint scrapers to be on the "most wanted" list in the Warner line. Soft grip TPE handle includes a removable Phillips screw bit in the grip cap for changing blades. Standard handles are polypropylene. Both have an aluminum neck. The knobs are made of polypropylene and steel.

Affordable Scrapers and Blades

Good quality at an economical price. Ideal for light-duty home projects and more. Rugged, comfortable-to-use scrapers have plastic Polypropylene PistolGrip™ handles that arch up for proper leverage. Blades are high-carbon steel, industrial-ground, easy to replace and can be re-sharpened as needed.

Choice of two or four scraping edges depending on blade type. Multiple scraping edges require less sharpening to help get more work done in less time. #s 740, 741 & 742 are polypropylene.

4", 5", and 6" Scrapers

Industrial-ground carbon steel blades and big, beefy scrapers can take on practically any scraping job. Tools are designed to deliver maximum leverage on wall and floor surfaces. Multipurpose scrapers tackle anything from wax buildup to dried adhesives. Scraper #690 is a popular tool used in a wide variety of industries. #34690 has a polypropylene with a soft TPR over-mold threaded handle. Scrapers are packaged with the blunt edge of the blade exposed for safety, reverse the blade to expose the sharp edge. Overall length's (head and pole) shown do not include blade. Standard Acme Thread, 3/4"-5 x 1" on 34690 and 11221.

Utility Knives

Utility knives feature heavy-duty, die-cast zinc, aluminum or plastic housings with ground and honed high-carbon steel blades. Top trigger release designs allow blade to be retracted for safety. The fixed blade version securely clamps the blade in a cutting position. The folding utility knife folds for safety and convenience. Pivot blade open with one hand using thumb pin. To change blade, push button and pull blade forward. A special safety feature of the #566 safety utility knife is a spring-loaded, self-retracting blade. Pressing the trigger exposes the blade, and the blade retracts when the trigger is released.

UTILITY KNIVES

Taping Knives

Offering a range of taping knives, typically 6" and 8" knives are used for setting tape and 10" and 12" blades are used for applying finish coats. Blades are supported with aluminum backings.

PROGRIP® Blue Steel & Stainless Steel

The PROGRIP® line of taping knives features soft grip, ergonomic handles with blue steel or stainless steel blades. The handles are polypropylene with a TPE (Thermoplastic Elastomer) overmold. Aluminum back plates. Handles are riveted to blades.

Professional Aluminum Backing Plate

Aluminum backing provides blade rigidity while making these knives up to 40% lighter than standard taping knives. Polypropylene handle is molded to the extruded aluminum backing plate so it cannot come loose. Blade flares out at edges to reach into corners. Blue steel or stainless steel blades.
