For Standard Wiring:
1 Secure the mounting plate to the junction box.

2 Screw the cap into the hole in the bottom of the backplate.

3 Connect the fixture ground wire to a suitable ground in accordance to local electrical codes.

4 Connect the white fixture wire to the neutral power line wire with a wire nut.

5 Connect the black fixture wire to the hot power line wire with a wire nut.

For Plug-in:
6 Secure the mounting plate to the wall.

7 Determine the desired length of stem and screw stems together if necessary.

8 Feed the cord though the stems and through the hole in the bottom of the backplate.

9 Screw the stem assembly into the bottom of the backplate.

10 Connect the fixture ground wire to a suitable ground in accordance to local electrical codes.

11 Connect the white fixture wire to the neutral cord wire (square and/or rigid) with a wire nut.

12 Connect the black fixture wire to the hot cord wire (round and/or smooth) with a wire nut.

For Both:
13 Properly place all wires and wire nut connections into the junction box/fixture base, mount the fixture onto the mounting plate/fixture bracket, and secure it in place using the fixture screws.

14 Install the shade by placing it onto the socket, then secure in place by screwing the shade ring onto the socket.

15 Screw the lamp into the socket. Refer to the label on the socket for Max Wattage Information.

16 Adjust the fixture arm as needed.
