

STOVETOP FIRESTOP
LOWPRO

Stovetop Firestop® LowPro® represents the next generation of StoveTop FireStop designed to be concealed under the microwave or a modern flat-bottom ventilation hood.

LowPro is easy to mount using four small, but powerful magnets on adjustable arms to avoid lights and vents under most microwaves.

Our new ramp systems delivers all of the powder to fire or burner.

 STOVETOP FIRESTOP
LOWPRO

Stovetop FireStop LowPro
 P/N: 691-1A

- Stylish design to mount under microwaves
- Magnet arms swivel to make installation easy
- New ramp can pivot forward or backward to deliver powder directly to the fire in the pan on either burner.
- Vertical clearance: 15-32" between the mounting point and the cooking surface
- Automatic activated by contact with a sustained flame.
- Each pair protects a typical residential, 4-burner stove
- No maintenance or inspections needed
- 6-year effective life
